To CHRIS. REUTER, Seedsman, New Orleans, La.—The above list of names is correct.

Please sign your name and address here: ____________________________________________________________
AM featuring on this and the following seven pages of this catalog certain standard, proven, dependable types and varieties of vegetables that I know will give absolute satisfaction to either market, truck or home gardener. These varieties are planted every season by the most successful commercial gardeners throughout the Southern states who, from experience, have learned to know the most adaptable and profitable sorts to produce. Every variety will produce a product that will sell in the big markets. Home gardeners wisely plant those sorts the markets want so that when surpluses are raised profitable marketing will help out the farm or home income. If you believe in pure bred live stock; if you realize that only like can beget like; then you will want to sow some of these standard, high-bred, selected strains of established varieties. Your garden, whether a "back-yard" spot or a forty-acre truck farm, will be planted in the finest, purest, most adaptable, most productive and profitable varieties when sown with Reuter's Selected Market Gardeners' Varieties as shown on these pages.

CHRIS. REUTER.

CROSBY EGYPTIAN BEET

The Finest Strain in America Today

Reuter's Crosby Egyptian Beet has given excellent satisfaction with market gardeners and truckers throughout the entire South.

No other beet has so many real, genuine points of merit as this highly developed, closely selected, pedigreed strain of the famous Crosby Egyptian. A consistent demand from the same people year after year for this variety should be sufficient endorsement for all gardeners to know that in planting this grand beet they are planting the world's best beet, and a variety that owing to its small top makes it especially desirable for bunching.

The roots are flattened globe shape and very smooth. The exterior color of the root is bright red. The flesh is bright vermilion red, zoned with a lighter shade, very sweet, tender and of excellent quality.

Prices: Pkt., 5c; oz., 10c; 1/2 lb, 35c; lb., $1.25; 5 lbs., $5.00, postpaid. By express, not prepaid, peck (15 lbs.), $3.50; bu. (60 lbs.), $12.50; 100 lbs., $20.00.

REUTER'S BLACK VALENTINE BEAN

An Unexcelled Strain for Southern Market Gardeners

It is unquestionably one of the most attractive green beans in cultivation, and rivals them all for productiveness and shipping qualities.

The pods are round, very handsome, and quickly salable in all markets. The pods are medium dark green and about six inches long.

Thousands of acres in Florida, Louisiana, Mississippi, Texas, and other Southern States are devoted during the spring and fall to the cultivation of this variety for early market purposes. READY FOR PICKING IN FORTY-FIVE DAYS.

Prices: Pkt., 10c; pound, 40c; 2 lbs., 75c; 5 lbs., $1.75; 10 lbs., $3.25, postpaid. By express, not prepaid, peck (15 lbs.), $3.75; bu. (60 lbs.), $14.00; 100 lbs., $32.00.

GIANT STRINGLESS GREEN POD BEAN

Perfectly Stringless, Attractive, Long Green Pods

An exceedingly productive and very handsome sort. The plants are large, vigorous and spreading. The pods are large and nearly round, and of medium green color. They mature a few days later than the Stringless Green Pod, average one-fourth inch longer and more nearly straight. This variety, illustrated in colors at bottom of page, has achieved unheard of popularity in Southwest Texas, where it has made good in every instance.

Prices: Pkt., 10c; pound, 40c; 2 lbs., 75c; 5 lbs., $1.75; 10 lbs., $3.25, postpaid. By express or freight, not prepaid, peck (15 lbs.), $3.75; bu. (60 lbs.), $14.00; 100 lbs., $22.00.

WARDWELL'S KIDNEY WAX BEAN

Unsurpassed in Richness of Quality

One of the earliest, best, and hardest of the wax sorts. The plant becomes loaded with long, broad, and flat, beautifully waxy colored pods which are stringless of and of a rich, luscious flavor, and are exceedingly brittle; the dried beans are a distinct kidney shape.

The pods are about six inches long and of excellent quality. They always command a ready sale on all markets, making the variety one of the most profitable for the trucker.

Prices: Pkt., 10c; pound, 40c; 2 lbs., 80c; 5 lbs., $1.90; 10 lbs., $3.50, postpaid. Not prepaid, by express or freight, peck (15 lbs.), $3.75; bu. (60 lbs.), $13.50; 100 lbs., $21.50.
**REUTER'S CHARLESTON WAKEFIELD CABBAGE**

The Finest Spring Cabbage for the South

Standing pre-eminent as the finest spring cabbage for the South, Reuter's Charleston Wakefield has contributed much towards placing cabbage on the northern markets during the spring months from the Sunny South. The heads when matured average 10 to 12 pounds each and sometimes more. For sureness in heading and regularity of growth, REUTER'S CHARLESTON WAKEFIELD CABBAGE is the acme of perfection. It is unquestionably the best variety to plant during the early spring months for either home use or market. The heads are of equal size and as hard and as solid as a cannon ball. The most severe weather ever known in this section does not inflict the slightest injury to Reuter's Charleston Wakefield. The type is remarkable for its quick-growing habit, fully two weeks earlier than the flat-headed varieties. The plants, owing to their compact growth and few outer leaves can be set close together and yield an enormous crop per acre. Unusually crisp and sweet for home use.

Prices: Pkt., 10c; oz., 35c; ¼ lb., $1.25; lb., $4.00; 5 lbs., $18.75, postpaid.

**REUTER'S DANVERS HALF LONG CARROT**

The Best Carrot for all Purposes

The most popular carrot for the market gardener and trucker, and for many years has lead our whole list as the best seller. A half long orange carrot, grown largely on account of its great productiveness and adaptability to all classes of soil. It is a desirable second early carrot for the home garden and also the best money-making variety for the market gardener and trucker. The tops are of medium size. The mature roots are of medium length, six to eight inches long, tapering uniformly to a blunt point. Grown extensively by market gardeners for bunching, and largely shipped to northern markets. Our strain is unbeatable.

* Prices: Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., $1.00; 5 lbs., $4.50, postpaid.

**REUTER'S EXTRA DARK EVERGREEN WHITE SPINE CUCUMBER**

The Ideal Variety to Plant for General Crop

A black-green cucumber that holds its color better than any other sort. If you want a real dark green White Spine variety, plant this one. The rich color holds for several days after reaching the markets in Northern cities, and on account of this profitable characteristic it is largely planted by market gardeners and truckers. It is extremely prolific, an unbeatable shipper, and very early. It is crisp and tender and retains its fresh appearance long after being gathered. The fruit is from eight to nine inches long, and two to three and one-half inches in diameter. It is unsurpassed as a table and market cucumber. It has all the good points that a cucumber should have and none of the bad ones, and will be found satisfactory for both market and home use.

Prices: Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., $1.50; 5 lbs., $6.25, postpaid.

**EGG PLANT**

REUTER'S NEW ORLEANS MARKET EGGPLANT

The Finest Home and Shipping Variety

A long, dark purple variety that is absolutely distinct, being perfectly adapted to the South in every respect. The seed is produced in New Jersey from my own personal stock seed. No eggplant on the market combines such wonderful characteristics for the market gardener and trucker. These eggplants will carry to any market in the United States or Canada without spoiling. Their keeping quality is a profitable asset. The plants grow large and high, sometimes five feet, and bear fruit entirely off the ground. Being an upright grower, it resists heat and drought. Its color is deep purple, sometimes showing a tinge of red, very large in size, oval in shape, absolutely spineless, and of the finest quality. If you are going to plant eggplants this spring, and are in doubt as to what variety to sow, don't hesitate to plant this one by all means. No one else can offer you the same stock. The shortness of the present seed crop urges early ordering.

Prices: Pkt., 10c; oz., 35c; ¼ lb., $1.25; lb., $4.00, postpaid.
The South’s Greatest Shipping Watermelon

10,000 lbs. Sold
Last Year Without a Single Complaint

REUTER’S EDEN GEM CANTALOUPE

The Great Rockyford Melon for the South

(Green Fleshed)—This well know strain of the famous Rockyford Cantaloupe has made good in every section of the South, and today ranks as one of the foremost and most dependable varieties. It is a heavy yielder, nearly all of the melons are solid net, the meat deep and of excellent quality. The melons are of standard size, being but few too large and less too small. The Eden Gem is a sure money maker for the cantaloupe grower for shipping to the big markets, and is also a highly desirable sort for the home gardeners.

The flesh of these melons is green, lusciously sweet and melting; it can be eaten close to the rind. The seed cavity is extremely small. The average weight of the melon is about one and one-half pounds, and the largest per cent of the crop is of such size as to pack 45 melons to the standard crate, (12x12x24 inches). The netting is extremely well developed, closely laced, of gray color, covering the entire fruit. Reuter’s Eden Gem is one of the best early strains, and more prolific and rust-resistant than any other variety.

Prices: Pkt., 5c; oz., 20c; ¼ lb., 50c; lbs., $1.60; 5 lbs., $7.50, postpaid.
Reuter’s True Tenerife Grown Bermuda Onion Seed.

For nearly ten years we have supplied fully 75% of the leading commercial growers in the famous Bermuda Onion districts of Southwest Texas with their seed. Each year millions of dollars worth of Bermuda Onions grown from our seed are shipped to Northern markets from Texas, Florida, California and Louisiana. We recommend the Bermuda varieties for spring planting, in those more northern sections of the South where it gets too cold for these sorts to live through the winter.

**WHITE OR YELLOW BERMUDA**

The standard variety for the commercial grower. It is a light straw-colored onion. Each year our sales of Reuter’s White or Yellow Bermuda Onion seed have increased heavily in the great onion sections of the South, and a large majority of the growers will plant no other kind. Our stock ripens early, is of the best color, and the heaviest yielder. The illustration on the right shows the three distinct varieties of Bermuda Onions as grown from spring planted seed.

Prices: Pkt., 10c; oz., 25c; ¼ lb., 75c; lb. $2.75, postpaid.

**CRYSTAL WHITE WAX**

The most attractive onion in the world. It is absolutely pure white and of the finest flavor and quality. In New York and other large markets our Crystal White Wax sells at 25 to 50 cents per crate above the Bermuda White or Yellow. Seed is always in short supply, as it is a very light seeder.

Prices: Pkt., 10c; oz., 50c; ¼ lb., $1.50; lb., $5.00, postpaid.

**RED BERMUDA**

Planted throughout the South for home use generally. It is identical in size and shape with the other Bermuda varieties, but the color is pale, waxy red, and is just the right variety in all sections where a mild red onion is preferred.

Prices: Pkt., 10c; oz., 25c; ¼ lb., 75; lb., $2.75, postpaid.

**OTHER VARIETIES OF ONIONS FOR SPRING PLANTING—PAGE 29.**

**FROM A BIG ONION GROWER OF TEXAS**

“I want to commend you for the splendid Yellow Bermuda Seed you furnished me. It was as free of reds as any I have ever seen, and the color was the brightest and the type, shape and size beyond criticism.”

**TO COMMERCIAL BERMUDA ONION GROWERS**

I am now booking orders for my Genuine Tenerife Grown Bermuda Onion Seed, crop 1920, for delivery in September. Let me know the quantity you will need, and I’ll promptly quote interesting prices.
REUTER'S SPECIAL MARKET GARDENERS' VARIETIES

REUTER'S GARDEN SEED PEAS (Seed Crop Short)

REUTER'S ALASKA (EARLIEST OF ALL)
You want to plant an acre or so of this extra-early pea, which matures in about 35 days. Be sure, however, that you procure Reuter's Northern Grown Pea Seed. By careful selection and growing, we have developed a stock of this smooth blue pea of unequaled evenness in growth and early maturity of pods, which are filled with medium sized green peas of good flavor. The vines are medium in height, about two and one-half to three feet. The pods are of good size, about two and one-half to two and three-fourths inches long. This sort matures all of its crop at once and is a valuable variety for market gardeners and canners.

Prices, by mail postpaid: Pkt., 10c; lb., 40c; 2 lbs., 75c; 5 lbs., $1.65; 10 lbs., $3.25. Not prepaid, by express or freight, peck (15 lbs.), $4.00; bu. (60 lbs.), $15.00; 100 lbs., $24.00.

PROLIFIC EARLY MARKET
A smooth white-seeded extra early sort, with pods one-third larger on vines, six inches taller and about 5 days later than Reuter's Peerless Extra Early, but of remarkable productiveness, giving a yield of 30 to 50 per cent more pods than any other strain of extra earlies of which we know. The quality is the very best, one of the sweetest and finest flavored of the earliest smooth varieties.

Prices, by mail postpaid: Pkt., 10c; pound, 40c; 2 lbs., 75c; 5 lbs., $1.65; 10 lbs., $3.25. Not prepaid, by express or freight, peck (15 lbs.) $4.00; bu. (60 lbs.) $15.00; 100 lbs., $24.00.

REUTER'S ROYAL KING PEPPER
A Regal Beauty—Immensely Popular.
A wonderful pepper for commercial truckers who ship to northern markets. For two years we have sold a limited quantity of this seed to a few of our market gardeners and the results were more than ever anticipated. We expect to sell more seed of this variety than all others combined, and justly so, due to its superb qualifications, which puts Royal King head and shoulders over any pepper introduced within the past ten years. Unequaled for home use, but more especially adapted to truckers and market gardeners who ship their products, due to its uniformity of size and shape, making it a most excellent sort for this particular purpose. Its fine appearance on arrival in markets will insure its being sold at top prices at all times.

This new sweet pepper was developed and perfected in the South, and will in time take the place of all other sorts planted in a commercial way. It is very prolific, fruit of brilliant color, very glossy, of large size; the flesh is very thick and mild. Our stock runs remarkable true to type, producing strong, stocky plants of erect growth. If you were to ask me for the one pepper to plant in the South for home garden or shipping I would unhesitatingly recommend Reuter's Royal King. The flavor is exceedingly mild, can be eaten raw, and when stuffed and cooked, it has no equal. This is a money-making pepper for anyone sowing a large or small acreage.

Prices: Pkt., 10c; oz., 35c; ¼ lb., $1.25; lb., $4.00, postpaid.
NEW CROP RADISH SEED

FROM TRANSPLANTED ROOTS

Our stocks of Radish seed are of superlative quality and will meet the most discriminating requirements of the most critical market gardener.

REUTER'S EARLY SCARLET TURNIP WHITE-TIPPED RADISH

The Best and Quickest Round White-Tipped Sort

If you wish to have the finest and first round white-tipped radishes sow this splendid strain. The skin is of a rich scarlet color, tipped white. It is extremely quick to mature, being ready for table in 20 days from time of sowing the seed. It is an invaluable market-gardeners' type. The skin is very smooth, and its flavor excellent. You'll find this a quick-selling sort at good prices, always above ordinary stocks, and it is no less satisfactory in the home garden.

Prices: Pkt., 5c.; oz., 10c; ¼ lb., 30c; lb., $1.00; 5 lbs., $4.50, postpaid.

REUTER'S CINCINNATI MARKET RADISH

The Finest of the Early Long Radishes

This is the finest long radish to plant for shipment to northern markets. I annually sell tons of this seed to customers along the Gulf Coast. It is the standard market radish in a number of southern trucking centers, and is without a doubt the most profitable long variety in cultivation. The skin is scarlet colored, and very thin; the flesh is crisp, brittle, and of a delightful flavor. The roots are slender and before becoming pithy are often six to eight inches long by about five-eighths of an inch in diameter at the shoulder. I am proud of my superior seed which is grown expressly for me under contract in far North, enabling our stock to produce marketable radishes earlier than other stocks offered.

Prices: Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., $1.00; 5 lbs., $4.50, postpaid. Write for special prices on larger quantities.

Reuter's Genuine Green Striped Cashaw Pumpkin

A Grand Pumpkin for the South

This is one of the finest pumpkins in cultivation. It is a large crookneck variety, grown largely in Louisiana and other southern states, and extensively by the local market gardeners. Fruits are very large, with crooked neck. Color creamy white, irregularly striped or traced with green. Flesh light yellow, very thick, rather coarse, but sweet. Very hardy, bugs seldom bothering them. Can be grown among corn and makes heavy yields. Fine for stock and table purposes. The seed we offer is the genuine stock, produced from our own private stock seed, which we have kept pure for many years. It is far superior to other stocks offered under the same name. Note illustration on left-hand bottom of this page.

Prices: Pkt., 5c; oz., 20c; ¼ lb., 60c; lb., $2.25, postpaid.

A TEXAS GARDENER—In increasing his order with me for Spinach Seed, from 200 to 300 pounds, wrote: "One of your competitors has been trying to get your trade, but I am well satisfied with your dealings and haven't any reason to change."
REUTER’S SPECIAL MARKET GARDENERS’ VARIETIES

Sow Reuter’s Celebrated Tomato Seed

FROM A TEXAS CUSTOMER
“My June Pink Tomato crop, produced from your seed, has been the greatest satisfaction for results I have ever had. In fact, they produced too much. They were earlier than any I have ever had by nearly a week, and the finest and most perfect I ever harvested.”

REUTER’S PEERLESS JUNE PINK TOMATO
Unexcelled for Home Use and Shipping
A highly developed strain that will produce an attractive purplish-pink tomato of the finest quality as early as Earliana. The fruits are large, nearly round, very smooth, solid. The fruits grow in clusters and fairly load down the plants with an abundance of uniform fruit. It is as smooth as the Stone, and as seedless as the Ponderosa. A grand shipper. A great favorite in Southwest Texas. Last season solid carloads of these tomatoes grown exclusively from our seed were distributed throughout the entire country, and our customers tell us that our stock is unbeatable. At the writing of this catalog, we have already booked orders in one section of Southwest Texas for more than 1,500 pounds of seed. The growers are wild in their praise of Reuter’s Peerless June Pink Tomatoes. Our strain speaks for itself. It has no equal.
Prices: Pkt., 10c; ounce, 35c; ¼ lb., $1.25; lb., $4.00 postpaid.

LIVINGSTON’S GLOBE TOMATO
Distinct in Shape, Firm and Blight Proof
(Illustrated on front cover.) The standard variety in Florida. We annually sell hundreds of pounds to truckers in this State, also in Mexico, Cuba, as well as in the Southern States. Our stock is carefully grown for us from the original strain and kept pure by the most rigid selection. It is an absolute globe-shaped variety, ripens very early, color is a glossy red, tinted with purple. The vines are very vigorous and productive. Bears fruit in clusters of from three to seven, so that it can be truthfully stated the plants are literally loaded with beautiful tomatoes. Of special value to all long distance shippers.
Prices: Pkt., 10c; ounce, 35c; ¼ lb., $1.25; lb., $4.00, postpaid.

REUTER’S EARLIEST WHITE BUSH SQUASH

THE EARLIEST OF ALL SQUASHES
PATTY PAN—This is the earliest squash we know of. The vines are vigorous and very productive. The fruits are of medium size, somewhat flattened and scalloped. The color is creamy white with comparatively smooth surface. For many years we have found our stock earlier than others, and producing more uniform fruits. You will be pleased with this strain.
Prices: Pkt., 5c; oz., 20c; ¼ lb., 50c; lb., $1.75; 5 lbs., $8.00, postpaid.
REUTER'S SPECIAL MARKET GARDENERS' VARIETIES

Plant Reuter's Selected Turnip Seed This Spring

REUTER'S PEERLESS PURPLE TOP WHITE GLOBE TURPIN—A large rapid-growing turnip with globular shaped roots. Flesh is pure white of finest quality and excellent flavor. The crown is purplish red and the remaining portion clear white. A heavy cropper and fine market sort. We sell thousands of pounds of our selected stock to the New Orleans market gardeners.

Prices: Pkt., 5 oz., 10c; ¼ lb., 30c; 1 lb., $1.00; 5 lbs., $4.50, postpaid.

EARLY RED OR PURPLE TOP STRAP LEAF—One of the most popular varieties for either spring or fall planting. An extremely early turnip, requiring only 45 days from seed sowing to be ready for table. Roots flat, of medium size, purple or dark red above ground, white below. Flesh is white, fine-grained and tender.

Prices: Pkt., 5c; ounce, 10c; ¼ lb., 25c; 1 lb., 75c; 5 lbs., $3.50, postpaid.

EARLY WHITE FLAT DUTCH—A very white turnip, fine for spring or fall sowing. The roots are of medium size, flat, very white fleshed, fine grained and sweet.

Prices: Pkt., 5c; ounce, 10c; ¼ lb., 25c; 1 lb., 75c; 5 lbs., $3.50, postpaid.

EARLY SNOWBALL—A splendid extra early white skinned and fleshed early turnip that is fine for spring planting. Flesh snowy white, crisp and tender.

Prices: Pkt., 5c; ounce, 10c; ¼ lb., 25c; 1 lb., 75c; 5 lbs., $3.50, postpaid.

LARGE SNOW WHITE GLOBE—A variety grown exclusively for stock feeding. Globe in shape; flesh and skin pure white. Tops and leaves are inclined to make a strong growth.

Prices: Pkt., 5c; ounce, 10c; ¼ lb., 25c; 1 lb., 75c; 5 lbs., $3.50, postpaid.

GOLDEN BALL—(Orange Jelly)—One of the most delicious and sweetest yellow-fleshed turnips. Not of large size, but firm, hard and most excellent flavor. Keeps well and is a superior table sort.

Prices: Pkt., 5c; ounce, 10c; ¼ lb., 25c; 1 lb., 75c; 5 lbs., $3.50, postpaid.

SEVEN TOP OR SALAD—Cultivated extensively in the South for tops, which are used for greens. Very hardy and will grow all winter, but does not produce a good root, and is only recommended for the tops.

Prices: Pkt., 5c; oz., 10c; ¼ lb., 35c; 1 lb., 75c; 5 lbs., $3.00, postpaid.
REUTER'S SPRING 1920 CATALOG

This is a year when gardens and orchards and fields should be intelligently worked to capacity. We are told that “under production” and “over consumption” are responsible for the present state of affairs in our country. The “high cost of living” need never concern the home with a good garden and orchard or the farmer with fields well tilled. The “cost of high living” isn’t worrying people who delight to sow the seed, work the furrows and watch the wonders of Nature spring forth from the soil. Production will only resume normal output when everybody who can is producing! Any family with a vacant spot suitable for a garden, or a field lying fallow, can help themselves materially, and inexpensively, by putting that spot into a productive vegetable garden or the field into a money crop. And while we are thinking and planning to produce food and feed let’s not forget that with practically no effort and scarcely any expense we can make our homes attractive and more desirable to live around by planting flowers and shrubbery and trees and the many beautiful things that Nature has provided for our use. I know you will find this catalog the finest I have ever issued—I believe it is the most beautiful and serviceable seed and nursery catalog ever sent out by a Southern house. It will help you in choosing the most suitable varieties of garden and field crops. Look through it carefully—and don’t forget to order early.

AT YOUR SERVICE

It has seemed to me that customers might be interested in seeing a picture or two of the organization that supplies them with seed. On this page I have grouped a number of photographs taken in my store. You will note that we are human-beings just like you, striving to serve our patrons as our patrons hope to be served. Being humans, mistakes and errors do happen but we are all eager to straighten them out in a human way. We know that we cannot hope to receive continuous business from a customer if we fail to give good service on the first order. We try to look upon our mail order customers as friends just as we do those who come in and trade with us over the retail counter.

If we should, by chance, make a mistake, tell us about it right away. The employee who is responsible for the error is reasoned with about the annoyance and trouble it has caused a customer. "Call downs" never correct mistakes or develop loyal employees and good service.

Picture No. 1 shows a portion of our office, with mail receiving table in the center. The young ladies are opening the morning's first delivery of mail orders. No. 2 shows a section of our mail order division where quarter-pounds, pounds, and larger sized packages are filled. No. 3 shows the checkers giving a "double-check" to each item on every order to insure accuracy. No. 4 shows one of our automatic packet-filling machines. This machine, with one operator, will fill, seal and deliver 5,000 packets an hour, each one with the correct quantity of seed. No. 5 pictures one of a battery of three motor trucks used in receiving stocks and delivering mail, express and freight shipments. No. 6 is a view of the packing and shipping tables. Here are handled parcel post packages only. Heavier shipments go out from another section of the store. These are only a few of the views of the establishment and employees that we might show but I hope they will interest you and give you some idea of our preparedness to serve you efficiently and satisfactorily. If you like these pictures, tell us so, and we'll try to give you others in coming catalogs.

At your service,

Chris. Reuter.
Four Packages Free With Every Order for 50c or More

General Directions to My Customers:

By carefully observing the following directions, mistakes and misunderstandings will be largely avoided.

HOW TO ORDER—Please be careful to sign your Name, Post Office, Rural Route, and State on every order. Be sure to tell us your nearest express office, should you desire the seed forwarded by express; if by freight, your railroad station, also preferable routes; or, if by boat, your landing, and the name of boat, if possible. WRITE PLAINLY.

ORDER EARLY—It will greatly facilitate shipments if orders are sent in early. We aim to ship all orders the same day they are received, and our mail-order department has a capacity for more than 1,000 orders daily, but shipping it is impossible during the rush season.

CASH WITH ORDER—Customers will please return when ordering. If goods are wanted C. O. D., twenty-five per cent, or one-fourth of the amount, must accompany the order. No plants shipped C. O. D.

HOW TO SEND MONEY—Remittances should be made by post office money orders, express money orders, or checks on New Orleans or New York. Where it is not possible to obtain these, the letter should be registered. In all cases where the order for seed amounts to one dollar or more, the cost of post office or express money order, or cost of registering the letter from places that are not money order offices, may be deducted from the amount of the order.

STAMPS—On orders of seed where the amount is less than 50 cents, we will accept stamps in good condition (one and two-cent stamps preferred) the same as cash, but we would ask those remitting stamps to wrap them in oiled paper, if possible, to prevent their sticking together or to the order.

SEEDS POSTPAID BY PARCEL POST—Please bear in mind that the prices given in this catalog include delivery on all seeds by packet, ounce, quarter-pound, pound, two pounds, five pounds and ten pounds lots, unless otherwise specified. Send us the amount named in this catalog, and we guarantee safe delivery by postpaid parcel post in these quantities. This does not include seeds and heads.

PRICES SUBJECT TO CHANGE—This Catalog is printed in October and November and the market on many items of garden and field seeds has not yet been established. Consequently prices on these items indicate values at the time these pages are printed. Orders will be filled, if at all possible, at prices printed in this book, but ALL PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE.

NON-WARRANTY—Chris. Reuter does not give, and his agents and employees are forbidden to give any warranty, express or implied, as to description, quality, productivity, or any other matter of any seeds, bulbs, plants, etc., he sends out and he will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are to be returned at once, and if the money has been paid for them, it will be refunded. NO RESPONSIBLE SEEDSMAN GIVES ANY WARRANTY.

PACKED STAMPED—We test all our seeds before sending them to our customers, and should they fail to grow, if promptly and properly tested by the customers, we will replace the same amount or give value in others. We cannot afford, knowingly, to send out seeds doubted as to vitality or purity, and you cannot get any better stocks of any seedsman, even though he deceitfully processes to warrant seeds.

A guarantee from an irresponsible seedsmen is of no value whatever. If we should warrant or guarantee seeds in any way, we could be held responsible for the failure of the crop, regardless of cause, and this is a responsibility we cannot and will not accept. Crops are dependent on success or failure on so many things besides seed that it is impossible for us to give any warranty or guarantee.

A Big Dock Free to Commercial Truckers—My big 200 page book, "How to Grow, Pack and Ship Vegetables for Profit," which I wrote and published solely for the benefit of my customers, is still being demanded. I am always mighty glad to note a request for it on an order blank for I know that it will greatly help any gardener who is anxious to increase his profits and market better truck. This book is used in many agricultural high schools as a textbook on vegetable growing; it is referred to in agricultural universities for instruction and guidance; it is on the decks of the experts in the Department of Agriculture and Experimental Stations; in fact, it is received with enthusiasm among the people of the subject. You will find full explanation of how to obtain one on the order blank in the front of this catalog. I cannot afford to send it out promiscuously, but I think I have made it easily possible for every trucker to read it by offering to send one free, when requested, with an order for seed amounting to $2.00 or more. If you have never read this book be sure to get a copy with your next order for seed.

A Booklet Free to Home Gardeners—To supply valuable information for the planting and caring for home gardens I have written and printed a booklet that touches vegetable planting from the standpoint of the home garden only. Many home gardeners who patriotically did their best during the war to produce their own garden truck in order that commercial production might go to those who needed it most and who could not produce their own, were very much discouraged with their results. Much of the failure was due to a lack of knowledge of the best and most simple methods of planting, etc. This little booklet will give the home gardener the best accomplished form of information in plain language tells what varieties are best; when to plant; how much to plant; and all of the other little, but very necessary, details for the successful making of a good home garden. The booklet has already been reprinted many times to supply the great demand for it. It costs you but a few pennies to print one so I am glad to offer it to any home gardener who may ask for it when sending in an order, regardless of the amount of the order. Not intended for commercial gardeners, but for the home gardener who might use it.
The seeds contained in all of my Big Bargain Seed Collections are of the same high quality and the identical varieties that are listed in this catalogue. No cheap stocks bought for collection purposes—all high-germinating, fresh, new vegetable seeds. I am able to make these very low prices to my good customers because these collections are put up by thousands in advance of the season's rush. My Famous Bargain Collections are not subject to alterations or change.

REUTER'S BUSH OR BUNCH BEANS

FINEST GREEN POD VARIETIES FOR EARLY "SNAPS"

It's Easy to Grow Bush Beans for Market or Home Use—Bush Beans are planted in our latitude (New Orleans) from the latter part of January until about April 1st; sometimes a little later. February and March are the main planting months, sowing being usually begun in February in past. They are also planted again during August, September, and the first half of October. Buy enough seed in the spring to plant again in the fall.

Sow in long rows two to three feet apart. The plants about 3 to 4 inches apart in the rows. Sometimes 2 to 6 beans are dropped to every eight to ten inches. Cover about 2 inches. Fine pods may be had from standard varieties by sowing repeatedly at intervals to fifteen days apart, during the sowing season. It is more advisable to make small plantings at intervals than sowing a large acreage at once. Keep soil well stirred, and when the blossoms appear, draw earth close around the plant. It requires about a pound of seed to sow a 100-foot row. One bushel (60 lbs.) will sow an acre. Takes two to three months to produce a crop. Most early varieties mature in 40 to 60 days, but 200 to 200 hampers of snap beans are usually produced on an acre. Last season our growers averaged about $300.00 per acre in gross returns. The growing of early snap beans for shipment to Northern Markets is unquestionably one of the most profitabletruck crops in the South.

Bean Prices—Beans are now sold by the pound. A pound is approximately a pint; 2 lbs. slightly more than a quart; 5 lbs., about 2 1/2 quarts; 10 lbs., about 5 quarts; 15 lbs. equal a peck, sold a bushel weight 60 lbs. Each.

Postage Paid—On all Beans listed on the following pages up to 10-pound quantities are postpaid, and we will ship them any mail it will be necessary to remit additional amount at Parcel Post Rates. We do not put up half-pounds ofBeans.

Reuter's Black Valentine—Illustrated color and described on page 1 of this catalog. Prices: Pkt., 10c; lb., 40c; 2 lbs., 75c; 5 lbs., $1.75; 10 lbs., $3.25, postpaid. By express, or freight, not prepaid, peck (15 lbs.), $3.50; bu. (60 lbs.), $12.50; 100 lbs., $25.00.

Bountiful—This is surely an excellent dwarf green podded sort of very low growing habit. They are rather rich green, large in size, thick, broad, strong, very productive. The pods are rich green, immense size, thick, broad, extra long, very uniform in shape, solid, meaty and of high quality. They are tender and brittle much longer than most sorts. The appearance is handsome and absolutely stringless. The commercial truckers along the Gulf Coast are largely planting this variety due to its ability to withstand adverse weather conditions, and also due to its productivity. We highly recommend this strain, believing that it has no equal, and find that it is very reliable for the plug or home use, we suggest that you plant some Bountiful Beans this year.

Prices: Pkt., 10c; lb., 40c; 2 lbs., 75c; 5 lbs., $1.75; 10 lbs., $3.25, postpaid. Not prepaid, by express or freight, peck (15 lbs.), $3.50; bu. (60 lbs.), $11.50; 100 lbs., $18.00.

Full Measure—This magnificent round-podded bush bean bears long, round, green pods, thick, rich, and exceedingly prolific. The pods are of an attractive green color, 5 inches long, firm and tender. The plant is of a handsome, erect growth, with dark green foliage, very prolific and practically blight-proof. It is a thoroughbred stringless variety of the finest quality, always yielding very large crops of handsome green pods remaining for use many days after maturity. It is coming in great demand among truckers on account of its reliable appearance and luscious quality, which hold its customers.

Prices: Pkt., 10c; lb., 40c; 2 lbs., 75c; 5 lbs., $1.75; 10 lbs., $3.25, postpaid. Not prepaid, by express or freight, peck (15 lbs.), $3.50; bu. (60 lbs.), $12.50; 100 lbs., $20.00.

Longfellow—Sometimes catalogued as the French Market Bean. Usually grown for local market and home use. It is absolutely stringless and it is very successful as a good shipper as the Valentines or other sorts recommended for this purpose. Largely planted by our local gardeners for home consumption and nearby markets. The pods are long, round, straight and very solid. Plants uniformly flowering of the finest flavor.

Prices: Pkt., 10c; lb., 40c; 2 lbs., 75c; 5 lbs., $1.75; 10 lbs., $3.25, postpaid. Not prepaid, by express or freight, peck (15 lbs.), $3.50; bu. (60 lbs.), $11.50; 100 lbs., $18.00.

Bean Seed Prices—You'll find our prices on Seed Beans very all the benefit we can of lower prices. During the war period, we advanced our prices only in rare instances as an absolute last resort to protect ourselves and did not speculate in seeds or "profiteer." It has always been, and ever will be our policy to treat our customers and our clients in stock as we would like to be treated ourselves, particularly in a time of war and distress. Our prices are as low as the market will permit.

Burpee's Stringless-Green Pod (Fine)—The only absolutely stringless green round-podded bean, stringless in all stages of growth, from the time the first pods form until full growth and ready to dry out. It is one of the most popular and widely grown varieties, on account of its reliability, productivity and good quality for both home use and for market. The pods are medium green, five to six inches long, cylindrical, larger than those of Red Valentine, but are quite as fleshy, of equal high quality and remain crisp and tender longer. They mature a little later. Largely planted throughout Texas and other Southern States for commercial purposes. A good shipper and keeper. I unhesitatingly recommend this variety to everyone of my customers this season as one of the best green-podded beans for the South.

Prices: Pkt., 10c; pound, 40c; 2 lbs., 75c; 5 lbs., $1.60; 10 lbs., $3.00, postpaid. Not prepaid by express or freight, peck (15 lbs.), $3.25; bushel (60 lbs.), $11.50; 100 lbs., $18.00.

Giant Stringless Green Pod Bean—Illustrated color and described on page 1 of this catalog. Prices: Pkt., 10c; pound, 40c; 2 lbs., 75c; 5 lbs., $1.75; 10 lbs., $3.25, postpaid. Not prepaid, by express or freight, peck (15 lbs.), $3.50; bushel (60 lbs.), $11.50; 100 lbs., $20.00.

Reuter's Extra Early Round Pod Red Valentine—This variety is much larger planted in Alabama, Mississippi, and other Southern States than any other sort. The pods are produced in large clusters on erect plants. It is very prolific and reliable and an excellent shipper. The pods are of medium length, about four and one-half inches, medium green color, curved, cylindrical, with crease in back, very fleshy, crisp and tender. When the young plants have to contend with adverse weather conditions, no other dwarf bean is more certain than the Valentines are to set pods. We know of no stock of Red Valentine which can be compared with that we offer in uniformly high quality of pod.

Prices: Pkt., 10c; lb., 40c; 2 lbs., 75c; 5 lbs., $1.75; 10 lbs., $3.25, postpaid. Not prepaid, by express or freight, peck (15 lbs.), $3.50; bushel (60 lbs.), $11.50; 100 lbs., $20.00.

Picking Bountiful Beans for Market
“Snap” Beans---A Quick Money Crop

Extra Early Refugee

An extremely early, green podded sort furnishing round, fleshy, light green pods which are slightly curved, medium size, about five inches long and of fine quality. The plants are a little smaller and more upright and the leaves are a little larger than those of the REFUGEE 1000 TO ONE. Largely planted in our Lower Coast section, as well as in Florida for first early crop for market. Matures in 42 days. Stands shipment well.

Prices: Pkt., 10c; pound, 40c; 2 lbs., 75c; 5 lbs., $1.60; 10 lbs., $3.00; post paid. Not prepaid, by express or freight, peck (15 lbs.), $3.25; bu. (60 lbs.), $13.50; 100 lbs., $18.00.

Refugee or Thousand to One

Hardy vigorous, used largely for canning and shipping. The plants are very large, spreading, exceedingly hardy, with many small, smooth light green leaves. The mature pods are about five and one-fourth inches long, cylindrical, slightly curved, medium to pale green when in condition for use as snaps.

Prices: Pkt., 10c; pound, 40c; 2 lbs., 75c; 5 lbs., $1.75; 10 lbs., $3.25; post paid. Not prepaid, by express or freight, peck (15 lbs.), $3.50; bu. (60 lbs.), $12.50; 100 lbs., $20.00.

Keeney’s Stringless Green Refugee

An improved type of the Refugee, 1000 TO One, eliminating the string. The plant grows to a height of four feet, producing highly prolific, one plant having borne 50 well-developed pods. The shape is round, size medium to long, slightly curved, very brittle, tender and delicious.

Prices: Pkt., 10c; pound, 40c; 2 lbs., 75c; 5 lbs., $1.75; 10 lbs., $3.25; post paid. Not prepaid, by express or freight, peck (15 lbs.), $3.50; bu. (60 lbs.), $12.50; 100 lbs., $20.00.

DRY OR SHELL BEANS

Red Kidney—The good old-fashioned, baking bean. Prices: Pkt., 10c; lb., 40c; 2 lbs., 75c; 5 lbs., $1.25; 10 lbs., $3.25; post paid. Not prepaid, by express or freight, peck (15 lbs.), $3.50; bu. (60 lbs.), $12.50; 100 lbs., $20.00.

Dwarf White Navy—This is a sure cropper and extremely prolific. The pods are small, oval, white, handsome and of superior quality for use as dry beans.

Prices: Pkt., 10c; pound, 40c; 2 lbs., 75c; 5 lbs., $1.75; 10 lbs., $3.50; post paid. Not prepaid, by express or freight, peck (15 lbs.), $3.50; bu. (60 lbs.), $12.50; 100 lbs., $20.00.

White Tepary Field Bean—Similar to the Navy Bean, but smaller. When soaked a few hours it swells twice the size and more double in weight. Has no cupcakes, harder and quicker growth. It is a sure early-maturing bean and can be planted by early plant growth. Drill in rows four inches apart. Sow 30 or 50 to 75 pounds of an acre.

Prices: Pkt., 10c; pound, 35c; 2 lbs., 65c; 5 lbs., $1.50; 10 lbs., $2.75; post paid. Not prepaid, by express or freight, peck (15 lbs.), $3.75; bu. (60 lbs.), $10.00; 100 lbs., $14.00.

Pinto or Mexican Bean—The true Pinto is larger than the Navy, and is more kidney shaped. It is speckled or spotted (the word “Pinto” meaning spotted), and is equal in every way to the Navy for edible purposes. When baked the bean is a little more firm and the flavor is the same.

Prices: Pkt., 10c; pound, 35c; 2 lbs., 65c; 5 lbs., $1.50; 10 lbs., $2.75; post paid. Not prepaid, by express or freight, peck (15 lbs.), $3.75; bu. (60 lbs.), $10.00; 100 lbs., $14.00.

White Mexican or Prolific Tree Bean—The White Mexican resembles the Navy bean, so common in our stores, and of which the South buys hundreds of carlots a year. It is grown in Texas, California, Michigan and New York. You can just as easily grow these beans as you can tomatoes in your garden, and you'll find this super variety entirely satisfactory for any purpose anywhere in the South. Plants of great growth holding pods well up off ground, although in season with plenty of rain there is a tendency to grow them too high. Ordinarily plants grow to 20 to 25 inches high, branching in all directions. Plant in rows about 2 feet apart, leaving a single plant 8 to 10 inches apart in the row. Can be used either as a snap bean or as a shell bean. The pods are one-fourth grown, if they are to be used for string beans, or until they are two-thirds grown if they are to be used as shell beans. The pods are one-fourth grown, if they are to be used for string beans, or until they are two-thirds grown if they are to be used as shell beans. The pods are one-fourth grown, if they are to be used for string beans, or until they are two-thirds grown if they are to be used as shell beans. The pods are one-fourth grown, if they are to be used for string beans, or until they are two-thirds grown if they are to be used as shell beans. The pods are one-fourth grown, if they are to be used for string beans, or until they are two-thirds grown if they are to be used as shell beans. The pods are one-fourth grown, if they are to be used for string beans, or until they are two-thirds grown if they are to be used as shell beans. The pods are one-fourth grown, if they are to be used for string beans, or until they are two-thirds grown if they are to be used as shell beans.

Prices: Pkt., 10c; pound, 50c; 2 lbs., 95c; 5 lbs., $2.25; 10 lbs., $4.60; post paid.

Why Plant Beans—1929 should be a highly profitable year for bean producers and unless all signs fail I am more than safe in urging you to plant plenty of beans. Beans, already a staple food for millions, have been further popularized by the enormous quantities used by the government and their place as one of our most important crops is greatly emphasized. Beans are one of the most sought after articles of food at home and abroad. The money used by those who have good crops of beans to sell will greatly improve our balance of trade. Beans are again in limited supply due to unfavorable weather conditions in practically all of the principal seed producing centers of this country. Severe rains in California and Texas have greatly depleted the anticipated seed stocks. Some varieties are very short and prices consequently high. In spite of these conditions I am prepared to take care of the Western growers who have good crops of beans and to supply them with the materials needed to produce a good crop. I therefore recommend that you plant beans and use the material supplied you with the following directions.

NOTE—Please bear in mind that we pay the parcel post charges on all beans and peas ordered from this catalog in packets, one pound, two pounds, five pounds, and ten pounds. The attention of all persons is called to this important item when ordering our prices with other reputable seed firms whose prices do not include postage, especially in small quantities. Should you desire Beans and Pea in larger quantities shipped by parcel post, it will be necessary for you to add the postage. In this way you can frequently get seeds in the larger quantities delivered at your door by R. F. D. carriers for the same cost as express shipping would be.

Bean Diseases and Insects One of the most serious pests of this crop is the leaf-hopper (green fly). This insect is footed in Florida. This insect sucks the leaves on the underside causing them to curl, wilt and die. The principal fungous disease is anthracnose on the pod spot, which attacks stem, leaves and pods of the bean, being most conspicuous on the pods. A rust of bean leaves is sometimes troublesome, causing defoliation. It is particularly prevalent in hot, humid, weather and in light, brown fields. A mildew of lima beans and sometimes destructively attacks the pods. Directions for Beans: Use PYROX about one pound to twelve gallons of water for the disease mentioned above, and where the lady-bee is troublesome mix a 1/2 cup of good BLACK LEAF “40” solution with the PYROX and spray the undersides as well as the apices of the leaf. Spray with PYROX every week from the time the beans are of sufficient size to be used for string beans, until they are two-thirds grown if they are to be used as shell beans. If the leaves are picked, a good BLACK LEAF “40” solution to PYROX and spray the undersides every three or four days. If the beans are ready to pick within a few days do not spray until they have been picked. Prices of PYROX and BLACK LEAF “40” will be found on Page 69.

Reuter’s Red Valentine

“Pleased to state that the Rocky Ford Cantaloupes were fine, with eating unsurpassed by any. The Irish Grey is a good melon; puts on plenty fruit and matures quickly. I planted one acre in Cantaloupes and realized $100.00.—Grace W. A. GIBSON

SERVICE DEPARTMENT—I feel sure that the United States Department that I established some years ago for the sole benefit of my customers can be of great help to many who are not positive as to the proper and most profitable use of the seeds you buy. I have had considerable experience in the plant for market purposes in their particular sections. I will be only too glad to give any one the benefit of my personal experience of more than forty years, and tell them the best sort to plant on their farms.

Mulford Cultures All leguminous crops, including Gar- den Beans, will thrive best and add greater quantities of valuable nitrogen to the soil, by inoculation.
WAX OR YELLOW PODDED Bush or Bunch Beans

Wardwell’s Kidney Wax—(Illustrated in color and described on page 1 of this catalog.)
Prices: Pkt., 10¢; pound, 45c; 2 lbs., 80c; 5 lbs., $1.50; 10 lbs., $3.25. postpaid. Not prepaid, by express or freight, peck (15 lbs.), $3.75. bu. (60 lbs.), $12.50. 100 lbs., $31.50.

Reuter’s Surecrop Stringless Wax—A valuable introduction that has made good in the Southern States, and is being largely planted for shipment to Northern Markets by many growers. It is an improvement over the early Wax variety, being more productive, bearing much larger pods, and being absolutely stringless. Produces pods which average six inches long, are flat, thick and meaty. The plants are very thriving and hardy, resisting blight admirably. Illustrated on this page.
Prices: Pkt., 10¢; pound, 45c; 2 lbs., 80c; 5 lbs., $1.50; 10 lbs., $3.25. postpaid. Not prepaid, by express or freight, peck (15 lbs.), $3.75. bu. (60 lbs.), $12.50. 100 lbs., $31.50.

Davis White Kidney Wax—A well-known market variety, which has been extensively grown in the South for shipment to Northern Markets. The pods are remarkably long, about six inches, sometimes longer. They are light yellow, straight, and very productive and are crisp and tender. The dry beans are excellent for baking. Seed medium large, kidney shaped, clean, white.
Prices: Pkt., 10¢; pound, 45c; 2 lbs., 80c; 5 lbs., $1.50; 10 lbs., $3.25. postpaid. Not prepaid, by express or freight, peck (15 lbs.), $3.75. bu. (60 lbs.), $12.50. 100 lbs., $31.50.

Dwarf Prolific Black Wax—An exceptionally productive variety. Pods and beans yellow. Very hardy, reliable variety. It is very extensively used for snaps for the home garden and market. The plants are of medium size, erect in growth, with small foliage, very vigorous, and very productive. The ears are produced on fairly long, straight, rather slender stalks. The pods are of medium length, four and one-fourth inches, borne well up from the ground, curved, cylindrical, and densely masked. Produces pods which average six inches long and remain a long time in condition for use as snaps.
Prices: Pkt., 10¢; pound, 40c; 2 lbs., 75c; 5 lbs., $1.75; 10 lbs., $3.25. postpaid. Not prepaid, by express or freight, peck (15 lbs.), $10.50. 100 lbs., $30.00.

Pencil Pod Wax—This very handsome black wax sort is medium early, fairly hardy and productive. It is one of the very best sorts for home use and for near markets where highest quality is desired. The plants are strong. The pods are long, five and one-half to seven inches, straight, round, creamy and of a bright yellow color. They are tender. Short, stringless and are produced through a long season among the market gardeners and truckers.
Prices: Pkt., 10¢; pound, 45c; 2 lbs., 80c; 5 lbs., $1.50; 10 lbs., $3.25. postpaid. Not prepaid, by express or freight, peck (15 lbs.), $2.75. bu. (60 lbs.), $10.50. 100 lbs., $30.00.

Currie’s Rust Proof Wax—Very popular in Southwest Texas
Prices: Pkt., 10¢; pound, 45c; 2 lbs., 80c; 5 lbs., $1.50; 10 lbs., $3.25. postpaid. Not prepaid, by express or freight, peck (15 lbs.), $2.75. bu. (60 lbs.), $10.50. 100 lbs., $30.00.

Keeney’s Rustless Golden Wax—The plants of this hardy and productive second ear early sort are strong, vigorous and have long, narrow leaves, rather small smooth seeds. The pods are about five inches long, flat, oval, stringless, light yellow, wax-like and handsome.
Prices: Pkt., 10¢; pound, 45c; 2 lbs., 80c; 5 lbs., $1.50; 10 lbs., $3.25. postpaid. Not prepaid, by express or freight, peck (15 lbs.), $2.75. bu. (60 lbs.), $10.50. 100 lbs., $30.00.

Hodson Wax—The plants of this late maturing variety are exceedingly vigorous, hardy and productive. The pods are handsome, clear creamy white, very long, about six to seven inches, straight or slightly curved, flat and silky and of good quality. They are crisp and tender if picked when quite young.
Prices: Pkt., 10¢; pound, 45c; 2 lbs., 80c; 5 lbs., $1.50; 10 lbs., $3.25. postpaid. Not prepaid, by express or freight, peck (15 lbs.), $2.75. bu. (60 lbs.), $10.50. 100 lbs., $30.00.

Weber Wax—The pods are of an exceedingly bright yellow color; handsome in this respect than many other wax sorts. The vines are strong, holding the pods up well. Largely planted by truckers in Louisiana for shipment to Northern markets. The pods are cylindrical, in length, usually about five to six inches, comparatively straight and bright green color. They are stringless and are of the best quality for snaps for home use and standing better than most sorts. Seed small, oval, white.
Prices: Pkt., 10¢; pound, 45c; 2 lbs., 80c; 5 lbs., $1.50; 10 lbs., $3.25. postpaid. Not prepaid, by express or freight, peck (15 lbs.), $2.75. bu. (60 lbs.), $10.50. 100 lbs., $30.00.

Currie’s Rust Proof Wax—One of the earliest and most prolific of all wax beans. It has been claimed that this variety is absolutely rust-proof, and the pods are light yellow, about five inches in length. Extremely popular with market gardeners and equally desirable for home use.
Prices: Pkt., 10¢; pound, 40c; 2 lbs., 75c; 5 lbs., $1.75; 10 lbs., $3.25. postpaid. Not prepaid, by express or freight, peck (15 lbs.), $2.75. bu. (60 lbs.), $10.50. 100 lbs., $30.00.

POLE OR RUNNING BEANS

Culture—They are usually planted in hills two to five feet apart. The poles are not placed until the hills are five to six inches grown, although sometimes the poles are placed at planting. Great care is usually taken to plant the hills in a well-drained soil and with a moderate amount of water. The hills are often raised a little to insure good drainage, which is essential. Three to four beans are planted in every hill, and sometimes more. Usually the beans are planted alongside of a fence or trellis, and do nicely. Grow thinly in the shade of corn also. If you keep the pods of all beans well gathered as fast as they are ready for use it will prolong the bearing period. Use one pound to 50 hills; three-fourths bushel (45 lbs.) to the acre.

Reuter’s White Creaseback—This variety has been produced as a result of careful selection for its extreme earliness and in prolific bearing. The plants are very productive, bearing perfectly round, heavy pods in clusters of ten to twelve. The pods are of medium length, 7 to 9 inches long, contain 5 to 7 beans, are particularly handsome, solid, meat of admirable form, free from looseness, and when cooked are exceedingly tender and are of delicately mild and sweet flavor. It bears throughout the season if regularly picked. The enormous dark green pods are handsome, in immense clusters often measuring 7 to 8 inches long, contain 5 to 7 beans, are particularly handsome, solid, meat of admirable form, free from looseness, and when cooked are exceedingly tender and are of delicately mild and sweet flavor. It bears throughout the season if regularly picked.
Prices: Pkt., 10¢; pound, 45c; 2 lbs., 80c; 5 lbs., $1.50; 10 lbs., $3.25. postpaid. Not prepaid, by express or freight, peck (15 lbs.), $3.75. bu. (60 lbs.), $12.50. 100 lbs., $31.50.

McCaslan—A wonderfully prolific bean, absolutely stringless, white seeded, green podded, buttery, and very early. They continue to bear throughout the season if regularly picked. The enormous dark green pods are handsome, in immense clusters often measuring 7 to 9 inches long, contain 5 to 7 beans, are particularly handsome, solid, meat of admirable form, free from looseness, and when cooked are exceedingly tender and are of delicately mild and sweet flavor. It bears throughout the season if regularly picked.
Prices: Pkt., 10¢; pound, 45c; 2 lbs., 80c; 5 lbs., $1.50; 10 lbs., $3.25. postpaid. Not prepaid, by express or freight, peck (15 lbs.), $3.75. bu. (60 lbs.), $12.50. 100 lbs., $31.50.

Kentucky Wonder or Old Homestead—This is an early very prolific sort with excellent quality. The vines are vigorous, climbing well and very productive. The pods are medium size, light green, very long, often reaching nine to ten inches, curved and twisted and nearly round. Very crisp when young, becoming very irregular and spready as the beans ripen.
Prices: Pkt., 10¢; pound, 45c; 2 lbs., 80c; 5 lbs., $1.50; 10 lbs., $3.25. postpaid. Not prepaid, by express or freight, peck (15 lbs.), $3.75. bu. (60 lbs.), $12.50. 100 lbs., $31.50.

Reuter’s Surecrop Stringless Wax—A valuable introduction that has made good in the Southern States, and is being largely planted for shipment to Northern Markets by many growers. It is an improvement over the early Wax variety, being more productive, bearing much larger pods, and being absolutely stringless. Produces pods which average six inches long, are flat, thick and meaty. The plants are very thriving and hardy, resisting blight admirably. Illustrated on this page.
Prices: Pkt., 10¢; pound, 45c; 2 lbs., 80c; 5 lbs., $1.50; 10 lbs., $3.25. postpaid. Not prepaid, by express or freight, peck (15 lbs.), $3.75. bu. (60 lbs.), $12.50. 100 lbs., $31.50.

15
POLE OR RUNNING BEANS—(Continued)

Southern Prolific—Very productive and popular locally, owing to the fact that it commences to bear when scarcely higher than the average bush, and keeps on producing until killed by frost. Largely grown here for a summer and fall crop.

Prices: Pkt., 10c; pound, 45c; 2 lbs., 75c; 5 lbs., $1.75; 10 lbs., $3.25, postpaid.

Not prepaid, by express or freight, peck (15 lbs.), $3.75; bu. (60 lbs.), $12.50; 100 lbs., $30.00.

Cornfield (Genuine)—Climbing sort with red speckled oval seed, is used largely in the South for planting amongst corn. It will give a good crop with the vines used in the use of poles. The vines are medium sized, but vigorous, twining loosely with dark colored leaves. The snap pods are short, three to three and one-half inches, straight, not flat. This is the true type. Prices: Pkt., 10c; pound, 45c; 2 lbs., 85c; 5 lbs., $2.00; 10 lbs., $3.75, postpaid.

Not prepaid, by express or freight, peck (15 lbs.), $4.25; bu. (60 lbs.), $14.25; 100 lbs., $43.50.

Yard Long—This is an interesting curiosity. The round pods, average two feet or more in length having the thickness of a lead pencil. Prices: Pkt., 10c; ½ lb., 30c; ½ lb., 55c; lb., $1.00, postpaid.

PLANT MORE LIMA OR "BUTTER" BEANS

No home garden should be without this crop, for they can be used either in the green stage or as dry beans. They should not be planted as early as the snap beans, for they are very tender and liable to rot in the ground if the weather is too cold or too wet. The several BUSH LIMA BEANS described below are most suitable for both home garden and market, and require no poles; plant and cultivate same as "snap" beans. Plant Lima Beans with the "eye" down.

Henderson's Bush Lima—The earliest of all bush limas; two weeks earlier than any of the climbing sorts. Very hardy and productive. The time to grow and set pods until stopped by frost. This variety is much used by canners, as well as for home and market garden use. Gardeners plant no other bush variety.

Price: Pkt., 10c; pound, 45c; 2 lbs., 75c; 5 lbs., $1.75; 10 lbs., $3.25, postpaid. Not prepaid, by express or freight, peck (15 lbs.), $3.75; bu. (60 lbs.), $12.50; 100 lbs., $30.00.

Jackson Wonder—This is the most prolific and one of the best speckled limas you can possibly plant. It is of true bush form; about two feet high, bearing good pods of broad, flat pods, each having three to five medium-size, flat, handsome beans, which cook quickly and are of superior quality.

Price: Pkt., 10c; pound, 45c; 2 lbs., 85c; 5 lbs., $2.00; 10 lbs., $3.75, postpaid. (Crop very short.)

Burpee’s Bush Lima—The pods are medium green, containing three to five large, flat beans of very good quality for home garden or market.

Price: Pkt., 10c; pound, 45c; 2 lbs., 75c; 5 lbs., $2.00; 10 lbs., $3.75, postpaid. Not prepaid, by express or freight, peck (15 lbs.), $4.25; bu. (60 lbs.), $15.00; 100 lbs., $55.00.

Fordhook Bush Lima—The very best large-seeded variety. The plants are vigorous, and erect, bearing well above the ground. The pods, which are medium green, about four and three-fourths inches long, and each contain three to five large beans of fine quality.

Price: Pkt., 10c; pound, 45c; 2 lbs., 85c; 5 lbs., $2.00; 10 lbs., $3.75, postpaid. Not prepaid, by express or freight, peck (15 lbs.), $4.25; bu. (60 lbs.), $15.00.

POLE LIMA BEANS

More Prolific Than Bush Sorts

Carolina or Sieva—This very early and reliable small seeded pole lima or butter bean is especially adapted for planting in the Southern States. The vines are vigorous, with many short branches. The leaves are small, smooth, glossy dark green. The pods are dark green, short, about three inches, curved flat. Seed small, flat, white with slight tinge of yellow. This is sometimes called Sovie. Largely planted by the New Orleans market gardeners for shipment to Northern markets.

Price: Pkt. 10c; pound, 45c; 2 lbs., 75c; 5 lbs., $1.75; 10 lbs., $3.25, postpaid. Not prepaid, by express or freight, peck (15 lbs.), $3.75; bu. (60 lbs.), $12.90; 100 lbs., $41.00.

Siebert’s—The vine is exceptionally hardy, vigorous and produces pods very early and continues bearing a long time.

Price: Pkt., 10c; pound, 45c; 2 lbs., 75c; 5 lbs., $1.75; 10 lbs., $3.25, postpaid. Not prepaid, by express or freight, peck (15 lbs.), $3.75; bu. (60 lbs.), $13.00; 100 lbs., $41.00.

King of the Garden—The pods are large, numerous and well filled and the beans are of mammoth size.

Price: Pkt., 10c; pound, 45c; 2 lbs., 85c; 5 lbs., $2.00; 10 lbs., $3.75, postpaid. Not prepaid, by express or freight, peck (15 lbs.), $4.25; bu. (60 lbs.), $15.00; 100 lbs., $55.00.

REUTER’S BIG-VALUE HOME GARDEN BEAN COLLECTION

25c Postpaid

This is truly a wonderful value in seed, and an opportunity that no home with a small garden should overlook. There is no particular profit in my offering this collection, but I know everyone who orders and plants it will talk about Reuter’s Seed Beans. It includes:

1 Pkt. Each—Henderson’s Bush Lima 25c Kentucky Wonder (Pole) Burpee’s Stringless 2 Postpaid

I have put into this collection my most desirable varieties and the seed is the finest that I can obtain and is all choice, new crop seed. Be sure to include this collection in your order.
REUTER’S SUPERB GARDEN BEETS

My stocks are grown for me in France, as that country excels the world for the production of the finest quality of Beet Seeds. They are all grown from carefully selected, full-grown roots, uniform as to size, shape and color, and I believe my strains are unsurpassed.

Cultivation—Ground for beets should be rich and well cultivated. Sow in drills 12 inches apart and 1 inch deep. When the plants are well up, thin to from 4 to 6 inches apart in this latitude beets are sown from January until the end of April, and from the middle of July to the middle of November; in fact, some growers sows them every month in the year. Can also be sown broadcast.

Crescent City—A strain of Egyptian, similar to the Crosby, but of darker color and a little earlier. It is the best turnip beet in cultivation for the turnip in the South, especially for early bunching purposes.

Edmund’s Blood Turnip—Turnips are short, rather spreading; ribs and leaf stalks dark red; blade of leaf bright green often with wavy edge. Excellent for winter planting. Prices: Pkt., 5c; oz., 10c; ½ lb., 35c; lb., $1.00; 5 lbs., $5.00, postpaid.

Detroit Dark Red Turnip—Turnips are small and upright in growth. The roots are medium sized, globular or nearly round, very smooth and of dark blood red color. Prices: Pkt., 5c; oz., 10c; ½ lb., 35c; lb., $1.00; 5 lbs., $5.00, postpaid.

Crimson Globe—A splendid sort for either home use or market. Color is deep blood red, fine grained and of unsurpassed quality. Prices: Pkt., 5c; oz., 10c; ½ lb., 35c; lb., $1.00; 5 lbs., $5.00, postpaid.

SWISS CHARD—(See Kale, or Spinach Beet)—This kind of beet is grown for its leaves, not for the roots. It is a favorite with the many for the nombreux, leafy, tender leaves and leaf stalks, which are superior to those of other beets for greens. Later in the season the leafy leaf stems are cooked like spinaches or perhaps Swiss Chard is sometimes called Leaf Beet and Silver Beet. Prices: Pkt., 5c; oz., 10c; ½ lb., 35c; lb., $1.00; 5 lbs., $5.00, postpaid.

BRUSSELS SPROUTS—A species of the cabbage family, especially desirable for planting during the summer and fall. The best time to sow the seed is July and August. When the plants are from four to six inches high, transplant to the open ground, like cabbage. Prices: Pkt., 5c; oz., 35c; ½ lb., $1.00; 5 lbs., $5.00, postpaid.

MANGEL WURZELS—SUGAR BEETS

Reuter’s Mammoth Long Red Mangel—A truly mammoth variety for stock feeding purposes. A single root often weighs 40 to 50 pounds, and sometimes more. In yield it is enormous producing 1,200 to 1,700 bushels to the acre is common in good soil. The flesh is white tinged with rose. It is often two feet or more in length by six inches in diameter. It is one of the best varieties of its kind in texture and flavor, and is an excellent feed. The sugar content is 20 to 25% in the fresh root. This is a new variety and is the result of many years of selection and breeding. It is especially adapted to the growing conditions of the Southern States. Prices: Pkt., 5c; oz., 10c; ½ lb., 30c; lb., $1.00; 10 lbs., $7.50, postpaid.

Klein Wanzleben Sugar Beet—The variety so extensively planted for sugar factories. Roots large. Often yields under careful culture 12 to 18 tons per acre. Prices: Pkt., 5c; oz., 10c; ½ lb., 30c; lb., 90c; 5 lbs., $4.00; 10 lbs., $7.50, postpaid.

Collards—This is a type of cabbage grown for winter use in the Southern States, both for furnishing a large amount of green forage for stock and also for boiling for table use. The young leaves at the top of the stalk form a heart and furnish the portion for table use, being tender and delicate in flavor when boiled. For garden culture, seed may be started in a regular seed bed during July or August and transplanted to the garden like cabbage. For field culture the seed is sown thinly in drills three feet apart, requiring two to three pounds per acre. When well started the plants should be thinned out to stand five or six inches apart in the row.

Southern or Georgia—This variety is the old-time favorite. Very hardy and stands very long. Tennessee. In many places where the soil is too poor to grow Cabbage, Collards grow easily and make a good substitute for Cabbage. Prices: Pkt., 30c; oz., 10c; ½ lb., 1.00, postpaid.

CORN SALAD—(Deuce)—This is a hardy, quick-growing plant; the leaves furnish a good substitute for lettuce during the winter. Sow the seed broadcast or in drills nine inches apart, during the fall and winter. Prices: Pkt., 5c; oz., 10c; ½ lb., 35c, postpaid.

Recommends Reuter’s Nursery—“Received my order of June 20th in splendid condition, and such nice ones for the price. They have not stopped growing. Will always recommend Reuter’s Plants to my friends, for three reasons: the best plants, quick delivery, and good condition on arrival.

(Signed) “Thanking you for past favors.

“Respectfully yours, “R. A. MILAM.”
Reuter's Peerless Succession—The finest cabbage for general planting in the South. It stands today unrivalled as a second-early variety. The heads become solid long before they are fully grown, so that though immature, heads of satisfactory size may be cut long before it is at its best. It is a money maker for the trucker and a delight for the amateur. The heads are of medium size, very firm and solid, averaging 10 to 12 inches in diameter, but are frequently larger. Average weight 12 to 15 pounds, although our growers have produced cabbage from our seed to weigh 25 pounds. My strain is remarkable for its purity, true to type and uniformity. Grown only from selected stock. Prices: Pkt., 5¢; oz., 30¢; ¼ lb., $1.00; lb., $3.50; 5 lbs., or more at $3.25 per pound, postpaid.

Stein's Early Flat Dutch—A celebrated variety that has an unparalleled record for genuine merit. Many of the best gardeners in the vicinity of New Orleans swear by Reuter's strain of STEIN'S EARLY FLAT DUTCH CABBAGE. It has gained a reputation equalled by none. The plants are short-stemmed, compact, and upright with comparatively few and short leaves. The heads are large for size of plant, are nearly round and somewhat flattened, close, firm and very solid. This variety is extensively planted for shipping and home market purposes. Prices: Pkt., 5¢; oz., 30¢; ¼ lb., $1.00; lb., $3.50; 5 lbs., or more at $3.25 per pound, postpaid.

Reuter's Monster Surehead—A dark blue-green head medium sized cabbage that has captured the approval of every big commercial truck farmer in our vicinity and Southwest Texas. It is destined to be one of the greatest of all dependable flat head cabbages to plant for shipping purposes. The plants are short-stemmed, compact, and upright with comparatively few and short leaves. The heads are large for size of plant, are nearly round and somewhat flattened, close, firm and very solid. This variety is extensively planted for shipping and home market purposes. Prices: Pkt., 5¢; oz., 30¢; ¼ lb., $1.00; lb., $3.50; 5 lbs., or more at $3.25 per pound, postpaid.

Reuter's Texas Volga—True Stock—This is a profitable variety to plant in the South during January and February and in August and September. It is perfectly adapted to Southwestern Texas where I sell many hundreds pounds every season. It is a quick grower, matured plants are an attractive uniform dark green color. It makes a deep, very heavy head, remarkably solid and white. Grows close to the ground and produces heads that are exceptionally uniform in size, shape and maturity. Prices: Pkt., 5¢; oz., 30¢; ¼ lb., $1.00; lb., $3.50; 5 lbs., or more at $3.25 per pound, postpaid.

American Savoy—Standard sort; leaves curled, tender and sweet. Prices: Pkt., 10¢; oz., 40¢; ¼ lb., $1.35; lb., $4.55, postpaid.

Mammoth Red Rock—The largest and surest heading red cabbage. Prices: Pkt., 10¢; oz., 40¢; ¼ lb., $1.35; lb., $4.55, postpaid.

Reuter's Cabbage Seed in Texas—"My ¾ acres of cabbage yielded 84½ tons which sold for $5,374.00 F. O. B. here. My ½ acres has always been recommended, close, firm and the flat Dutch Cabbage and you may use this statement any way you wish."

(Signed)

"Your Friend,

J. C. WILSON."
REUTER’S CAULIFLOWER SEED

Culture—Does best in well-worked fertile soils, well supplied with humus. Sow the seed in beds at the same time as cabbage. When setting in the field they should be planted 2 to 2½ feet apart each way. During the first, dry weather, this will be essential to the development of large, robust plants. Frequent and thorough cultivation is another very essential factor. The seedlings are formed and hard, they should be blanched by drawing the leaves over them and tying with raffia or soft rags.

Peerless Snowball—One of the earliest maturing strains of this variety, in cultivation. The plants are compact, with few short outside leaves and are well suited for close planting. The heads are of medium to large size, solid, compact, round, very white. The largest Cauliflower growers in the South depend upon this stock for their own supply. Prices: Pkt., 25c; ½ oz., 50c; oz., $1.00; lb., $6.25, postpaid.

Large Algiers—Lower Coast or Gulf section of the South. It will head when others fail. The plant is large, but of upright growth, the leaves having a perfect heading effect, a great improvement on the usual flat-headed kind. The price has been reduced to a much lower amount than usual. Prices: Pkt., 10c; oz., 25c; ¼ lb., $2.00; lb., $7.00, postpaid.

REUTER’S SELECTED CARROT SEED

Culture—This is usually a profitable winter vegetable crop. The seed should be sown in rows about two feet apart. The plants are six inches apart in the row. Always sow in rich and well-fertilized soil. Firm the soil over the seed. One ounce of seed will plant 100–125 feet. Three to four pounds to the acre. Requires 80 to 110 days to mature the crop. Thinning is practiced in order to secure uniform roots.

Danvers Half Long—In color and size, an excellent variety for the home garden. Well adapted to the home gardener. Prices: Pkt., 5c; oz., 10c; ¼ lb., 20c; lb., $1.00; 5 lb., $4.50, postpaid.

Early Chantenay—Best early variety for bunching purposes. A very strong-rooted sort, growing not more than 6 inches long, very uniform and smooth, and of the finest quality. The flesh is crisp and tender. Prices: Pkt., 5c; oz., 10c; ¼ lb., 20c; lb., $1.00; 5 lb., $4.50, postpaid.

WELL PLEASED—"I have received all of the garden and field seed, and I am please with the work. We have planted some of the seed and they have come up nicely. Everything I ordered, and I thank you very much for your prompt shipment." C. E. Smith, De Berry, Texas.

Red St. Valery—The roots are very deep orange, long and comparatively thick, often 12 inches in length and 3 inches in diameter at the crown. tapering regularly to a point. A splendid potted plant for sale. Prices: Pkt., 5c; oz., 10c; ¼ lb., 20c; lb., $1.00. 5 lb., $4.50, postpaid.

Oxheart—A very short, thick carrot, often attaining a diameter of five to six inches, terminating abruptly in a small tap-root. Largely cultivated in Florida for commercial bunching purposes during the winter months.

Long Orange—Roots long and of deep color. Fine for table or stock. Prices: Pkt., 5c; oz., 10c; ¼ lb., 20c; lb., $1.00; 5 lb., $4.50, postpaid.

Large White Belgian—White carrots. Prices: Pkt., 5c; oz., 10c; ¼ lb., 20c; lb., $1.00; 5 lb., $4.50, postpaid.

CELERIAC—CULTURE—This is a difficult crop to produce in most gardens. Sow the seed in large beds during May, June, and July; some gardeners also sow in September, others in December, January and February. Requires one-fourth ounce of seed per 100 foot row, or about one-half pound per acre. Requires three to four months to mature the crop.

Golden Self-Blanching—The easiest and quickest variety to grow. Nearly leafless, short-stocked, tender, brittle, and of excellent flavor. We secure our stock from Vilmorin, the seed grower in France. Prices: Pkt., 10c; oz., 25c; ¼ lb., 50c; lb., $1.00; 5 lb., $4.50, postpaid.

White Plume—A handsome, very early variety; leaves are light green at the base, shading nearly white at the tips. As plants mature, the inner stems and leaves turn white. Prices: Pkt., 5c; oz., 40c; ¼ lb., $1.00; lb., $4.00, postpaid.

Giant Pascal—Roots of uniform size, very large, very solid, and very thick, almost as brittle as glass. Vigorous grower. Prices: Pkt., 5c; oz., 30c; ¼ lb., $1.00; lb., $5.00, postpaid.

Celeriac—Turnip Rooted Celery. The roots are the edible portion, excellent for salads and stews. They are also cooked and sliced as a salad. Prices: Pkt., 5c; oz., 50c; ¼ lb., $1.00; lb., $8.00, postpaid.

KOHLRAUSCH—Turnip Grown Kohlrabi. The roots are the edible portion, excellent for salads and stews. They are also cooked and sliced as a salad. Prices: Pkt., 5c; oz., 35c; ¼ lb., $1.00; lb., $8.00, postpaid.

Early White Vienna—This is the best variety, being extremely early, with nice tops. My seed comes to me direct from France. Prices: Pkt., 5c; oz., 25c; ¼ lb., 50c; lb., $1.00, postpaid.

WITLOOF—(Chicory) or French Endive—This seed should be sown in the open ground during August, September and October, in drills twelve to eighteen inches apart, thinning out the plants so that they are not closer than three inches. The plant forms long panicle-flowering heads, and these should be lifted in the fall, cutting off the leaves and then store in soil in a cool place. Blanched heads should be planted in a trench sixteen to eighteen inches deep and placed upright about one and a half to two inches apart, which will allow the neck of the root to come within these inches of the level of the trench. The trench should be filled with a light soil, and if a quicker growth is desired, this can be accomplished by a mulch of fresh manure about two feet deep. Prices: Pkt., 10c; oz., 40c; ¼ lb., $1.50.

CHERVIL—A hardy annual with aromatic leaves somewhat resembling parsley. The young leaves are used in soups and for flavoring and garnishing meats and vegetables. Sow in early spring in rich, well-prepared soil. Sow is slow to germinate, sometimes remaining in the earth four or five weeks before the plants appear. When the plants are about two inches high, transplant to thin to about one foot apart. They are ready for use in six to ten weeks from sowing. Prices: Postpaid, pkt., 10c; oz., 30c; ¼ lb., 60c; lb., $2.75.
REUTER'S SWEET and ROASTING EAR CORN

Culture—The Sweet Corn crop is more largely grown for local markets than for shipment, but with the large and uniform, well-filled ears, with large, pure white grains. A very fine seed is grown especially for us, in the New Orleans market and is superior to the ordinary commercial grade sold by many seedsmen. Planted largely for market by local gardeners.

Prices, postpaid: Pkt., 10c; pound, 25c; 2 lbs., 40c. Not prepaid, by express or freight, peck (14 lbs.), $1.50; bushel (56 lbs.), $5.50.

Champion White Pearl (Field)—A very white and uniform variety, producing large, large, and large, well-filled ears, with large, pure white grains. A very fine seed is grown especially for us, in the New Orleans market and is superior to the ordinary commercial grade sold by many seedsmen. Planted largely for market by local gardeners.

Prices, postpaid: Pkt., 10c; pound, 25c; 2 lbs., 40c. Not prepaid, by express or freight, peck (14 lbs.), $1.50; bushel (56 lbs.), $5.50.

Other Roasting Ear Varieties—The market gardeners in the vicinity of New Orleans grow thousands of acres of green corn each year for local consumption and shipment to the big Northern markets. No “Sugar” varieties are planted at all; nothing but “Sweet” corn is planted. The following varieties have been most generally cultivated for this purpose: Silver Nine and Mexican June, the last-mentioned sort for planting during May, June and July only. Extended descriptions of these varieties can be found on pages 41-43.

White Rice Popcorn—Pop Corn should be in every garden, especially if there are children to enjoy it during the long WINTER evenings which bring, youn yop people together for social enjoyment. Pop Corn is a money-making crop. It brings higher prices than any other corn and usually a ready market is easily found for any quantity, while in the event of an inactive market it can always be fed and a farmer cannot raise better feed. Prices, postpaid: Pkt., 10c; pound, 16c; 2 lbs., 30c. Not prepaid, by express or freight, peck (14 lbs.), $1.50; bushel (56 lbs.), $5.50.

Popcorn—Golden Queen—One of the best and most prolific varieties grown. It pops perfectly white, and a single kernel will expand to a diameter of nearly one inch. It is the standard yellow pop corn for the South. Prices, postpaid: Pkt., 10c; pound, 16c; 2 lbs., 30c. Not prepaid, by express or freight, peck (14 lbs.), $1.50; bushel (56 lbs.), $5.50.
Reuter's Selected Cucumber Seed

Culture—Plant in hills four to six feet apart each way. The hills should be made rich with a handful of well-decomposed manure. Plant 8 to 10 seeds in each hill, covering them about half an inch deep. When the plants are well up, thin out to four of the strongest and set all the very young in the open ground as early as February, and sometimes sooner, protecting them from cold by small boxes with a pane of glass in top and bottom and put back in the evening. Cucumbers are often started in hotbeds, styled here as "dirt bands," and planted out of doors as soon as they are hardy enough to resist the cold.

Reuter's Extra Dark Evergreen White Spine—Illustrated in selected on page 2 of this catalog. Prices: Pkt., 5c; oz., 15c; 1/2 lb., $1.35; 5 lbs., $5.35, postpaid.

Early Fortune—This is a splendid selection of White Spine, popular among many pickers in the South, for its excellent flavor, handsome shape, medium size, dark glossy green color and prolificness. In color it is an attractive dark green, similar to "forty other" and also bears very large fruits. Being finely grained, its white flesh is exceedingly crisp and brittle, making it an excellent slicing sort.

Prices: Pkt., 5c; oz., 15c; 1/2 lb., $1.35; 5 lbs., $5.00, postpaid.

Improved Long Green—The finest variety of long green, and the most popular of all cucumbers. The fruit is very long, often 12 to 16 inches, slender and of uniform dark green color, furnishing some fruits early, but matures the bulk of its crop late.

Prices: Pkt., 10c; oz., 25c; 1/4 lb., 75c, postpaid. (Seed scarce.)

New Orleans Market—For forcing or open ground this sort is superior to all others. Average length is eight to ten inches.

Dear color green, which is retained much longer and less affected by the sun than other varieties. It is very uniform in shape, and is very popular for pickling purposes.

Prices: Pkt., 5c; oz., 15c; 1/2 lb., 40c; lb., $1.50; 5 lbs., $5.35, postpaid.

Henderson's Perfect White Spine—This is a grand sort. It is quite early, uniformly prolific, and bears uniformly long, symmetrical, deep green-colored fruits, faintly marked with a slight yellowish shading toward the blossom end. It is attractive in color and of unequalled quality. Prices: Pkt., 5c; oz., 15c; 1/2 lb., 40c; lb., $1.50, postpaid.

Davis Perfect—Vines very vigorous and productive. The fruits are uniformly dark green color, furnishing some fruits early, but matures the bulk of its crop late.

Prices: Pkt., 10c; oz., 25c; 1/4 lb., 75c, postpaid. (Seed scarce.)

Ever-Bearing Cucumber—Enormously productive and a general favorite. Prices: Pkt., 5c; oz., 25c; 1/4 lb., 75c, postpaid.

Reuter's Perfect Davis Perfect—Unquestionably the finest re-selected stock of the well-known Davis Cucumber in existence. Perfect specimens only are retained for seed purposes, eliminating all "off-types" and the "neck" has been bred out so that every fruit is shapely and holds its fine cylindrical shape throughout the growing season. It is suitable for cool greenhouse, warm season hotbeds, and for very early, and is absolutely unspecial. We sell hundreds of pounds of this superlative variety in Florida, Texas, Louisiana, and other Southern States for first spring planting, and it has always proved trustworthy.

Prices: Pkt., 10c; oz., 25c; 1/4 lb., 75c, postpaid, or more at $1.00 per pound, postpaid.

Reuter's Earliest of A Cucumber—This cucumber has proved to be the biggest money maker ever planted by the Florida growers. I sell several thousand pounds in that State alone every year. Minnie, my wife, used to go every year to Wrench's Place, in the year of the last season, and liked them best of any I planted. I picked them in 65 days with lots of bad weather. Farmers want to grow this variety. Prices: Pkt., 5c; oz., 15c; 1/2 lb., 40c; lb., $1.50, postpaid.

Japanese Climbing—The vines attain twice the length of common varieties. Can be grown on fences or the growing on wires. Prices: Pkt., 10c; oz., 25c; 1/4 lb., 75c, postpaid. (Seed scarce.)

EGGPLANTS—Culture. The seed should be sown in hot beds in early January and February or late in December and during March and April in open fields. The soil in hot beds should be warm and moist, for they should be a temperature of from 65 to 70 for perfect growth. The young plants are used extensively in the South for early crops. In colder climates the weather has become settled and the ground quite warm, they should be taken out of the beds early in the morning and set in hills 2 1/2 feet. Cultivate often, keeping them free from grass and weeds.

New Orleans Market—Illustrated in color and described on page 2 of this catalog. Prices: Pkt., 10c; oz., 25c; 1/4 lb., 1.50.

New York Purple—Fruits are large, fine and free from thorns. You'll find fully 90 per cent of the plants thornless. Plants are strong, vigorous growers, producing five to eight large fruits of dark, rich, purple color, early. There is no better strain of this important variety than the stock I offer you. Prices: Pkt., 10c; oz., 25c; 1/4 lb., 1.50; lb., $6.00, postpaid.

Black Beauty—A splendid eggplant that is earlier than any other sort. It is very desirable in color, being a jet black. Shape similar to the Black Beauty, but of a dark green color, retaining its shape from stem to blossom. The skin is green on the vine, and after picking it never turns yellow. It is a very hardy, robust, prolific grower, and is very resistant to disease. Prices: Pkt., 5c; oz., 15c; 1/2 lb., 40c, postpaid.

Florida High Bush—A grand sort for all climates and for garden use. The "eggs" are borne higher off the ground than other varieties. The plants bear a prolific and continuously throughout the season. Prices: Pkt., 5c; oz., 15c; 1/2 lb., 40c; lb., $1.50, postpaid.

Eggplant Plants—A complete list of varieties and prices will be found on page 30.

ENDIVE—One of the best salads for fall and winter. One of the biggest winter vegetable crops in this section GREEN CURLED—A hardy, vigorous-growing variety, with bright green leaves. Prices: Pkt., 5c; oz., 25c; 1/4 lb., 40c; lb., $1.25, postpaid.

KALE OR BORECILE—A member of the cabbage family, known as Green curly, or Kale. It's more hardy than cabbage and much superior in eating qualities than collards. Sow 1 oz. of seed for 100 feet of row; 3 to 4 lbs. per acre.

KALE OR BORECILE—A member of the cabbage family, known as Green curly, or Kale. It's more hardy than cabbage and much superior in eating qualities than collards. Sow 1 oz. of seed for 100 feet of row; 3 to 4 lbs. per acre.

SWEDISH GREEN—A finely cut, spreading, low-growing variety, very hardy, and the favorite sort sown in the South for winter greens.

Prices: Pkt., 5c; oz., 25c; 1/4 lb., 40c; lb., $2.50, postpaid.
Best Lettuce Seed for the South

Lettuce is by far the most important MONEY CROP in the South. The main essential for the production of a good crop of lettuce is good seed. My seed is tested not once, but three times, under the most rigid system known. I offer you strains that I know positively will do well in the South under the right kind of cultivation.

Culture—The best soil is a rich, sandy loam. The soil should be prepared thoroughly. During the spring lettuce can be sown as late as March 15th in our section with good results. The best time to sow is during the fall months. Sow very thinly in rows 18 inches apart, covering the seed 1/4 inch deep in fine soil, and when well up thin to 12 inches apart in the rows. Thorough cultivation is necessary. One ounce of seed sows 10 square feet, plants 120 feet of row and produces 8,000 plants.

Reuter's Peerless Big Boston—My strain of this famous variety has won the favor of thousands of the most discriminating growers throughout the South. Every year I check up the orders on this stock, and the very same growers purchase from me year after year—truly a tribute to the wonderful quality of my seeds. This is the best-heading variety in cultivation, and so well known that an extended description is unnecessary. It is a splendid shipper, hardy and thoroughly reliable. The heads are large and solid. My stock is sure to head. The superiority of Reuter's Big Boston Lettuce Seed is known everywhere in the South. Its purity, hardness of head and slowness to go to seed are features that cannot escape notice from the man who puts in a few acres of this money crop for a living. My California-grown lettuce seed beats anything on the market. These crops are annually inspected by myself or one of my sons. I challenge the seed trade to furnish anyone with a better strain of Big Boston than the stock I am offering you in this catalogue.

Prices: Pkt., 5c; oz., 10c; 1/2 lb., 35c; lb., $1.25; 10 lbs., $10.00, postpaid.

Reuter's Iceberg Lettuce—A beautiful lettuce. Undoubtedly the finest all-season lettuce. Can be marketed or supplied to the home table when no other variety is available. Every garden, large or small, should plant this splendid sort. Has an unusually solid head. The white main ribs of the leaves curve toward the center which keeps the interior thoroughly bleached. It is crisp, has a delicious nutty flavor. My seed is grown from selected stock and every plant that would not head was cut out and not allowed to go to seed. I have sold many pounds of this lettuce seed in Texas, where it is a favorite in many sections. Heads of conical shape and medium size. Outer leaves light green, growing closely up around the head.

New York or Wonderful Lettuce—A grand head lettuce, excellent for winter, spring, or summer cropping. Plants are rich green, growing more than 15 inches in diameter. Sells at sight in the larger markets because of its crispness and excellent flavor. In the Southern States it should be planted from September 1 to February 1. Prices: Pkt., 5c; oz., 10c; 1/2 lb., 35c; lb., $1.50; 5 lbs., $8.00, postpaid.

Mammoth Big Boston—Without question, THE KING OF ALL LETTUCES, and tremendously grown for market, for home use, and for shipping trade. It never fails to please everyone, the amateur as well as the biggest market grower. Anyone desiring a lettuce of the Big Boston type, which is slightly larger in its growth, but otherwise having the same general characteristics, could do no better than plant REUTER'S MAMMOTH BIG BOSTON. REUTER'S MAMMOTH BIG BOSTON will mature earlier than my regular strain of Big Boston and has very much the same appearance except for the size of the head. Nearly every grain of this seed will produce a perfect head of extra large size—take my word for it. The seed is extremely scarce, so I urge you to mail your order immediately upon receipt of this catalogue.

Prices: Pkt., 5c; oz., 10c; 1/2 lb., 35c; lb., $1.50; 10 lbs., $10.00, postpaid.

Reuter's Drumhead Cabbage Lettuce—A very early sort not adapted to shipping, but belongs to the crisp-leaved varieties. Splendid for home gardens and nearby markets. It is always large, with outer leaves a clear, light green color. Inside of the head being almost pure white. Especially good for fall and winter planting. Some of the New Orleans gardeners plant this sort during the late spring months for local summer trade.

Prices: Pkt., 5c; oz., 10c; 1/2 lb., 35c; lb., $1.00.

ROMAINE COS or CELERY LETTUCE

Reuter's Paris White Cos—The most popular of Cos varieties, and is really the only Cos sort planted to any extent in this section. Forms large upright heads, eight to twelve inches in height, and of the finest quality. Prices: Pkt., 5c; oz., 10c; 1/2 lb., 35c; lb., $1.25; 5 lbs., $5.25, postpaid.
**Making Cantaloupes Pay—** Any person familiar with marketing produce will agree that any fruit or vegetable of desirable variety, well grown, carefully harvested, properly graded, packed and shipped, is more than half the battle. It is a fact that markets are rarely glutted with fruits or vegetables of first-class quality and appearance. Growers of cantaloupes will wisely use every precaution in producing and marketing these melons so that maximum profits may result. This is particularly true for melons grown for home use. The Bureau of Markets of the U.S. Department of Agriculture gives this advice to all cantaloupe growers: "It behooves each planter to secure seed which will produce in the first section of melons of the very best eating and shipping qualities and then give the crop the best of care until it reaches maturity."

One of the first matters that growers must attend to after the crop has been planted is the prevention of damage by insect pests. Probably the greatest of these melon crop destroyers is the aphid, known also as "plant lice" and "honey dew," and in Florida as "Kissimmee fly." These small sucking insects pierce the different parts of the plants, usually the under side of the leaves, and cause them to curl. If not killed outright the plants are so weakened that the melons are smaller, the quality inferior and the crop shorter. Aphids are best prevented by killing the lice with Pyrox, Fpyro. "Black Leaf 46," and other insecticides are fully described and priced on page 6.

**Burrell’s Gem—** A pink-meated Rockford that is a great commercial variety; an abundant yielder, often producing 15 to 25 melons to the hill. The meat is a rich golden color, very thick and fine grained. This variety is an excellent one and has a marked stimulating effect on the leaves. Pyro, "Black Leaf 46," and other insecticides are fully described and priced on page 69.

**Pollock No. 25—** or Salmon Flesh Eden Gem. A salmon tinted, rust-resistant cantaloupe that has become popular on the markets in account of its superior qualities. (Aramark) A remarkable variety has been developed from a single cantaloupe, and systematic seed selection has accomplished this result. What we term in variety was the very exceptional uniformity of the size and netting, a combination of its attractive color and fine-grained, firm flesh, which has been produced in all plants in the field. It is oval in shape, has the Rockford Ford, with a solid white netting. The average yield is over 250 cantaloupe A-20 No., shipping melons, fully a third more than any other sort. The top photographs of this melon shows a beautiful, perfect, luscious seedling variety and one of the best rust-resistant melons ever produced. It is a remarkable producer and is of a most lucrative market variety. A combination of uniformity in size, form and heavy netting, a thick, firm flesh and firm texture, high coloring, salmon tinted flesh, and rich, sweet, and spicy flavor gives it a highly satisfactory the customer, which is the ultimate test of success in market cantaloupe. Prices: Pkt., 5¢; oz., 25¢; ½ lb., 50¢; lb., $1.00; 5 lbs., $7.50, postpaid.

**Reuter’s Eden Gem—** Green Flesh. Illustrated in color and described on page 3 of this catalog. Prices: Pkt., 5¢; oz., 20¢; ¼ lb., 50¢; lb., $1.00; 5 lbs., $7.25, postpaid.

**When to Pick Cantaloupes—** This is a very important matter when raising melons. It is an easy matter to pick for home use, you can do just as you would if you were eating them yourself. For shipping, however, each grower will have to determine the proper time. For fancy fruit, leave on the vines as long as possible. They must be in the green state, yet beginning to ripen. If cracks between stem and melon are appearing time to pick. If the weather has been wet cut the stems, as pulling may bring some flesh with the stem.
Rockyford (Superb Gold-Lined) -
An extremely popular variety of cantaloupe adapted to all sections of the South for both market and home use. For several years we have delighted thousands of customers with our superior selection of this superb muskmelon, and today it has no superior in the South for quality, productivity and earliness. This is the highest development yet attained in the Rockyford Cantaloupe, both in setting and rust resistant qualities. The melons appear as shown in the cut, solid net, the heavy gray netting being closely laced and interlaced over the entire surface of the melon from the stem to the well-developed blossom button. The meat is light green and very deep; its flavor is not excelled by any of the green melons and none of them are better if as good, shippers. It is highly rust resistant. Under conditions when other varieties rust, this sort shows no tendency to do so, and will ripen melons of the finest quality. It yields a heavy crop, continuing long in bearing, and cannot fail to please. My seed is grown expressly for me by the foremost grower in Colorado. It is carefully selected and none but the finest standard, solid netted melons are cut in this lot of seed. A large portion of the cantaloupe seed sold in the South is procured from the shipping crop in Colorado and the tall-end crop in the South. This "cull" seed is absolutely worthless for planting purposes, and it is offered to us every year at 10c to 25c per pound, and is eagerly sought after by many seed stores in the South at a lower price. If you want to plant "cull" seed, don't send us your order. I'd rather not have it, for all my cantaloupe seed is reselected and the finest quality procurable. I offer you the finest seed, selected from ideal types.
Prices: Pkt. 5c; oz. 15c; 1/4 lb. 30c; 1 lb. $1.20; 20 lbs. $20.00, postpaid or prepaid.

New Orleans Market — our market gardeners. It is roughly netted and of luscious flavor; different altogether from the
Northern Netted Citron melons. It is undoubtedly the finest large, well-netted muskmelon on the market today and will easily sell anywhere for 10c to 25c a piece, a fraction how plentiful small melons may be. My seed is grown exclusively for me by a most reliable New Orleans market gardener, and I have no hesitancy when saying that there is not a better grade of seed than the stock I offer you obtainable at any price.
Prices: Pkt. 5c; oz. 15c; 1/4 lb. 40c; 1 lb. $1.50, postpaid.

Texas Cannon Ball — A very popular melon in Texas. It is not a large melon, but it is a good shupper and I don't advise you to plant it for this purpose. Round, medium in size, heavily netted. Flesh is green, very solid, melting and of a delicious flavor. It will do all right for the house use or to bring to the local market. Adaptable to a wide range of soils and climatic conditions.
Prices: Pkt. 5c; oz. 15c; 1/4 lb. 40c, postpaid. (Seed scarce.)

CASABA MELONS Extra Fancy Muskmelon for Winter Use

What They Are — The Casaba Melons listed on this page are unquestionably the finest selected varieties of Winter Muskmelons in existence today. The Casaba thrives best in a sandy soil, rich with humus, and medium sandy loam. Cultivate the same as Muskmelons. Plant according to your locality, from February 15th until July 15th; for late shipping, June 1st to July 15th. Casabas may be taken from the vines as soon as they lose their green luster, but should not be eaten until the hard rind gives way under pressure — when slightly soft. The best way to keep Casabas late in the fall is to gather them together on the hill and cover them completely with the vines, but do not pick them off the vines. No melon in the world can excel Casabas in deliciousness when properly ripened; they are spaced with a nameless flavor which charms all, being rich, sugary sweet and melting.

Honey Dew — the entire country. It is perfectly adapted to the South, and beautiful Honey Dees are being grown in Louisiana. The average size of the melon is six inches in diameter and seven to eight inches in length. The flesh is an emerald green, very thick, melting and fine grained; can be eaten to the extreme rind. The seed cavity is very small, the rind impermeable to water. The melon does not shrink in shipping, is not easily bruised, and is a splendid shipper. It matures about ten days later than the Rocky Ford strain and is very prolific. Yields at the rate of 10 to 10000 melons per acre. It is medium in size, five to six pounds. The vines turn up to the third leaf, and they can be eaten or marketed from time to time until late in the season. The color is a beautiful golden yellow, even before it ripens. Its flavor commands a ready sale. Pick when bright yellow, and put away until slightly soft.
Prices: Pkt. 10c; oz. 15c; 1/4 lb. 75c; 1 lb. $2.75, postpaid.

Casaba Melon Collection
4 PACKETS (ONE EACH OF THESE NEW CASABA OR WINTER MUSKMELONS) 30c POSTPAID.
Plain Truth—Every pound of my watermelon seed is grown expressly for me under special contract for seed purposes exclusively. Not a single melon is shipped from the fields under any circumstances. All under-sized poorly shaped melons are fed to the hogs. Only the sweet, choicest, and most perfectly developed watermelons are left to remain in the field for my seed. Of course, lots of Northern and Southern seedmen claim to handle Southern-grown melon seed, but there are all kinds of melon seed grown in the South, and quite a bit of it is as bad as the seed that is imported from the North. Each and every one of my different varieties of watermelons are grown by experts in fields absolutely remote from any other sort. No one single grower attempts to grow for me two or three varieties. I contract with each grower for the seed of a particular variety, and know positively that the stocks I am offering you are absolutely unexcelled today.

Cultivate—Our growers plant in hills, and the distance apart varies somewhat. On very rich soil, 12 feet apart each way is not too close. One hill to 6 feet apart on poor soil is the usual distance. The time for planting in Louisiana is usually during March; in Florida during the month of February; Lower Florida during January; and most parts of Texas during March. A second-early melon may be planted 5 feet apart each way. The time for planting in Louisiana is usually during March; in Florida during the month of February; Lower Florida during January; and most parts of Texas during March. The whole winter and spring is a period during which melons may be planted.

Black Seeded Angeleno—Four consecutive years of careful hybridizing and selecting produced this top-notch variety. It’s a big producer, excellent shipper, oval shaped and fine color; medium size to large; pick only when grown large enough. This is the choice of Southern growers, and stock from the most reliable breeder and grower of melons in California. I strongly recommend this melon for home use and close-in markets.

Ice Cream—(White Seeded)—A great kitchen gardener and home-market watermelon. Few varieties surpass this sort for quality and productiveness. Our stock is the original type, very carefully selected and unsurpassed in every respect. The fruit is oval in shape, skin bright green, finely reticulated. The rind is thin, flesh scarlet, solid, crisp and delicious. Prices: Pkt., $0.50; oz., 10c; 1 lb., 50c; 10 lbs., $5.00; 50 lbs., $15.00, postpaid.

Alabama Sweet—This melon is so large that it may be planted 8 feet apart. It is the acme of perfection, and a better strain of the celebrated Rattlesnake Watermelon cannot be produced. If you have been buying seed of the Rattlesnake variety from other seedsmen in the North and South, you don’t know how good the Rattlesnake Melon can be. Every seed is a result of melons weighing 55 pounds, and 60 to 80-pound Rattlesnake Melons are nothing unusual in my seed crops. You simply cannot fail when you plant this particular strain. This melon surpasses all others as a second-early sort, and is a splendid shipper. In quality and flavor this melon is unexcelled. Has a thin, but tough, rind, making it a splendid shipper. Please remember it is a seedling Melon, and should be grown like the best of melons.

Reuter’s Genuine Rattlesnake Watermelon

This is the melon that has made Georgia famous as a melon-producing section. In no place in the world are finer, sweeter and bigger Rattlesnake Watermelons grown than in Georgia, and I procure my seed from the best grower of melon seed in Georgia, and no man living can contradict this fact. No one has such pure and choice seed as this famous variety. It is the acme of perfection, and a better strain of the celebrated Rattlesnake Watermelon cannot be produced. If you have been buying seed of the Rattlesnake variety from other seedsmen in the North and South, you don’t know how good the Rattlesnake Melon can be. Every seed I offer is a result of melons weighing 55 pounds, and 60 to 80-pound Rattlesnake Melons are nothing unusual in my seed crops. You simply cannot fail when you plant this particular strain. This melon surpasses all others as a second-early sort, and is a splendid shipper. In quality and flavor this melon is unexcelled. Has a thin, but tough, rind, making it a splendid shipper. Please remember it is a seedling Melon, and should be grown like the best of melons.
REUTER’S NEW WONDERMELON

More Than 50,000 Southern Farmers Declare That It is The Greatest Home and Near-By Market Watermelon Ever Introduced

Read What My Customers Think of the New Wondermelon

"And I raised 40,000 of these melons I could have sold all of them on special orders."

"Reuter’s Big Wondermelon is the sweetest and best watermelon in the world."

"They sell like hot cakes."

"I advise everybody to plant seeds of this variety if they wish to have the sweetest and best watermelons."

"From two ounces I bought I cleared the sum of $175.85. I sold some of these melons as high as $1.50."

"I plant watermelons for market—have planted many different kinds, but this is the best I ever planted. I have men to say ‘bring me another Wondermelon regardless of cost.’"

"A more delicious, better flavored melon never grew. It’s ability to withstand dry weather is very desirable."

"I purchased the Wondermelon seed for me—one ounce. It planted 84 hills, and I raised 400 melons on the patch, weighing from 20 to 45 pounds."

"These melons were given no special care, and proved to be far superior to the Tom Watsons which were planted by the side of them and received the same care. The row of Reuter’s New Wondermelons made more large melons and bore later and stayed green after the Tom Watsons were all through."

"Quality is the very best. Our experience of 40 years growing melons compels us to say it is the best melon we ever grew."

"I have grown many varieties, but have never seen any compare with the Wondermelon. It is unnecessary to say any more, because it can talk for itself."

"I have tried all kinds of watermelons, but your Wondermelon is the best of all, and I will not plant any but the Chris. Reuter Wondermelon from hence on."

Two years ago in announcing the initial distribution to the public of my New Wondermelon, I printed the following description in my Spring 1918 Catalogue:

"There is no melon on earth that is superior to it in quality, in the ratio of those who produced it juicy red color and the fine outward appearance of the melon itself. This melon in form is large and long, somewhat resembling the Watson, only thicker, and the color is a dark, solid green. It cuts big red heart, solid, and never shows any hollow. Seed is large and pure white, with but few in melon. Extremely prolific and stood up in very bad seasons better than many others."

I haven’t a single word to take back on that description! At the time I wrote it I didn’t think that I could ever add a word to it, but the thousands of customers who planted and produced the New Wondermelon in 1918 and 1919 have pointed out to me many exclusive characteristics of this new introduction that I didn’t know existed. These letters of praise and confirmation have come to me by the hundreds from every state in the South. Read a few excerpts from some of these letters printed on this page. These expressions are not picked ones, but were taken at random from my files, just as they happened to come. I can only spare the space for a very few—there are thousands as good, or better—that I cannot possibly print, or I would not have room to describe the other things that you will want to read about before ordering your seed for your spring garden. The New Wondermelon has been thoroughly tested out from all standpoints except for shipping long distances. I am inclined to believe that it will not prove up as a long shipper, though it may surprise me in this. However, there is no longer any question about it being the BEST watermelon for home and nearby markets that has ever been introduced, and I know that I cannot be successfully contradicted on this statement. More than 50,000 persons have planted this melon in a single season, and I have yet to learn of a dissatisfied customer. I have a limited quantity of the seed this year and hope to be able to fill all orders received, but it is very doubtful if the stock will hold out, judging from the advance orders for both large and small quantities that I have already booked for January and February delivery. If you didn’t plant the Wondermelon last year, I urge you to do so this season, for I know it will please you as no other watermelon ever has. If you are one of those who produced it in 1918 or 1919, I don’t need to urge you—the Wondermelon will be the first item put down on your order to me. Turn to the order blank in the front of this catalogue right now and make certain that you will have the Wondermelon.

Prices, postpaid: Packet, 10c; ounce, 20c; ½ pound, 50c; lb., $1.75; 5 pounds or more at $1.50 per pound.
Plant Watermelon for Home or Market

Famous Excel Watermelon—This splendid variety has won for itself a place among all melon growers, either for shipping purposes or home gardeners. It is a hybrid between the Tom Watson and the Blue Gem. It is a long, bluish-green watermelon, with dark green stripes: the flesh is of superb quality, and intense red to the rind. The rind is thicker than the Watson, but is also a grand commercial variety. In size it has the Watson somewhat bested, for it grows bigger and longer all around, and often produces melons one and a half pounds each. It is one of the sweetest-flavored shipping melons ever introduced. It has been grown for the past few years rather extensively in Florida, Georgia and other melon sections for shipping to Northern and other markets, and the commission merchants of Chicago, New York, Cincinnati, Philadelphia, etc., say that it will outsell any variety on the market time and again. It is surely a grand variety and deserving of your order. It is a great yielder and requires less fertilizer to the acre to grow a good crop than any other melon. On account of its sweetness, crispness and other well qualifications, the demand for the seed is enormous, and our stock is usually exhausted before planting season is over. Don't overlook the shipping credentials of this splendid melon—firm, solid rind, rather thick, standing rough treatment in transit. Our stock is carefully grown for us each year by the same grower. Last season we had in stock 3,000 lbs., which was not nearly sufficient to fill all our many orders. Prices: Pkt., 5c; oz., 10c; ½ lb., 30c; lb., $1.00; 5 lbs., $4.50; 10 lbs., $8.00; 20 lbs., $15.00, postpaid.

Irish Grey (New)—A distinct and valuable melon, producing more good merchantable melons under the same conditions than any stringiness. The size is uniformly large, color of rind yellowish green.

Irish Grey (New)

Yellow-Fleshed Ice Cream—This is a new melon that has become exceedingly popular throughout many sections of the South, and our trial ground reports are most favorable. In the West it is a prime favorite. The melon grows very large, of oblong shape; the flesh is a beautiful yellow and has a peculiar, delicious flavor, quite different from any other variety. You may not find the variety with the assurance of securing a melon that will please the most discriminating. For local market and home use, it has practically no equal. Prices: Pkt., 5c; oz., 10c; ½ lb., 30c; lb., $1.00; 5 lbs., $4.50, postpaid.

Florida Favorite—An unsurpassed, extra-early, good-sized, splendid quality melon—just the right kind for home use and nearby markets. It is a long, beautiful melon of dark green color, irregularly striped with lighter green; very early and a big yields. Flesh is bright-crimson and red right to the rind. Rind is fairly thick, rather tough, making it a fair shipper. The flavor is delicious and melting. During the past few years the demand for this melon has increased enormously; in fact, we have found it difficult to secure a sufficient quantity of high grade seed from our grower to meet the requirements of our customers. We believe that this year there will be enough seed to fill all orders, but it is essential that you order early, for the watermelon seed is scarce, for the crop has been short, and with a normal demand some of our customers will be disappointed, unless they order early. My superlatitve strain of this hard-to-beat melon has been admired, even by my competitors, and I offer this seed to you this year with a feeling of pride, fully conscious that very few if any, seed houses are able to satisfy their trade with a stock that carries with it even a portion of the splendid characteristics embodied in this particular strain.

Prices: Pkt., 5c; oz., 10c; ½ lb., 30c; lb., $1.00; 5 lbs., $4.50, 10 lbs., $8.00; 20 lbs., $15.00, postpaid.

Kleckley Sweet—My stock is grown by W. A. Kleckley, the originator, and is unquestionably the finest strain obtainable anywhere.

The vines are vigorous and productive; fruits of medium size to large, often weighing 50 pounds. Dark green skin, thin, very firm, flesh bright scarlet with broad, solid heart. The seeds are nearly white and close to the rind. The flesh is most crisp, sugary and melting in the highest degree, entirely free from stringiness. I can plant no other strain of this melon when you have tried my selected stock.

Prices: Pkt., 5c; oz., 10c; ½ lb., 30c; lb., $1.00; 5 lbs., $4.50; 10 lbs., $8.00; 20 lbs., $15.00, postpaid.

Florida Favorite

Halbert's Honey—Often called the sweetest of all melons. For many years I have tried the varieties with the assurance of securing a honey melon that will please the most discriminating. For local market and home use, it has practically no equal. Prices: Pkt., 5c; oz., 10c; ½ lb., 30c; lb., $1.00; 5 lbs., $4.50, postpaid.

Reuter's Famous Excel

A Wonderful Yielder Under Adverse Conditions

Halbert's Honey

Citron—This is a novelty of unusual value and one that will appeal to all our customers. The fruits are medium in size, uniformly round, and are used exclusively for preserves or pickles. The color is dark green, distinctly striped and marbled with light green, and in the white and solid, but is not at all suitable for eating raw. The fruits mature late in the fall and in this condition can be kept for a long time. Each vine produces 5 to 15 melons. They keep fresh and solid all winter, and can be used whenever wanted, and owing to their value as stock food, any surplus not used for home cooking can be fed all winter to stock. Don't plant close to watermelons, for they will cross and ruin the watermelons.

Prices: Pkt., 5c; oz., 10c; ½ lb., 30c; lb., $1.00, postpaid.
Plant Mustard, Okra, Etc.

**MUSTARD—CULTURE**—Sow as early in the spring as the ground will permit, in drills 18 inches apart, covering one-half inch deep. Water freely; keep free from grass and weeds. Pods are uniformly round, quite large, and somewhat rigid. Each pound contains 1,500 seeds and will produce a good crop. Price: $1.00 per pound.

**Peerless Southern Curled**—This is the best variety, as it resembles the fanlike leaves of the true mustard. It is moderately hardy, and requires no more than usual care. Price: $1.50 per pound.

**Chinese Mustard**—In quality and flavor it is superior to the above, and will stand longer before going to seed. Price: $2.00 per pound.

**OKRA**—(Os Guano)—I do not handle a single pound of Northern-grown okra more than 3,000 miles from where I grow it, and I believe that the South can produce better okra than any other section of the country. Louisiana is headquarters for okra. This State produces more okra than any other section of the United States, possibly excepting certain localities in the South. Okra is a highly esteemed vegetable throughout the entire country, and the entire demand is met by bigger and bigger the all year round. The okra is used mainly in soups and stews, although they are excellent when boiled and served hot or cold as a salad. Some persons may not relish the flavor of stovet at first, but after eating a few times a taste for it is naturally acquired. Plants of seed to 50 feet of row; about 8 pounds to the acre. Three-foot rows are good, planting the seed three to four inches apart to allow space for the development of the stem.

**Perkin's Mammoth Long-Podded Okra**—This is a distinct variety and is largely cultivated in the South, especially in Florida and Texas, for shipping purposes. Very productive, pods are 4 to 6 feet long, to shoot out within three or four inches from the bottom of the stalk, and the whole plant is covered with the embryos of its height. A handful or more of pods is a specialty. Pods are of an intensely dark green color of unusual size. Very firm and do not harden up as is usually the case with other long slender sorts. Price: $3.00 per pound.

**Double Curled**—This okra is of superior quality and flavor as compared to the long-podded okra. It is also of great value for gardeners' stock, and is grown to meet the requirements of the most critical truckers. Price: $2.50 per pound.

**PARSLEY**—The early fall, but makes a mighty good crop when planted early in the spring. Plant within a month apart. When plants have become strong, thin out to five or six inches apart. To assist in keeping up the yield, water the seed a few times in warm water, or sprout in damp earth and sow when it swells or bursts. One ounce to 200 feet of row; 10 pounds to the acre. Grown extensively by our growers also. This is the hardest variety of parsley. Price: $2.00 per pound.

**Double Curled Plain Leaved**—This variety is easier to grow and has a more uniform shape. Price: $1.50 per pound.

**Parsnips**—Cultivate the earliest variety. All root early and are slow to ripen. Price: $2.00 per pound.

**Sorrel**—Planted in drills a foot apart during the fall of the year and thinned out to three to four inches in the drills. It is used for various purposes in the house and also in wine and salad. Cooked like spinach. Price: $2.00 per pound.

**Roquette**—It is a fine hardy variety, and which it resists very well. Grown from February to March. Price: $1.50 per pound.

**Salsify**—Cultivate and let it grow all summer. Price: $2.00 per pound.

**Mammoth Sandwich Island**—This variety is easy distinguished by the leaves growing from the depression on top of the root. Price: $1.50 per pound.

**Improved Hollow Crown**—This variety is easily distinguished by the leaves growing from the depression on top of the root. Price: $1.50 per pound.

**London Flag**—A very hardy variety, quite popular with our market gardeners. A strong, quick grower, producing stems of uniform shape and size. Price: $2.00 per pound.

**Caretan**—A variety that is much larger than the above and more desirable for home use. Price: $2.50 per pound.

**Garlic**—Largely grown throughout Louisiana, Arkansas and Texas. Plant in rows from 12 to 20 inches apart, and the cloves pressed into the soil at intervals of 3 to 6 inches in the row, so that they will be about half covered with soil. Requires 300 pounds to sow an acre. Price: $1.25 per pound.
Reuter’s Onion Seed for the South

The South annually spends millions of dollars because its soil and climate do not grow sufficient onions to supply the demand. Ohio, Illinois, Indiana, New York, California and many other Northern and Western States export onions every year. The only advantage in planting sets is to secure early onions, for better shaped and keeping onions are obtained from planting the small black onion seed. One ounce of seed to 200 feet of drill; four pounds to the acre. One pound of sets to 200 feet of row. Onions from this seed will mature in about 120 to 150 days; from sets in from 100 to 110 days. HOW TO GROW ONIONS. In our interesting leaflet we give full instructions for producing this crop in the most economical, up to date manner, and will be glad to send it free on request.

Reuter’s Prizetaker Onion—This is the best American onion ever raised. It is successfully grown in all parts of the Central South and is very large, frequently measuring 12 to 15 inches in circumference, and fine bulbs have been raised weighing over 10 pounds each. The finest large yellow globe onion in existence. Flesh is pure white, fine-grained, and of mild, delicate flavor. The outside skin is rich yellow, which makes a very good keeping quality, and it does not keep as well as other varieties we recommend. Prices: Pkt., 10c; oz., 25c; lb., $1.25; bu., $2.50, postpaid.

Reuter’s White or Yellow Bermuda—Illustrated in color and described on Page 4 of this catalog. Prices: Pkt., 10c; oz., 25c; lb., $1.25; bu., $2.50, postpaid.

Reuter’s Crystal Wax—Illustrated in color and described on Page 4 of this catalog. Prices: Pkt., 10c; oz., 25c; lb., $1.25; bu., $2.50, postpaid.

Red Bermuda—Illustrated in color and described on Page 4 of this catalog. Prices: Pkt., 10c; oz., 25c; lb., $1.25; bu., $2.50, postpaid.

Large Red Wethersfield—A very popular onion in the Southwest. The color is deep purplish red; flesh white, moderately grated and very firm. Yields enormous, best variety for poor or dry soils. Prices: Pkt., 10c; oz., 25c; lb., $1.25; bu., $2.50, postpaid.

Yellow Globe Danvers—A very popular onion in many of the large markets of this country. A heavy cropper and good keeper. Skin reddish yellow; flesh white; comparatively mild and well flavored. Prices: Pkt., 10c; oz., 25c; lb., $1.25; bu., $2.50, postpaid.

Reuter’s Red Creole—The greatest of all red onions ever grown. This onion is one of the most important crops in Louisiana. Reasons: 1. It is the best keeper, best producer, in both yield and quality. It is a distinct variety that has been cultivated in this section for more than fifty years. This variety constitutes one of the most important crops in Louisiana, and thousands of acres of land are planted in this particular variety every fall. Does not keep well when stored early in the spring. The skin is brownish red, flesh very solid and fine grained, and rather strong flavored. Extremely productive and the best keeper and shipper of all sorts. Seed very scarce this year, due to extreme wet weather during the harvesting season.

Prices: Pkt., 10c; oz., 40c; lb., $1.50; bu., $4.00, postpaid.

ONION SETS—These are planted in home gardens for early onions, quite a few people prefer the small, tender young onions for eating raw, and there is usually a good demand for them during the season. The onion set crops are indeed short, but we will endeavor to furnish you with whatever quantity you may desire.

Red Wethersfield A very hardy onion and a good keeper. Prices, postpaid: Pound, 3 lbs., $1.00. Not prepaid, peck (8 lbs.), $1.50; bushel (32 lbs.), $4.00.

Yellow Danvers—Forms globe-shaped yellow onion. Prices, postpaid: Pound, 40c; 2 lbs., $1.25; peck, (8 lbs.), $1.50; bushel (32 lbs.), $4.00.

Silver Skin Sets—Sets of the White Portugal or Silver Skin Onion. Large white onion. Prices, postpaid: Pound, 40c; 2 lbs., $1.00. Not prepaid, peck, (8 lbs.), $1.40; bushel (32 lbs.), $4.50.

Write for Special Prices on Bulk Shipments of Onion Sets. My prices are low and quality unexcelled.

White Multipliers—These are of a pure silvery white color, enormously productive, frequently producing onions as many as 20 lbs. from a single bulb, whereas yards, inches of this quality have been produced from a single bulb for years. It is of roundish form. Color of skin is silvery white, flesh white and firm. Of mild flavor. Sow during January and February. Prices: Pkt., 10c; oz., 25c; lb., $1.25; bu., $2.50, postpaid.

Australian Brown—This has gained popularity in the South for its good keeping qualities. It is of roundish form. Color of skin is silvery white, flesh white and firm. Of mild flavor. Sow during January and February. Prices: Pkt., 10c; oz., 25c; lb., $1.25; bu., $2.50, postpaid.

Shallots—Multiplying Green Onions. One of the biggest crops of the season. Yields 18 inches in the rows. They grow large and multiply, and can be divided during the winter when the tops are dry. Sold OUT. New crop ready in July.

"Mr. Chris, Reuter: Let me compliment you on the Yellow Bermuda Onion Seed for 1919. I had a No. 1 germination, so I really think that every seed came up. (Signed) Gus Home."
Garden Seed Peas

Prepaid Prices— Peas are now sold by the pound. A pound is
5 lbs. about 2 1/2 quarts; 10 lbs., about 5 quarts; 15 lbs. equals a peck; 30 lbs. is
the equivalent of a bushel, except wrinkled varieties, which are 56 lbs. to the
bushel. On all peas listed on this and next page all quantities up to 10 lbs. are
postpaid. If larger quantities are wanted send by mail it will be necessary to remit
additional amount at Parcel Post rates. We do not put half pounds of Peas.

Culture— For spring. The extra early, round-seeded sorts, such as
Peerless, Peerless Extra Early, etc., are planted very early, as it takes a hard freeze to kill them. In our latitude
(New Orleans) we usually begin sowing early in January and continue
planting until about the middle of March. About that time it is more sug-
gestible that you plant the taller-growing sorts with wrinkled seed. These
varieties are more susceptible to cold than the early sorts and are apt to
not rot in the ground if planted too early. Two pounds of seed to every 100
feet of row and cover about one-half inch. Many growers follow the prac-
tice of planting in a double row, with a six-inch space between. The
double-row method is especially adapted for varieties that require some form of support as a trellis can be placed between the two rows. Good stable manure is the best fertilizer. Remember that peas can be planted
much earlier than you're pleased, equal 

Reuter's Peerless Extra Early—Where earliness, 
large-sized pods and sweetness of flavor are desired, it is the best variety
you can possibly plant. It may be truly called the WORLD'S UNBEAT-
ABLE EXTRA EARLY PEA, for it is far superior to anything ever intro-
duced in the South. It has become the main reliance of thousands of truckers in the South who wish to be first with new peas. It is a tough
sort, with wonderful ability to mature quickly. It is absolutely unsur-
passed in extra-early qualities, but in size of pod and produc-
tiveness, in vigor and regularity of Habits, and in出品, merits. Every
seedman in this country claims to sell the "earliest" pea, but, after testing
them all, I know positively that no one excels this celebrated strain, either
in quality, quantity or earliness. You make no mistake when you plant
this sort. It is a round-seeded pea that will grow and mature quicker than any other, and is absolutely free from the early cornage. The entire crop can be taken off in two plantings. The vines average about two and
one-half feet in height, just short enough to bear a large crop. My
strain is absolutely pure. Prepaid, 10 lbs., $1.65; 5 lbs., $1.65; 10 lbs., $3.25. Not prepaid, by express or freight, peck (15 lbs.), $4.00; bu. (60 lbs.), $15.00; 100 lbs., $24.00.

Reuter's Pedigree First and Best Peas—This is one of the earliest peas in the world, usually ready for picking in
35 to 40 days. They are hardy, very productive, and withstand changes in
weather condition better than most early varieties. Vines are vigorous,
and hardy, two to two and one-half feet high, unbranched, bearing three to
seven straight pods having five to seven medium-sized smooth peas of
good quality. An improved strain of this extra selected variety is
very pure and well developed and is more largely planted by
most of the large pea growers than any other. Prices, by mail postpaid: Pkt., 10c; lb., 40c; 2 lbs., 75c; 5
lbs., $1.65; 10 lbs., $3.25. Not prepaid, by express or freight, peck (15 lbs.), $4.00; bu. (60 lbs.), $15.00; 100 lbs., $24.00.

Earliest of All or Alaska—Illustrated in color and described on page 5 of this catalog—Prices, by mail postpaid:
Pkt., 10c; lb., 40c; 2 lbs., 75c; 5 lbs., $1.65; 10 lbs., $3.25. Not prepaid, by express or freight, peck (15 lbs.), $4.00; bu. (60 lbs.), $15.00; 100 lbs., $24.00.

Gradus or Prosperity—The earliest, largest-podded and most prolific of the wrinkled varie-
ties. Vines are vigorous and healthy, growing two to three feet high.
It requires no stakes. The pods are of dark green color, and measure four inches or more in length, bearing six to eight peas. Prices, by mail postpaid:
Pkt., 10c; pound, 50c; 2 lbs., 90c; 5 lbs., $2.00; 10 lbs., $3.75. Write for prices on larger quantities.

Reuter's New Saxonia—A new dwarf first-early pea of unusual merit. But recently on the
market, yet it has already made many friends, and is truly destined to be
one of the most popular of all the extra-early dwarf varieties. The big valuable feature about this pea is its
enormous pod. The pods are three to four inches long, or fully 30 per-
cent longer than either the Peerless Extra Early, Early May Alaska, or the Early Washington. Matures as early as one of them. This is one of
the most PROLIFIC early peas I have ever seen. This pea has a delicious, luscious flavor that rivals the
sweetest table pea ever grown. It is the one pea that will make good in the South, for either home or market
use, and is the best for extreme earliness, yield and vigor is
unbeatable. Thousands of our customers who planted this sort last year claim they never grew any pea that
does the equal of this one. If you order one of Reuter's New Saxonia Peas this spring, and if
we're not pleased, back goes your money and no questions asked. I will stake my reputation on this var-
ety and believe it is unquestionably superior to anything at present on the market. Seed supply limited on
account of short seed crop. Order early. Prices, by mail postpaid: Pkt., 10c; lb., 40c; 2 lbs., 75c; 5 lbs., $1.65;
10 lbs., $3.25. Not prepaid, by express or freight, peck (15 lbs.), $4.00; bu. (60 lbs.), $15.00; 100 lbs., $24.00.

Reuter's Prolific Early Market—Illustrated in color and described on page 5 of this
catalog—Prices, by mail postpaid: Pkt., 10c; lb., 40c; 2 lbs., 75c; 5 lbs., $1.65; 10 lbs., $3.25. Not prepaid, by express or freight, peck (15 lbs.), $4.00; bu. (60 lbs.), $15.00; 100 lbs., $24.00.

Reuter's Extra Early Tom Thumb—This is an extremely early variety of exceptional merit. Vines
dwarf, about nine inches high, completely covered with an
abundance of the finest well-filled pods. It is of such upright growth that it may be planted in rows 18 inches apart. It is a
mighty fine early pea, both for home use and shipping purposes, and worthy of a trial. Prices, by mail postpaid: Pkt., 10c;
2 lbs., 40c; 2 lbs., 75c; 5 lbs., $1.65; 10 lbs., $3.25. Not prepaid, by express or freight, peck (15 lbs.), $3.75; bu. (60 lbs.), $14.00; 100 lbs., $27.00.
Peerless Garden Peas

Nott's Excelsior—The best very early dwarf pea. It combines the good qualities of American Wonder and Premium Gem peas. The vines are larger and more productive than American Wonder and earlier than the Premium Gem and average about twelve inches high. The pods are about five-fourteen inches long. The peas, in sweetness and quality, are unsurpassed. A highly desirable variety for market gardeners. We sell large quantities to traders in Southwest Texas. Prices, by mail prepaid: Pkt., $0.50; 10 lb., $3.75; 25 lb., $8.25; 50 lb., $15.50; 100 lb., $25.00.

Premium Gem—(Improved Little Gem). A fine early green wrinkled dwarf variety. The vines are very productive, average to eighteen inches high. The pods are of medium size, about two and three-fourths inches long, crowded with six to eight large peas of fine quality. Prices, by mail postpaid: Pkt., 10c; 1 lb., 55c; 2 lbs., 80c; 5 lbs., $1.75; 10 lbs., $3.25. By express or freight, not prepaid, peck (14 lbs.), $4.25; bu. (25 lbs.), $10.00; 100 lb., $25.00.

Laxonian—This is the largest podded of all the early varieties. Although recently introduced seed, it has insured remarkable success. The vines are very vigorous, making a valuable market gardeners' sort. If you desire a fine large-podded pea that will mature early, one that fills the hamper quickly, plant REITER'S LAMON, OR LARGE-PODDED ALASKA. Prices, by mail postpaid: Pkt., 10c; 1 lb., 55c; 2 lbs., 80c; 5 lbs., $1.75; 10 lbs., $3.25. Not prepaid, by express or freight, peck (14 lbs.), $4.25; bu. (25 lbs.), $10.00; 100 lb., $25.00.

Dwarf Telephone—This is a healthy, stocky grower, and very productive. Requires nostaking. The green pods frequently measure five inches in length, containing nine to ten peas. If you like the Telephone pea, and do not want to take the trouble to stake, plant this strain. Prices, by mail postpaid: Pkt., 10c; 1 lb., 55c; 2 lbs., $1.00; 5 lbs., $2.25; 10 lbs., $4.00. Write for prices on larger quantities.

Improved Telephone—Light-colored leaves, and producing an abundance of pointed pods of large size, often four and one-half to five inches long, attractive, bright green, filled with very large peas, which are tender, sweet, and of excellent flavor. Prices, by mail postpaid: Pkt., 10c; 1 lb., 55c; 2 lbs., 80c; 5 lbs., $1.25; 10 lbs., $2.50.

Mammoth Melting Sugar—These peas are larger than any other variety, often six or seven inches long and an inch and one-half broad. They should not be shelled, but the peas and pods are eaten together, as they contain so much sugar, starch and gluten; they are very nutritious for family use. Grows quite tall, five to six feet and requires support. This fine edible podded pea deserves a place in your garden. They are used in the same way as the snap or string beans, not being shelled. I am urging you to plant some of these splendid sugar peas, for it is the choicest of all table varieties, the pods are stringless and in flavor, brightness and succulence are unequalled. The pods are sometimes sliced for cooking because of their size and may be served with butter or white sauce. They can be made ready for table in 10 to 15 minutes and are good even when quite tender. They are enormously productive so a few packets or a pound will supply an ordinary family. Prices, postpaid: Pkt., 15c; 2 pks., 25c; lb., 50c; 2 lbs., 90c; 5 lbs., $2.50; 10 lbs., $4.25.

Large Black-Eyed Marrowfat—Very popular with the gardeners in this section, who plant this variety during the late fall or early spring months, as it withstands inclement weather and cold better than the dwarf varieties. A strong grower and very productive. Height about four to five feet. Must be staked. Prices, by mail postpaid: Pkt., 10c; 1 lb., 40c; (60 oz.), $2.00; 100 lb., $12.00.

FIELD PEAS ARE LISTED ON PAGE 52

SEED PEAS SCARCE AGAIN THIS YEAR—Better order your supply of Garden Peas as quickly as possible, because there is hardly a sufficient quantity to go around this year, due to an almost total crop failure.

TOBACCO SEED—The seed should be sown as early as possible after danger of frost is over. It is customary to turn a quantity of brush and rubbish in the spring on the ground intended for the seed bed; then dig and pulverize the earth and mix with the ashes, after which the seed may be sown and covered very lightly. When the plants are about six inches high, transplant into rows four or five feet each way. Cultivate thoroughly with plow and hoe.

Improved White Burley—Our strain is grown on the famous limestone fields of Tennessee. Only the choice plants are set in the seed plots and special care and cultivation insures well-matured seed of highest vitality. Prices: Pkt., 10c; 1/2 oz., 30c; oz., 50c; 1/4 lb., $1.00; lb., $3.50. Postpaid.

Big Havana—Hearty cropper; one of the earliest. Prices: Pkt., 5c; oz., 25c; 1/4 lb., $1.25; lb., $4.00.

REITER'S SPINACH SEED SATISFIES

"I would like to say in regard to the Spinach seed I got from you last fall I have just cut the first 1½ acres and it cut over seven tons and brought me better than $500.00. I have five acres of younger Spinach that looks like it will do as well." (Signed) "F. WALDRON."

REITER'S ONION SEED BEST

"I want to compliment you on the germination of the Onion Seed I bought of you this season. I bought seed from four different seed houses and your seed germinated better than any other seed that I planted, the Yellow Bermuda as well as the Crystal Wax. (Signed) "E. SIMON."
Choice Pepper Seed

Culture—Peppers are most largely used for seasoning meat and vegetable dishes as well as for salads and sausages. They are used also for making chow-chow and chili sauce. The culture is about the same as eggplants, and the plants need quite as much heat to perfect them. Sow the seed early in hotbeds during December and January or about the middle of April, usually during March and April. In open seed bed, the soil being light and warm. When three to four inches high, transplant in rows two and one-half feet apart and two feet apart in the row. Cultivate and keep free from weeds. Sow in June and July for a fall shipping crop. For insects spray with Coronis Dust or颁奖的Pyrox. Illustrated in color and described on page 5 of this catalog. Prices: Pkt., 10c; oz., 35c; 1/2 lb., $1.25; lb., $4.00, postpaid.

Reuter's Royal King—This is the finest strain of the well-known Ruby King pepper in cultivation. My stock is procured from the most reliable and responsible pepper seed grower in the United States. The stock is carefully grown and selected for size, yield, growing, and market value. Prices: Pkt., 10c; oz., 35c; 1/2 lb., $1.25; lb., $4.00, postpaid.

Reuter's Famous Ruby King—This is the finest strain of the well-known Ruby King pepper in cultivation. It is the most productive, yielding heavy crops. Prices: Pkt., 10c; oz., 35c; 1/2 lb., $1.25; lb., $4.00, postpaid.

Reuter's Genuine Ruby King—This is the finest strain of the well-known Ruby King pepper in cultivation. It is the most productive, yielding heavy crops. Prices: Pkt., 10c; oz., 35c; 1/2 lb., $1.25; lb., $4.00, postpaid.

Reuter's Ruby Giant—A large and vigorous pepper, being a cross between our Ruby King and Chinese Giant, having the good qualities of both. It is a very attractive pepper, grows to a large size, and is very productive. Prices: Pkt., 10c; oz., 35c; 1/2 lb., $1.25; lb., $4.00, postpaid.

New Pimiento—This is a new pepper that is largely grown in the South, for use in canning purposes. It is a smooth and uniform in shape that the skin can be easily slipped off after burning over a hot fire a few seconds or by boiling a few minutes. It can also be sliced like an apple by using a sharp knife. In quality it is equal to the best, and delicious, entirely free from pungency. Color, when ripe, is a beautiful scarlet color. When ready for use, the color is a brilliant green. It is very productive, yielding heavy crops. Prices: Pkt., 10c; oz., 35c; 1/2 lb., $1.25; lb., $4.00, postpaid.

Long Red Cayenne—A well-known medium early variety having a slender twisted and pointed pod about four inches long. Color is red, both when young and when ripe. Extremely strong and pungent flavor. A favorite with many of the gardeners in the South. Prices: postpaid, Pkt., 10c; oz., 35c; 1/2 lb., $1.25; lb., $6.00.

Bird's Eye—Small and attractive. Very fine in flavor. Can be used fresh or dried. Prices: postpaid, Pkt., 10c; oz., 35c; 1/2 lb., $1.25; lb., $6.00.

Genuine Tabasco—This is the variety from which the well-known Tabasco Sauce is made, and has been known for many years as the finest and most pungent pepper. It has a very hot flavor and is excellent for use in cooking. Prices: Pkt., 10c; oz., 35c; 1/2 lb., $1.25; lb., $6.00.

Anahiem Chili Pepper—A very popular and widely grown pepper, and is the most desirable pepper for pickling. It is a large, heavy pepper, with thick walls, and is excellent for canning. It is a large, heavy pepper, with thick walls, and is excellent for canning. Prices: Pkt., 10c; oz., 35c; 1/2 lb., $1.25; lb., $6.00.

Pepper Plants—I have mighty fine hot pepper plants ready for March and April of the following varieties only: Royal King, Ruby King, Chinese Giant and Long Red Cayenne. Prices, Postpaid: Per doz., 25c; 25 for 40c; 50 for 50c; 100 for $1.25; 500 for $4.00. Not prepaid, by express, per 1,000, $7.50.

Reuter's Mixed Peppers—Each season an increasing number of my customers have asked me to include with their garden seed order a packet or two of mixed pepper seed and this year I have decided to include this item in my catalog so that those who have desired this mixture may know I am prepared to supply it. The packets contain a small quantity of each desirable variety for home needs. Every home can use both sweet and hot peppers and this mixture will give you some of every variety listed on this page. The seed is all fresh, stock being changed to meet the changing needs of the market. I have never purchased "job lots" to fill my mixtures or collections. Only Reuter's best go into the Reuter name, whether it be a mixture or a straight variety. Order one or more packets of this pepper mixture and you'll be highly pleased.

Prices: Pkt., 10c; 3 pks., 25c, postpaid.
Potatoes are State Certified—meaning free from disease and varied mixtures, giving larger yields and uniform maturities. Reuter's Certified Seed Potatoes are the product of years of hill selection of high-producing seed. Weak, unproductive plants are eliminated each year. Result: Stronger and more productive seed. Like produces like. Use Reuter's Certified Seed. Naturally, you'll find the price slightly higher for this better seed, but common sense will tell you that the better quality and better yields will mean more profit to you. It's good business to plant the very best.

**White Star**—It is medium early and cannot be excelled for a malarial crop. Vines are strong, of dark green color and very vigorous. Large, oblong, uniform tubers. A good shipper and a good keeper.

Prices: Peck, $1.10; bu., $3.25; bag (150 lbs.), $7.50; 10 bushels or more, at $2.85 per bushel; 25 bushels or more at $2.75 per bushel. Write for market prices when ready to buy.

**Boston Peerless**—A round, white variety, with a slightly netted, skin dull white, slightly russeted; very shallow eyes near surface. A good keeper and shipper. For late planting it has no superior. Prices: Peck, $1.10; bu., $3.25; bag (150 lbs.), $7.50; 10 bushels or more at $2.85 per bushel; 25 bushels or more at $2.75 per bushel. Write for market prices when ready to buy.

**Bliss Red Triumph**—The most valuable early potato for with our Northern-grown Seed Stock it’s the surest and most dependable producer of all sorts, while its handsome appearance when first dug makes it a ready seller at top prices on any market. It withstands heat and drought to a wonderful degree, and makes a good crop when other sorts burn and make nothing. Vines are smaller than other varieties, the strength of the plant going into making the potatoes rather than into the vines. Blues in 8 to 10 of our Certified Seed—(present prices January and February shipment): peck $1.25; bushel, $3.75; bag (150 lbs.), $7.25; 10 bushels or more at $2.85 per bushel; 25 bushels or more at $2.75 per bushel. Write for market prices when ready to buy.

**Irish Cobbler**—is almost pure white, mealy, but not too dry. A good shipper and good keeper. Wisconsin Certified Seed—(present prices January and February shipment): peck $1.25; bushel, $3.75; bag (150 lbs.), $7.25; 10 bushels or more at $2.85 per bushel; 25 bushels or more at $2.75 per bushel. Write for market prices when ready to buy.

**PUMPKINS FOR TABLE AND STOCK**

**Culture**—Pumpkins are not so particular in regard to soil as melons or cucumbers. They should be planted in hills ten to twelve feet apart and cultivated the same as melons or cucumbers. When the leaves die, all the pumpkins from the vines, leaving three to four inches of stem attached, and store in a dry place. Handle carefully and avoid bruising.

Use one ounce of seed to 20 hills of most varieties; 5 to 5 pounds to the acre.

**Genuine Green Striped Cashaw**—and described on page 6 of this catalog. Prices: Pkt., 5¢; ounce, 20¢; ½ lb., 60¢; lb., $2.25, postpaid.

**Mammoth King**—Also called the Big Jumbo. It is a sure grand, big variety, often measuring two feet in diameter and weighing up to 200 pounds. The skin is salmon-orange color; the flesh is thick, bright yellow and fine-grained, and of good quality. Notwithstanding its large size, it is one of the best pumpkins for table use. A splendid keeper and exceptionally valuable for feeding stock. I do not have seed saved from experiments weighing less than 60 pounds. Prices: Pkt., 5¢; ounce, 20¢; ½ lb., 60¢; lb., $2.00, postpaid.

**Sweet or Sugar**—It is a small pumpkin, being about ten inches in diameter. It has deep orange yellow skin and fine-grained flesh. It is prolific and in every way desirable. The average weight is about five pounds. This is the variety the famous pumpkin pies are made of. Prices: Pkt., 5¢; ounce, 15¢; ½ lb., 45¢; lb., $1.50, postpaid.

**Tennessee Sweet Potato**—A bear-shaped pumpkin. It is uniformly round, of medium size and slightly ribbed. Color, creamy white, sometimes lightly striped with green. Flesh light-colored, fine-grained, dry and of superior quality. When cooked, resembles a sweet potato in flavor. A good keeper. Prices: Pkt., 5¢; ounce, 20¢; ½ lb., 60¢, lb., $2.00, postpaid.

**Large Cheese or Field**—Very productive. Skin buff color; flesh yellow. The most popular for field or market use. A splendid sort to plant among the corn, and a heavy yielder.

Prices: Pkt., 5¢; ounce, 10¢; ½ lb., 25¢; lb., 65¢, postpaid.

**Mammoth Field or Big Tom**—The most productive and most uniform-growing varieties known. The vines are strong, vigorous and wonderfully productive. The fruit average fifteen to twenty inches in diameter. The skin and flesh are of a deep, rich, orange color, of excellent flavor for pies, etc., cooking soft and tender. Very good for canning and stock feeding.

Prices: Pkt., 5¢; ounce, 15¢; ½ lb., 45¢; lb., $1.50, postpaid.

**Japanese Pie**—A distinct Japanese variety, adapted to all parts of the United States and in general appearance resembles the Cashaw, but is earlier and larger.

Prices: Pkt., 5¢; ounce, 20¢; ½ lb., 60¢, postpaid.
Reuter's Superb Radish Seed

Culture—Rich, moist soil is essential for best results. September, October and November are the preferable planting months. For early use plant the round or button radishes, and the olive shaped. For later use plant the long and half-long sorts. Sow thinly in drills 15 to 18 inches apart and from one to five inches between the plants, depending upon the size of the roots and tops. Cover seed with about one-half inch. One ounce to 100 feet of row; 12 lbs. to the acre.

Reuter's Early Scarlet Turnip-White Tipped—Illustrated in color and described on Page 6 of this catalog. Prices: Pkt., 5c; oz., 15c; ½ lb., 30c; lb., $1.00; 5 lbs., $4.50, postpaid. Write for prices in larger quantities.

Long Brightest Scarlet—The finest long bright scarlet radish in cultivation. Many of the New Orleans market gardeners plant this sort early in the season for local market use. The roots are smooth, slender, uniform in shape and very attractive. This sort has a pure white tip. Prices: Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., $1.25; 10 lbs. or more at $1.00 per pound, postpaid. Write for prices in larger quantities.

Reuter's Cincinnati Market or Glass Radish—Illustrated in color, and described on Page 6 of this catalog. Prices: Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., $1.00; 5 lbs., $4.50, postpaid. Write for prices in larger quantities.

White Strassburg—Obviously tapering in shape. Skin and flesh pure white. Crisp, firm, brittle and tender. Best variety for summer use, and largely planted by our market gardeners for local sale in summer. Prices: Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., $1.25; 10 lbs. or more, at $1.25 per pound, postpaid. Write for prices in larger quantities.

California Mammoth White—The Chinese truck gardeners in California grow this variety extensively. It is the largest of all the winter radishes, growing from 10 to 12 inches long and from six to 8 inches in diameter. Pure white and smooth, but the skin is much thinner than the radishes, with a rather bitter flavor. Excellent for salads, both raw and cooked. Prices: Pkt., 5c; oz., 15c; ¼ lb., 45c; lb., $1.25; 10 lbs. or more at $1.00 per pound, postpaid.

White Vienna—Vividly attractive pure white radish. Entirely distinct. Roots long, slender and pure white, with a somewhat tapering point. Prices: Pkt., 5c; oz., 15c; ¼ lb., 45c; lb., $1.25; 10 lbs. or more at $1.00 per pound, postpaid.

White Iceicle—Pure white variety for market and home. Ready for use in 25 days. Prices: Pkt., 5c; oz., 15c; ¼ lb., 45c; lb., $1.25; 10 lbs. or more at $1.00 per pound, postpaid.

Flower Vienna—A very fine long, white radish grown under excellent quality. The tops are of medium size, the roots white, slender, smooth and average about six to seven inches in length. Prices: Pkt., 5c; oz., 15c; ¼ lb., 45c; lb., $1.25; 10 lbs. or more at $1.00 per pound, postpaid.

Scarlet Globe—Roots of this variety are slightly larger and are of a rich bright scarlet color. Fine for home use and market. Prices: Pkt., 5c; oz., 15c; ¼ lb., 45c; lb., $1.50; 10 lbs. or more at $1.00 per pound, postpaid.

Reuter's Improved Charter—A quickly growing, olive-shaped radish, about one and one-half inches long by five-eighths to three-fourths of an inch in diameter when fully grown. Prices: Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., $1.25; 10 lbs. or more at $1.00 per pound, postpaid.

Reuter's Improved Champion—Distinct and exceedingly attractive sort: clear rose colored long radish, shadings into pure white at the tips. Grows to 10 inches long, and is a fast, uniform variety. Prices: Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., $1.25; 10 lbs. or more at $1.00 per pound, postpaid.

Long Black Spanish—The roots are long, thick, almost black, somewhat wrinkled. The flesh is white, firm texture, decidedly pungent, but well flavored. Prices: Post paid, Pkt., 5c; oz., 15c; ¼ lb., 50c; lb., $1.50.

Chinese Rose—Bright rose color. Excellent quality and one of the best winter varieties. Prices: Pkt., 5c; oz., 15c; ¼ lb., 50c; lb., $1.50, postpaid.

Choice Spinach Seed

Culture—You can enjoy a better vegetable to furnish an early supply of greens than spinach. Seed should be planted in very rich, soil, the richer the better. Sow in drills 15 to 20 inches apart and thin to about six inches apart when the leaves are an inch wide. Sow early in January, also in February and March. The seed germinates freely in cold weather and is a rapid grower. Under favorable conditions the leaves may be large enough for eating in eight weeks. In the South spinach seed is planted throughout the fall and winter months. One ounce to 100 feet of row; 100 seeds to the acre.

Reuter's Bloomdale Savoy Spinach—This is also known as the Norfolk Savoy Leaved. It is a very early variety and one of the best to plant in the fall for early spring use. The plant is of upright growth, with thick, glossy, dark-green leaves resembling 18-inch plants. This is the leading variety used in Texas and Virginia. We sell many tons of this seed to commercial growers. Prices: by mail, postpaid: Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., $1.00; 10 lbs., $6.00. Not prepaid, 25 lbs. or more at 50c per pound. Write for special prices on larger lots.

Reuter's Broad-Leaved Flanders—The leading broad-leaved variety with the New Orleans market gardeners. An early and vigorous-growing, broad-leaved variety. It is the most valuable variety to plant for baking purposes, and stands inclement weather conditions very well. Prices: Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., $1.25; 10 lbs., $6.00. Not prepaid, 25 lbs. or more at 50c per pound; 100-lb. lots, at 40c per lb. Write for special prices on larger lots.

Reuter's Monstrous Virolay—This newcomer surpasses most other sorts. Plants are very hardy, with heavy foliage, the dark green leaves being the true Savoy appearance and of the finest quality. Prices: by mail postpaid: Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., $1.25; 10 lbs., $6.00. Not prepaid, 25 lbs. or more at 50c per pound; 100-lb. lots, at 40c per lb. Write for special prices on larger lots.

New Zealand—Not weather and in any soil, rich or poor. The leaves are comparatively small, broad and pointed. Plant three or four seeds in hills two feet apart each way. Germination of the seed can be hastened by soaking in warm water twenty-four hours. Prices: Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., $1.00; 10 lbs. or more at 90c per pound, postpaid.
REUTER’S SELECTED SUMMER SQUASH

Culture—The squash is one of the most nutritious and valuable of our garden vegetables. The summer varieties come to the table early in the season. Plants are tender and sensitive to cold, and planting must be delayed until settled warm weather. For the bush varieties, hills should be four or five feet apart each way; from six to ten seeds are sown in each hill, and the plants are thinned to a stand after the development of a couple of rough leaves. One to two shovelfuls of good manure worked into the soil to each hill is recommended. Keep the squash picked off as soon as they are ready, so as to keep the plants bearing longer. Seed required: One ounce to 25 hills; three pounds per acre.

Earliest White Bush
Illustrated in color and described on Page 7 of this catalog. Prices: Pkt., 5¢; oz., 25c; ¼ lb., 50c; lb., $1.75; 5 lbs., $8.00, postpaid.

Mammoth White Bush—Identical with above, but larger in size and more regular in shape. A splendid shipper and home garden variety. It is early, uniform in shape and very prolific. Has a clear white skin and flesh, grows 10 to 12 inches in diameter and when picked young ships well. Prices: Pkt., 5¢; oz., 25c; ¼ lb., 50c; lb., $1.75; 5 lbs., $8.00, postpaid.

Italian Vegetable Marrow
(Coccozelle)—The fruits are large, much elongated, dark green at first, but as they mature, become marbled with yellow and lighter green stripes. Pick when 6 to 8 inches long. Becoming a commercial variety in Florida and other Southern States. Prices: Pkt., 5¢; oz., 25c; ¼ lb., 40c; lb., $1.20, postpaid.

Giant Summer Crookneck—A mighty fine summer squash. The skin is yellow. The shape is shown in the illustration. The flesh has a deep golden orange color, and is dry and of most agreeable flavor. Measures from one and a half to two feet in length. Prices: Pkt., 5¢; oz., 25c; ¼ lb., 40c; lb., $1.50, postpaid.

Winter or Running Squash
Distinct from the Bush or Summer Squashes, the vines running 10 to 15 feet long, and the squashes are 6 to 15 pounds in weight. The flavor is much richer than the summer sorts also. Should be planted later than the bush varieties. Distances vary from 8 to 10 feet in the row, depending upon the fertility of the soil and the vigor of the varieties. Hoe frequently, but do not disturb runners, if possible.

Boston Marrow—
This is a very productive fall and winter variety of medium to large size, oval shape, and thin skin. It is much used for canning and making pies. The fruits when ripe are bright orange with a shading of light cream color. The flesh is of a rich salmon-yellow color, fine-grained and of excellent quality and flavor, but not as dry as the Hubbard. Prices: Pkt., 5¢; oz., 25c; ¼ lb., 50c; lb., $1.35; 5 lbs. or more at $1.00 per pound, postpaid.

True Hubbard—One of the best winter squashes. The vines are vigorous and very productive. Fruits large, heavy and moderately warty, with very hard shell. The skin is uniformly dark yellow and a rich green. The flesh is bright orange-yellow, fine-grained, thick, dry, and solid, and is frequently, if many to be as good baked as the sweet potato. Pkt., 5¢; oz., 25c; ¼ lb., 40c; lb., $1.50, postpaid.

Delicious—A fall and winter variety of medium size. The fruits moderately hard, usually dark green, but sometimes lighter in color and mottled, and are without any hard shell. The flesh is thick, very fine-grained and bright yellow in color. I do not advise customers to plant any winter squashes for shipping purposes from the South, but these varieties are much better for home use. Prices: Pkt., 5¢; oz., 25c; ¼ lb., 50c; lb., $1.75, postpaid.

Mammoth Chili—
It is a rich orange-yellow. The flesh is yellow and very thick, and the quality is good and nutritious. Often attains a weight of 200 pounds, without losing its fine shape and quality. It is the right kind to grow for exhibition at the fairs. Its size makes it profitable to grow for stock feeding also. Prices Pkt., 5¢; oz., 25c; ¼ lb., 50c; lb., $1.75, postpaid.

These Squash
Grow from Good Seed

Reuter's Squash
Seed Will Produce Squash Just Like These

Reuter's Tomato Seed--Best for the South

Culture--The tomato is one of the most and cheapest crops to grow, and very often a very profitable one for the truck farmer. The canning of tomatoes in the South is getting to be quite an industry, and the demand for them is greater than ever before. The gardener who has the man to begin sowing the seed early, six weeks before it would be safe to put the plants in the open ground. For sowing the seed, I recommend dirt boxes, or boxes. Start the plants in a mixture of the same as early as possible. The tomato plant is not as hardy as cabbage, so more attention should be given to air and watering. When the plants are three to four inches high, they should be transplanted to another box, or cold frame, in order to make the plants strong and sturdy. After the plants are growing well and the ground you intend putting them in is thoroughly prepared and fertilized, it is necessary to lay out the field in rows, see to four feet apart, and set the plants along the rows two feet apart, and if the plants are to be staked, about eighteen to twenty inches apart. To insure best results a small handful of stable manure put over each tomato plant will enable it to take better root and train the vines. The first feed of this nature is about the end of June. If you want a large tomato, perfectly smooth, firm, beautiful, having long-keeping qualities and of great flavor, plant Reuter's MATCHLESS. The skin is tough which makes it a splendid keeper and shipper, and is less liable to crack in wet weather than any other large variety. We guarantee our seed free from impurities and market purposes. We can supply an extra choice stock of this variety.

Prices: Pkt., 10¢; oz., 30¢; 1 lb., $1.25; lb., $5.00, postpaid.

Reuter's Scarlet Chief

This great big tomato has become a prime favorite in the West for canning purposes on account of its ability to produce the heaviest tonnage even under adverse conditions and as the South is becoming a big factor in the canning of tomatoes, we introduced this variety believing that it combines every requisite necessary to make a perfect big canning tomato. We are slow to offer trade any new thing that we are not satisfied with, and this is one of the reasons we tried this tomato and can say it is far superior to the Stone for the market, while it remains a crop, because it is just the tomato for the table. It is not sour, but a delicious meaty variety. The type of vine and manner of growth is similar to the Stone. The with our growers of thirty to fifty tons per acre and while the same somewhat different from the Southern States, our recent trials of this variety show that it is an absolutely safe variety for you to plant, and I offer this new tomato with a full assurance that it will please and give entire satisfaction. It is considerably larger and heavier than the Stone, very pungent and productive, brilliant scarlet in color, and a very thrifty vine. It is not over-bearing, but makes about fifteen thousand plants the trick. Illustrated in color and described on page 7 of this catalog. Prices: Pkt., 10¢; oz., 30¢; 1 lb., $1.25; lb., $5.00, postpaid.

Reuter's Scarlet Chief

The vines are large, hardy and productive, ripening their first fruits very early, and non-stop, so that they produce unexcelled fruit. If you plant a large tomato, perfectly smooth, firm, beautiful, having long-keeping qualities and of great flavor, plant Reuter's MATCHLESS. The skin is tough which makes it a splendid keeper and shipper, and is less liable to crack in wet weather than any other large variety. We guarantee our seed free from impurities and market purposes. We can supply an extra choice stock of this variety.

Prices: Pkt., 10¢; oz., 30¢; 1 lb., $1.25; lb., $5.00, postpaid.

Purple Acme--The vines are large, hardy and productive, ripening their first fruits very early, and non-stop, so that they produce unexcelled fruit. If you want a large tomato, perfectly smooth, firm, beautiful, having long-keeping qualities and of great flavor, plant Reuter's MATCHLESS. The skin is tough which makes it a splendid keeper and shipper, and is less liable to crack in wet weather than any other large variety. We guarantee our seed free from impurities and market purposes. We can supply an extra choice stock of this variety.

Prices: Pkt., 10¢; oz., 30¢; 1 lb., $1.25; lb., $5.00, postpaid.

Giant Tree Tomato--A truly wonderful novelty, growing large trees. Bears from late spring until frost. A strong growing sort with fruit well above the ground and early to mature very large fruit. Has to be well tied to a stake to keep from sprawling over the ground. The fruits are large, often to three pounds and six inches in diameter. If you want to grow tomatoes that will be the envy of your entire neighborhood, try this sort. Not recommended for commercial purposes. Prices: Pkt., 15¢; oz., 30¢, postpaid.

John Baer--(Bright Red)--An early tomato of recent introduction that produces beautiful, large, bright red, solid fruits. Almost seedless, a marvelous size. May be planted in earlyApril. Fruits are smooth, uniform in size, nearly globe-shaped, and of excellent quality. We consider it one of the most valuable varieties ever introduced. Prices: Pkt., 10¢; oz., 30¢; 1 lb., $1.25; lb., $5.00, postpaid.

Early Detroit (Selected)--This is one of our best varieties. We sell several hundred pounds to critical growers in Mississippi and other Southern States for commercial purposes, and judge from the large amount of repeat orders and new customers each season. The vines are vigorous and very productive, and it is one of the largest and best of the early high quality. The fruits are smooth, uniform in size, and of excellent quality. We consider it one of the most valuable varieties ever introduced. Prices: Pkt., 10¢; oz., 30¢; 1 lb., $1.25; lb., $5.00, postpaid.

Reuter's Redfield Beauty--This is the right tomato for you to plant new. It is not necessary for me to elaborate on its description, for I think it is too well known in the South for me to speak of its good merits. I sell many hundreds of pounds of this distinct variety throughout Texas, Florida, Georgia, Mississippi, and Louisiana. The fruits grow in clusters of three to five, and are as regular in shape and size as it is possible to produce. The color is its chief attribute, being a bright red, the kind that makes tomatoes sell at sight. It retains all of its good qualities until picked. It is a good shipper, and less liable to rot than any other sort. The skin is tough, firm and solid. Prices: Pkt., 10¢; oz., 30¢; 1 lb., $1.25; lb., $5.00, postpaid.
GOOD TOMATO SEED FOR SPRING PLANTING

Reuter's Long Keeper—As a drouth and heat-resisting variety, I have never seen better. It has been tried extensively on the market that compares to Reuter's Long Keeper. It is an especially valuable variety for planting during the spring for furnishing a continuous supply through the long summer even other kinds die out. Its wonderful resistant qualities and adaptability to every section of the South makes it a prime favorite with every one. Fruits over three inches in diameter and are brilliant red in color.

Prices: Pkt. 10¢; oz. 30¢; ¼ lb. $1.00; ½ lb. $3.50, postpaid.

Red Rock—A great big, red, meaty quality. It is solid and free from excess of water. It is one of the finest and most showy tomatoes I handle.

Prices: Pkt. 10¢; oz. 30¢; ¼ lb. $1.00; ½ lb. $3.50, postpaid.

Duke of York—A blight-proof tomato that has created a furor throughout the Southeastern States. In many sections of the South the growing of tomatoes is almost impossible on account of the Tomato blight, which is a disease that affects the plant when the fruit begins to set. There is no remedy known for this disease. It seldom appears on new land, nor on land that has not been planted in tomatoes, but when it does appear, the only way to succeed is to grow a variety that is blight resistant.

The Duke of York is the only variety that I know of that is blight resistant. It is not quite as good in quality as some of the other varieties, but it is a strong, vigorous grower; greatcropperand stays bearing a long time. If you have ever been bothered with Tomato blight, this is the variety for you. It makes a splendid, bright, brilliant, oz., rich, red tomatoes. It is a true dwarf variety.

Prices: Pkt. 10¢; oz. 30¢; ¼ lb. $1.00; ½ lb. $3.50, postpaid.

Reuter's Perfect First Early—Been searching for an early tomato that would eliminate every objectionable feature and produce a crop that will make a PERFEET EARLY TOMATO. Our careful and painstaking growers of superine tomato seed originated this super stock, the selection of which they have been working on for more than seven years. Extreme earliness, large yields, superlative quality, dependability, are all big factors of this grand early tomato. Strictly speaking, it is the "best early tomato"-ripening in about 65 days under general conditions in the South. It is just the right size—not too large. The color is brilliant, bright red that attracts immediate attention from the trade. Every tomato is smooth and perfect as the ones shown in the Illustrations. It is nearly round, with an average weight of about three inches. Every tomato when ripe is red from blossom to the stem end. It is enormously prolific, and equal for either early or late planting. Contains very few seeds, is solid fruit, and is well adapted to the early market, and one of the best for the kitchen gardener before the season is far advanced. A great variety, Uniform size, uniform and meaty, and of the finest flavor. The fruits are borne continuously, and almost makes it an ideal shipping variety. Uniform in size.

Perfect First Early—This is our selected strain of this tomato, well known to gardeners in the South. For eight years we have sold this same strain, obtained from our careful and critical growers of canning tomatoes. We have selected the best of this strain, for it is our promise to you that this tomato will make the finest fruit for canning. It will be found to yield the finest canning tomatoes in its class.

Prices: Pkt. 10¢; oz. 30¢; ¼ lb. $1.00; ½ lb. $3.50, postpaid.

Reuter's June Pink—Illustrated in color and described as the "June Pink". It is a very popular variety, and is one of the best for the kitchen gardener before the season is far advanced. A great variety, Uniform size, uniform and meaty, and of the finest flavor. The fruits are borne continuously, and almost makes it an ideal shipping variety. Uniform in size.

Prices: Pkt. 10¢; oz. 33¢; ¼ lb. $1.25; ½ lb. $2.00, postpaid.

Dwarf Stone—This variety has been grown and is now being grown extensively in existence. Vines are small but vigorous and prolific. Color is deep red, bright scarlet. It is perfect in shape and very solid and of the finest quality.

Prices: Pkt. 10¢; oz. 30¢; ¼ lb. $1.00; ½ lb. $3.00, postpaid.

Bonny Best—A vigorous variety that is grown extensively on the market. The color is intense, velvety, glowing scarlet red. It will ripen evenly to the stem and without cracking.

Prices: Pkt. 10¢; oz. 30¢; ¼ lb. $1.00; ½ lb. $3.00, postpaid.

Reuter's New Stone—This variety has been grown and is now being grown extensively in existence. Vines are small but vigorous and prolific. Color is deep red, bright scarlet. It is perfect in shape and very solid and of the finest quality.

Prices: Pkt. 10¢; oz. 30¢; ¼ lb. $1.00; ½ lb. $3.00, postpaid.

Reuter's Extra Early Prolific—This is a grand extra early tomato that will make the finest fruit for canning. It is a self-pollinating variety, and is one of the earliest varieties that we have ever had. It is of a beautiful red color, has a perfect mass of large, smooth fruit, a single plant often producing half a bushel. Fruits extremely early and delicious.

Prices: Pkt. 10¢; oz. 40¢; ¼ lb. $1.25; ½ lb. $3.00, postpaid.

Yellow Ponderosa—One of the most interesting novelties ever introduced. It equals our Improved Ponderosa, but bears larger, golden-yellow fruits in abundance. It is a grand variety, the tomato that has color alone to distinguish it from any other sort we know of. Its rich orange color compels instant attention. It originated as a "Sport" from the Red Ponderosa and is not remarkably true; but some partially colored fruits may be expected. These but add interest to it.

Prices: Pkt. 10¢; oz. 30¢; ¼ lb. $1.00; ½ lb. $3.00, postpaid.

McGee—A wonderful tomato, both as to yield and quality. This superb variety was introduced in the South a few years ago, but we were so slow to get it in that we have not yet had a chance to make our trial ground reports. We are convinced beyond a shadow of a doubt that this variety will eventually become extremely popular in the South. It is a true dwarf, it makes a splendid, bright, brilliant oz., rich, red tomatoes. It is a true dwarf variety.

Prices: Pkt. 10¢; oz. 30¢; ¼ lb. $1.00; ½ lb. $3.00, postpaid.

Spark's Earlana—Our selected strain of this true dwarf variety, with a fine quality and a high standard. It is a true dwarf variety, with a fine quality and a high standard.

Prices: Pkt. 10¢; oz. 30¢; ¼ lb. $1.00; ½ lb. $3.00, postpaid.

Dwarf Champion—This is sometimes sold as the "Tree Champion," but it is really a dwarf variety, with a fine quality and a high standard.

Prices: Pkt. 10¢; oz. 30¢; ¼ lb. $1.00; ½ lb. $3.00, postpaid.

New Stone—This strain is superior to the Stone in solidity, flavor, and size. It makes a splendid, bright scarlet variety, especially desirable where garden space is limited.

Prices: Pkt. 10¢; oz. 30¢; ¼ lb. $1.00; ½ lb. $3.00, postpaid.

Chalk's Early Jewel—One of the best-second early tomatoes in the market. The fruits are larger and smoother than the Earlana, and mature about ten days later. The vines grow very compact and bear considerable in the season. We are convinced beyond a shadow of a doubt that this variety, plant the Chalk's Early Jewel.

Prices: Pkt. 10¢; oz. 30¢; ¼ lb. $1.00; ½ lb. $3.00, postpaid.

Improved Ponderosa—A great big tomato that has won first place among many of the most critical gardeners. The color is purple crimson. It is the largest tomato in cultivation, the heaviest, and in addition to these qualities, it has a high percentage in flavor. Shape is rather regular, considering its immense size, and makes a splendid slicing variety, with few seeds. If you are looking for something that is really a wonder, and at the same time a good quality variety, plant the Improved Ponderosa.

Prices: Pkt. 10¢; oz. 30¢; ¼ lb. $1.00; ½ lb. $3.00, postpaid.

Reuter's Selected Trophy—A large tomato, unsurpassed in rich, deep crimson scarlet color, and in quality. Vines large, vigorous and without any trouble or difficulty. Fruits very solid, smooth, and of uniform size. Unsurpassed for canning; also good for slicing. The flavor compares favorably with any in smooth, neutral, and also very satisfying. The fruit is exceptionally good in interior color.

Prices: Pkt. 10¢; oz. 30¢; ¼ lb. $1.00; ½ lb. $3.50, postpaid.

Reuter's New Stone—This variety has been grown and is now being grown extensively in existence. Vines are small but vigorous and prolific. Color is deep red, bright scarlet. It is perfect in shape and very solid and of the finest quality.

Prices: Pkt. 10¢; oz. 30¢; ¼ lb. $1.00; ½ lb. $3.00, postpaid.
Reuter’s Improved American Rutabaga

THE FINEST RUTABAGA TO PLANT IN THE SOUTH

This is one of the best and most valuable of all root crops. Rutabagas do best on new land or light, sandy soil, and for this reason are largely grown for breaking, where, without cultivation, they produce beautiful crops of excellent quality. Rutabagas are grown for two purposes—for table use and for stock feed. Our seed is grown for us in England by a well-known firm. The work has been the breeding and production of the highest type of Rutabaga. The aim has been to produce a root with a small top of uniform size and shape and with a single tap root, a root of high feeding quality, fine flavor and great productivity.

With the kind of Rutabaga Seed I sell you it is possible to raise 15 to 25 tons per acre of first-class hardy plants. The tops are a fine yellow; the roots are a good deep reddish brown. The roots are exceedingly short and slightly rounded, and are of uniform size. The leaves are very rich in color and of the best quality. This variety is comparable to the finest turnips grown in any part of the United States.

Twelve varieties are offered this year, each one differing in color, texture, size and hardness. The company has been selling for many years, but the quality has not been uniformly good. This year’s crop is the finest ever offered, and I am confident that the growers will be satisfied. The seed is carried over from last year and will be ready for planting in the spring. This is a good crop for the South, and will do well in any part of the country.

Culture—For the early crop plant during January, February and March. Turnips are planted practically every month in the year, except during the late spring months. The seed should be sown rather close, and the seedlings thinned out four or six inches apart after all danger of the flea beetle is passed. The rows should be two feet apart. Plant seed one-half inch deep. Keep free from weeds and cultivated frequently until tops become too large. Two packets of seed will plant a 100-foot row or 2 pounds of seed to the acre. Three to four months will mature a crop. Good seed is essential—so plant Reuter’s!

REUTERS BIG 7-OUNCE 25c TURNIP COLLECTION

This is the biggest seller of all my collections. It will give any family in the South a full supply of early, medium and late turnips. If you intend sowing any Turnips at all for the house, order this collection. No other seed house in this country offers such a fine selection of seed, put up in large, full ounce packets, at such a low price. FOR ONLY 25c, I’LL SEND YOU ABSOLUTELY POSTPAID, ONE OUNCE EACH OF THE FOLLOWING SORTS: EXTRA EARLY WHITE EGG, PURPLE TOP STRAP LEAF, EARLY WHITE FLAT DUTCH, PEERLESS PURPLE TOP GLOBE, LARGE SNOW WHITE GLOBE, SOUTHERN SEVENS PURPLE TOP RUTABAGA and AMERICAN PURPLE TOP RUTABAGA

You get seven distinct varieties, seven full ounces, delivered at your postoffice, for only 25c. Isn’t this a great big bargain? You get nothing but the finest kind of seed in this collection, every grain just ready to grow when it hits the ground. No old worthless, carried-over turnip seed that is usually put in collections of this sort. NEW CROP, TRUE-TO-NAME SEED ONLY—7 OUNCES, 7 SORTS, 25c, POSTPAID.—Note—On account of the exceedingly low price, I am not able to furnish more than one of these splended collections to each customer.

7 OUNCES — 7 VARIETIES — 25c — POSTPAID

CHAYOTE, MIRLITON, or VEGETABLE PEAR

Among the fall and winter vegetables that can be easily grown in home gardens of the South the Chayote (pronounced chay-tay) has proved one of the best. This little-known vegetable, a native of tropical America, promises to become a profitable commercial crop in the sections of the South to which it is adapted for culture. It is produced on climbing vines with perennial roots. The vines sometimes resemble those of the cucumber, to which family it belongs, but they are much more vigorous in growth and more prolific. The Chayote can be grown successfully on any of the well-drained, cultivated lands in the sections of the Southern States where the climate does not freeze—anywhere south of a line drawn from Charleston, S. C., to Baton Rouge, La., and along the Gulf Coast to Texas. For eating purposes the fruits are picked when young. They can be kept in good condition for several weeks in a cool place at 50 degrees Fahr. The Chayote when cooked has a distinctive flavor, not unlike that of the vegetable marrow, but more delicate. It forms an excellent addition to our winter vegetables when used creamed, boiled, baked, stuffed, fried, in soups, and as a sauce flavored with fruit juice. Spring planting of Chayotes in Florida, where the winter frosts, if they occur, are usually light. The planting may be done in the autumn, if desired, and protection by mulching can be given in frosty or freezing weather. When planting, place the entire fruit on its side with the stem end uppermost; cover the lower end with not more than two inches of soil, leaving the small or stem end exposed. The fruits should be planted about 10 inches apart. They grow best in a rich, well-drained, sandy loam, but will grow well in any good garden soil. Drainage is provided and a liberal amount of well-rotted manure, compost or a standard vegetable fertilizer is mixed with the soil in which the Chayotes are to be planted. They are done if planted late in April or early May. The plants should be watered with straw or litter and watered at least once a week after planting. The vines should be trained on some sort of trellis or arbor. Even a fence, tree or out building will furnish satisfactory support for them. Chayotes fruit best at moderate temperatures. In the Southern States favorable weather for fruiting usually begins late in September and continues until the vines are killed by frost. Every home gardener throughout the South should have a few vines of vegetable pears. City folks pay high prices for them at fruit stands and markets—you can produce them in your own back yard. Order a few.

Prices: 15c each, 2 for 25c; per dozen, $1.25, postpaid.

38
REUTER'S FROST PROOF CABBAGE PLANTS HEAD SIX WEEKS EARLIER THAN HOME GROWN PLANTS

We are having grown for us in certain sections of Louisiana, also in South Carolina, many million FROST PROOF CABBAGE PLANTS in a slow steady growth, until at eight years of age they are very tough and hardy, the buds are purple and the outer leaves a reddish brown. These FROST PROOF CABBAGE PLANTS will stand a temperature of 20 degrees below zero while the land is freezing, or the plants being covered with ice, sleet, or snow after they are planted will not injure them. They usually withstand the cold of entire winter, say, at least three winters out of five. The word "Frost Proof" does not mean that during the winter the plants will stand.

TREATMENT OF PLANTS ON ARRIVAL—If the plants cannot be set out the same day they are received, take them from the crate immediately, dip the roots in water and hold out into the ground, the bunches a little. In no case should they be left in the crate.

VARIETIES: Early Jersey Wakefield, Stein's Early Flat Dutch, Succession, Late Flat Dutch and St. Louis Market.

The plants will be somewhat wilted and have a hard stunted appearance which will be disappointing to persons who have never used these plants before. Regardless of appearance, they will produce the crop results.

We guarantee good delivery of parcel post shipments. Owing to congestion of all transportation, we do not guarantee delivery of express shipments. They are shipped at purchaser's risk.

TERMS—Remittances must accompany all orders. No plants shipped open account or C. O. D.

PRICES—By mail postpaid, 100, 200, 300, 400 at $1.50; 500 at $1.25; 1,000, 2,000, or 3,000 plants to the package at $2.50 per $1,000; 5,000 or over at $2.25 per $1,000; 10,000 or over at $2.00 per $1,000.

No orders filled for less than 100 plants of single variety.

REUTER'S TRUE TO NAME SWEET POTATO PLANTS

Asparagus Roots—You can save from 1½ to 2 years' time in getting your Asparagus bed in condition by the use of our 2 year old Asparagus roots.

Prices: 50 roots for $1.00; $1.25 at $1.50, postpaid. By express, not prepaid, per 100, $1.25; per 1,000 $8.00.

Rhubarb Roots (Pie Plant)—Plant early in the spring in rows four feet apart each way, in deep, warm and very rich soil. These should be planted about 6 inches apart in the row, very little culture is needed. Later in the fall pull as many roots as will be required for your winter use, cut off tops, and put them in a basket under ground, place them in a cool cellar, grate as wanted. Prices, by mail, postpaid: Dozen: 50c; 25 for 50c; 100 for $1.00; 500 for $4.00. By express, not prepaid, dozen, 40c; 50 for 75c.

SAGE—Very extensively for various medicinal purposes.

Tomato Plants—VARIETIES: June Pink, New Stone, GLOBE, Dwarf Champion, Early Detroit and Ponderosa. Ready for shipment about March 1st. Price, by express, per 1,000, 25c; per 75c; 500 for $1.25; 1,000 for $4.00. Not prepaid, by express, per 1,000, $1.00.

OTHER VEGETABLE PLANTS AND ROOTS

Eggplant Plants—VARIETIES: New York Market, New Orleans Market and Florida High Bush. Ready for shipment about March 1st. Prices, by mail, postpaid: dozen, 25c; 50 for 40c; 100 for $1.25; 500 for $5.00. Not prepaid, by express, per 1,000, $7.00.

Bermuda Onion Plants—VARIETIES: Ebony, Black, White, and Yellow. Ready for shipment about January 1st. In rows about 3 inches apart and 3 to 4 inches apart in the row. Prices, by mail, postpa–
ded, 100, $2.00; 500, $5.00. By express, per 1,000, 50c.

HERB PLANTS

Chives—(Schlittchen) A very delicately flavored member of the onion family, greatly in demand for seasoning salads, soups, etc. of every easy culture, but likes to be shaded from the hot sun.

Mint—Used for making Mint Sauce and Juleps. They are very hardy and when once established remain for years.

Rosemary—Makes a very attractive border plant. It is also used very extensively for various medicinal purposes.

Sage—The leaves and tender tops are used in stuffings, gravies, stews, etc., also used medicinally.

Sweet Basil—Almost an indispensable herb, used for soups, dressings and sauces. Once planted it remains permanent for years.

Vetiver—The highly fragrant roots are in great demand, being used largely to put amongst clothes to prevent moths from attacking them.

Any of the above herbs 20c and 30c each, depending on size; per doz., $2.00 and $3.00, postpaid.
BEST CORN FOR THE SOUTH
For General Farming Conditions

DAVIS' PROLIFIC SEED CORN
(Originator's Pure Bred Stock Only)

Why It's Best For You to Plant—The general farmer in these times wants a corn that will produce a maximum of grain and stalk with a minimum of cost for he hasn't the time and labor to put in on growing phenomenal yields at unnecessary expense. For all purpose corn there is no variety in the Davis' Prolific. Mr. Clarendon Davis, of Alabama, has attained a Dixie-wide reputation for his accomplishment in developing this variety, which has come to be popularly known as Davis' Poor Man's Corn in its satisfactory yield on this and rather infertile soils. Mr. Davis set out years ago to produce for his own, rather a variety of corn that would yield well. He was a most practical farmer and sought for his own needs only that which was urgently needed by all Southern farmers. Years of careful selection and breeding have resulted in the Davis' Prolific, and it has now become a popular variety of the South, from the Carolinas and Texas and from Tennessee to the Gulf. It is sufficiently hard for soundness, with the tips well covered with the shock to resist weevils, yet at the same time being not too hard for stock to eat. It will produce two or more ears to the stalk, is medium early, with a large, deep, wedge-shaped grain, with small ears. The ears are medium length, well out at the tip and butt. It is not a flinty grain but one of the soundest corn grown. It is an excellent stock corn and makes fine meal, being greatly in demand for many purposes. As a silage corn it has no superior and this may well be realized when it is known that dairymen of the North are planting and gathering this variety for their needs. Innumerable tons of ear corn will shell out 60 to 62 pounds of grain, or 56 per cent. Ordinary corn will shell out 58 pounds to the bushel, or 40 per cent. It is unquestionably the best white corn for the South and the most valuable corn variety. The remarkable thing about this variety is that it has been bred and developed always under normal field conditions, never in a highly fertilized spot to see how much can be produced regardless of the natural environment. Mr. Davis has always seen that the need of the Southern farmer is to make a maximum yield at a minimum cost, that big farms and acres make more in costs and that to make a profitable farm, though it has its value in demonstrating what the soils of the South are capable of doing. Davis' Prolific has been selected, bred and developed after a cotton crop, and economical methods for general farming require.

What Customers Say—There's no better test for any particular article, whether it be seed corn or saw blades, than the actual experience of the users. I can honestly say that I get more genuine testimonials for my Davis' Prolific Seed Corn than for any seed of corn that I distribute. Farmers from all portions of the South, from sections where corn is recognized as a great producing crop and from other portions where corn is not supposed to be the leading crop, in their praises of this splendid all-purpose sort. Many have thanked me for bringing them in touch with such a profitable variety. Mr. T. H. Misson, in this past season that he bad made an average yield of 45 bushels of good, sound grain on a good-sized field and that the crop had no rain after the seed was put into the ground. Another Texas customer in sending us his Davis' Prolific Corn at a country fair, said: "It was the best corn ever grown on my place. I have never received any better seed of any kind than the seed I have received from you this year. It is a very profitable. Mr. farmer, wrote me: "My son, a member of the Boys' Corn Club, raised an acre of Davis' Prolific Corn on just fair upland, very little fertilizer, with a credit for 10 bushels more for producing at the time the 1,000 pounds of Velvet Beans. A County Demonstration agent in Missouri wrote me: "Am sending you a sample of Davis' Prolific Corn produced from seed bought from you. This made 74 bushels to the acre on four acres without any fertilizer." Mr. John Rogers, a Louisiana planter, wrote me: "I feel like I once I had the Davis' Prolific Seed Corn I obtained from you. I produced 110 bushels to the acre and my land was in much shape. you work." Mr. Ed. Flanigan, a practical Georgia farmer, has written me: "Your Davis' Prolific Seed Corn is every year and is still the best corn I have ever planted. I exhibited ten ears of the crop I made from your seed at our county fair and won the first prize in the corn department. Two of our customers have reported phenomenal yields, one in Miss, the other in Louisiana, producing 142 bushels on a similar area. While these are exceptional yields they only demonstrate what is possible with Davis' Prolific Corn, thoroughly adapted to the section and with proper planting, cultivation and attention. It is positive that no such yields would have been realized, even with proper soil and careful handling, if I had failed to do my best, just as a good farmer on account of his knowledge and skill in his production. This is exactly what I claim it to be. There is quite a reputation among seedsmen to obtain seed stocks from indiscriminate sources, especially on varieties that are so popular, I may have seen a few and I know that I can't go wrong when I supply the real, genuine Davis' Prolific Seed Corn. I would much rather risk your remitance if your order reached me after I had sold all of my corn to the best farmers I know and to the extreme who will take a chance and send seed that might do splendidly, and again might fail down miserably. If I substituted on you, I would do it all myself as well as Mr. Davis a great injustice. Therefore, you may order this variety from me and know that you will get the real genuine, unadulterated Davis' Prolific Seed Corn, which are the most valuable strain of general farming varieties.

-originator's stock only

Originator's Stock Only—When any practical man originates and develops something that is exceptional and of great benefit to his fellow men there is always a host of imitators to step in and try to walk off with unearned profits, obtaining these profits on the reputation of the originator. This has been true of our customers to understand that every pound, every peck, every bushel of this famous seed corn that I distribute in this, as in all previous years, comes to me direct from Mr. Clarendon Davis, the originator of this variety. I have sold all of this seed as Mr. Davis can supply me and I have never yet obtained sufficient seed to supply the demands. You can order this seed corn with full assurance that you will get unadulterated seed and that it is the true variety right from the seed-breeding farm. I could purchase great quantities of this variety from hundreds of growers but while I realize many of them are thoroughly reputable men, I will not take a chance and obtain my stock from any other than the original source. In doing so I am supplying my customers is exactly what I claim it to be. There is quite a temptation among seedsmen to obtain seed stocks from indiscriminate sources, especially on varieties that are so popular, but I have always known that I can't go wrong when I supply the real, genuine Davis' Prolific Seed Corn. I would much rather risk your remittance if your order reached me after I had sold all of Mr. Davis' germplasm and all the extreme box to take a chance and send seed that might do splendidly, and again might fail down miserably. If I substituted on you, I would do it all myself as well as Mr. Davis a great injustice. Therefore, you may order this variety from me and know that you will get the real genuine, unadulterated Davis' Prolific Seed Corn, which are the most valuable strain of general farming varieties.

Prices: Postpaid, lb. 25c; 2 lbs. 40c; 5 lbs. 90c; 10 lbs., $1.75. Not prepaid, by express, 25c per lb.; 10 lbs., 25c per lb; 25 lbs., 20c per lb; 50 lbs., 15c per lb; or more at 14c per lb; 100 lbs., 9c per lb; or more at 8c per lb. Write for special prices when in the market for large quantities.
REUTER'S CELEBRATED GIANT RED COB CORN

A LARGE GRAINED, HEAVY YIELDING, HIGH FEEDING AND EXCELLENT MILLING CORN FOR THE SOUTH

Throughout the entire South, there is no HIGH-BARRED corn that equals REUTER'S CELEBRATED GIANT RED COB, (illustrated to the left of this page). It is unquestionably the finest large-grained Southern field corn that you can possibly plant for a meal crop. This is one of the grandest corns, bearing large bushels of wonderfully productive, high feeding and of exceptional milling value. For ensilage purposes it is absolutely unbeatable. Stalks 9 to 12 feet high, broad, strong and short-pointed, with leaves 20 to 24 inches long, 16 to 22 rows, deep red, pure white, red cob, averaging two large ears, and sometimes three, with foliage broad and rich; in fact, the finest large, white red-cob corn we have ever seen growing in any corn section of this country.

MORE THAN 100 BUSHELS TO THE ACRE

On a five acre field we had 600 bushels, and averaged 90 bushels to the acre of good sound corn on 200 acres planted for seed purposes. One of my Louisiana customers produced 110 bushels to the acre, and another one of my Louisiana friends claims to have 106 bushels to the acre on a ten-acre field. The corn has been so plump, fat, and productive that it should produce thoroughly matured corn in 65-70 days. If you want quality, big yield and corn of the highest germinating vitality, try this superlative quality corn this spring by all means.

H. S. Taylor, of Alabama, says: "I was very pleased with the Giant Red Cob Corn I planted last year. It is by far the most satisfactory variety I've ever planted."

Our Seed—fully selected from best-yielding stalks, butted and tipped to secure pure-bred uniform seed only. You'll like this seed. It's the prettiest I've ever seen this year. Order early. Prices by mail postpaid: Packet, 10c; lb., 25c; 1 lb., $1.40; bu., $4.25; 2 bushels or more at $4.35 per bushel; 10 bushels or more at $4.25 per bushel. Write for special prices on large lots.

REUTER'S IOWA GROWN SEED CORN

FOR EARLY CROPS AND GREEN FEED

A great many of our customers prefer Northern-grown seed corn, as it matures very early, and is also good for late planting. For early green feed or silage, nothing can excel these sorts for early planting. The varieties that we offer have been carefully selected for our trade and are recommended to you with full assurance that you will be pleased. These particular varieties are perfectly adapted to the climate, as we have sold them for several years past. All the results are always satisfactory. Our seed is grown expressly for us in Iowa, the greatest corn state in the Union, the stalks are carefully butted and tipped, put up in even weight two bushel lots. After this stock arrives in New Orleans, every bushel goes through our big electrically operated seed cleaners, so you can't help but get the finest corn you've ever seen. Ideal weather conditions this past season enable us to offer you Iowa Grown Seed Corn that is truly without an equal.

Silver Mine—Our Iowa-grown Silver Mine Seed Corn is far superior to the ordinary commercial "seed stock offered by other seedsmen. Many large sugar planters in Louisiana have hundreds of bushels of this stock from us year after year, because of the quality of our seed, and it has never failed to give good results. Our local market gardeners also plant this superb fine variety for early roasting ears. For early green feed and slage, it is one of the best sorts for you to plant. Stalks medium in height, ranging from 7 to 10 feet, very early, broad blades and a lot of them. The type of this corn is very even and uniform; ears run from 9 to 12 inches long: 16 to 22 rows of pure white kernels solidly set on a medium open cob; ears well filled out at butt end and tip end. Matures in 100 days. For roasting ears, ready in 80 days. Prices, by mail postpaid: Packet, 10c; lb., 25c; 2 lbs., 40c. Not prepaid, by express or freight, peck (14 lbs.), $1.00; bu., $4.50; 2 bushels or more at $4.35 per bushel; 10 bushels or more at $4.25 per bushel. Write for special prices on larger lots.

Champion White Pearl—Described and priced on Page 20. A splendid early corn for feed or sprouting, or roasting ears, slage, or early corn. Matures in 100 days. Prices by mail postpaid: Packet, 10c; lb., 25c; 2 lbs., 40c. Not prepaid, by express or freight, peck (14 lbs.), $1.00; bu., $4.50; 2 bushels or more at $4.35 per bushel; 10 bushels or more at $4.25 per bushel. Write for special prices on larger lots.

YELLOW OR GOLDEN DENT SORTS

Early Learning—largely planted for early feeding especially in Louisiana, Mississippi, and other states. Our stock this season is surely fine. Germination 95% or better.

Prices, by mail postpaid: Packet, 10c; lb., 25c; 2 lbs., 40c. Not prepaid, by express or freight, peck (14 lbs.), $1.00; bu., $4.50; 2 bushels or more at $4.35 per bushel; 10 bushels or more at $4.25 per bushel. Write for special prices on larger lots.

Reid's Yellow Dent—Grains very deep, closely packed; butts and tips almost entirely covered over. Matures in about 110 days. Prices, by mail postpaid: Packet, 10c; lb., 25c; 2 lbs., 40c. Not prepaid, by express or freight, peck (14 lbs.), $1.00; bu., $4.50; 2 bushels or more at $4.35 per bushel; 10 bushels or more at $4.25 per bushel. Write for special prices on larger lots.

Iowa Gold Mine—Earliest of all Northern Yellows. Pure yellow, deep grains, splendid yielder. This corn is well liked by many planters in the South. It has helped to fill more than one silo, and is largely planted during the early spring for a quick green feed catch. Has been tried all over the South with wonderful results. Prices, by mail postpaid: Packet, 10c; lb., 25c; 2 lbs., 40c. Not prepaid, by express or freight, peck (14 lbs.), $1.00; bu., $4.50; 2 bushels or more at $4.35 per bushel; 10 bushels or more at $4.25 per bushel. Write for special prices on larger lots.

PRICES ON SEED CORN—Customers may order half pecks of field corn at peck rates; half bushels at bushel rates. Write us for SPECIAL PRICES, stating number of bushels you require, and we will be glad to quote deep, layered prices, also mail samples if desired. Last season we sold more than 20,000 bushels of Seed Corn. There is hardly a seed firm in the entire South that can match this record.
Reuter's Surecropper Corn

(INTERMEXICAN JUNE)

A Quick Maturing, Dependable Southern Corn—Resists Heat and Drouth Like Mexican June—Plant Early for Quick Crop—Plant Late for a Follow-Up Crop—SURECROPPER and Safest Corn for the Entire South.

PUT YOUR ENTIRE ACREAGE INTO SURECROPPER CORN FOR

(1) EARLY PLANTING  (2) LATE PLANTING  (3) POOR LAND  (4) RICH LAND  (5) DRY WEATHER

SURECROPPER CORN is taking the place of Mexican June Corn and Hickory King Corn, as it's the quickest maturing corn ever planted in the South. It has large white grains on a white cob. The ears are so large as some varieties, but REUTER'S SURECROPPER will make a good ear. Where other corn will fill entirely, it is a sure-crop every time.

THE QUICKEST AND SUREST CORN FOR THE SOUTH—It usually makes roasting ears in about 60 days and matures in about 110 days. Shells 82 to 85% grain. It is two weeks earlier than common native corn. It is early, like Northern corn, but has a great advantage in its drouth-resisting qualities. It usually yields twice as much as Northern varieties.

It is an "EARLY CORN" for spring planting or a "quick-maturing" corn for summer planting on stubble lands or potato lands or where crops have been killed out. Its many good qualities have made it widely popular. It is thoroughly adapted to the South and will do well in every cotton state. It has proved to be a wonderful yielder in Texas and Oklahoma, also in central and northern Louisiana and on up into northern Arkansas.

WHAT THE FARMERS SAY ABOUT REUTER'S SURECROPPER CORN: "I planted Surecropper Corn on May 30th after cultivating a crop of potatoes and it made roasting ears in less than 60 days. By planting Surecropper I have made two crops off the same land this season."

"I planted Surecropper Corn on July 8th and on August 17th I sold roasting ears from this field."

Hickory King—This is a white variety of field corn which has the largest grains with the smallest cob of any corn in existence. The grains are so large and cob so extremely small that when the ear is broken in two pieces, a single grain will cover completely the cob section. Matures in 100-125 days, depending on weather conditions. It husks and shells easily. Prices, by mail, postpaid: Pkt., 10c; lb., 25c; 2 lbs., 40c. Not prepaid, by express or freight, peck (14 lbs.), $1.50; bushel (56 lbs.), $4.50; 2 bushels or more at $4.25 per bushel; 10 bushels or more at $4.25 per bushel.

Imperial White—The most popular white dent seed corn for the reclaimed lands of Louisiana. It resists drouth and moisture better than any other variety. Does equally well on uplands. It is a large white corn, the ears are from 8 to 10 inches long, having 18 to 20 rows of kernels to the ear, producing an ear that is not unusual to find from 600 to 1,000 well-formed kernels in it. Cob is rather small, the weight of the ear runs unusually high. The ears are well shucked, protecting the grains from birds, insects and unfavorable weather. As the corn is quite hard, it is highly resistant to weevils.

Classhown Red Cob—This is undoubtedly the best known non-prolific variety of corn in Louisiana and Mississippi. Its good qualities as to yield and shelling are well known to practically every farmer. Cobs are usually deep red in color and the kernels white and yellow. Matures in 130-150 days from planting.

Prices, by mail, postpaid: Pkt., 10c; lb., 25c; 2 lbs., 40c. Not prepaid, by express or freight, peck (14 lbs.), $1.50; bushel (56 lbs.), $4.75; 2 bushels or more at $4.25 per bushel; 10 bushels or more at $4.25 per bushel.

Surecropper Corn—We select our seed from stock like this.
REUTER'S IMPROVED GOLDEN DENT CORN

A Hardy Texas Grown Yellow Corn Almost the Same as Ferguson's Yellow Dent or King's Golden—Our Stock Is an Improved Type of This Variety grown Expressly for Our Critical Trade in the Cotton States—Carefully Selected from the Original Type and Will Be Found More Generally Satisfactory Than The Average Seed Offered Elsewhere

THE BEST HIGH YIELDING YELLOW CORN FOR THE SOUTH—PROVED BY EXPERIMENT STATION TESTS. The original stock of this corn has been improved 15 years for Southern planting. It is now the most popular Yellow Dent Corn with farmers in the Southwest, and will eventually be planted upon thousands of acres throughout every part of the Cotton Belt.

It is a MEDIUM EARLY VARIETY, usually maturing from 120 to 130 days from planting. The ears are bony and well shaped (note photographic reproductions on bottom of page), usually 7 to 10 inches long and about the same in circumference. It will mature considerably in advance of most ordinary southern varieties. It makes a strong stalk that stands up well in stormy weather. The ears are surely beautiful, 80 to 88% grain and you will find that a large number of the stalks will bear two ears. The legal stand calls for 80% grain.

HAS BEEN TRIED, TESTED, AND PROVED EVERYWHERE IN THE SOUTH.

REUTER'S IMPROVED GOLDEN DENT is a good pointer, on uplands and makes splendid crops of large ears on bottom lands. This corn has been developed and tested so many years side by side with other selected varieties, that there is no question about its adaptability and dependability. It has been tested by Experiment Stations of several states and has led in yield and quality of ear and grain, so often, that it has become the most sought after Yellow Dent Corn in several Southern States.

YIELDS 75 to 80 BUSHELS TO THE ACRE EASILY—It is a high yielder on uplands and produces magnificent results on bottom lands, as I have mentioned above. It will produce abundant yields of fine

Mexican June (Genuine)—This dependable variety, largely planted late in the spring throughout the entire Cotton Belt, originally came from Mexico. It is largely used for planting after oats and wheat. We do not advise sowing before May 1st if grain is wanted and can be planted as late as August 15th with good results. The stalks are usually short, although early planting makes stalks 12 to 15 feet high, leaves four to six feet long. The roots run deep and spread, so that it is a splendid drouth resistant. Ears 8 to 10 inches long, grains short to medium, cob medium in size, and while usually white, occasionally you'll find a red cob and a few blue grains. This apparent mixture of color is peculiar to many varieties of Mexican corn. Mighty fine for "roasting ears" or use right up to frost.

Prices postpaid: Pkt., 10c; pound, 25c; 2 lbs., 40c. Not prepaid, by express or freight, peck (14 lbs.), $1.50; bushel (56 lbs.), $4.75; 5 bushels or more at $4.50 per bushel. Write for special prices when ready to buy.

Yellow Creole—A Weevil-Proof Flint Corn that makes good in every cotton State. We've tried it in various ways to take well to this variety, but all kinds of stock relish it immensely. This is the hardest-grained corn you ever saw, and better than most varieties, and stands more wet weather than a duck. Yields 40 to 60 bushels to the acre depending upon the soil and conditions.

Prices postpaid: Pkt., 10c; lb., 25c; 2 lbs., 40c. Not prepaid, by express or freight, peck (14 lbs.), $1.50; bushel (56 lbs.), $4.75; 5 bu. or more at $4.50 per bu.
GOOD COTTON SEED IS SCARCE AND HIGH

WANNAMAKER'S IMPROVED PEDIGREE CLEVELAND BIG BOLL COTTON

Our PEDIGREE CLEVELAND is a new variety and entirely different and far superior to the original Cleveland or other strains of the Cleveland. For many years we have endeavored to secure a superior strain of BIG BOLL COTTON that would eclipse anything in the way of cotton varieties, and feel justified in offering you this pure-bred type of a wonderful BIG BOLL COTTON, for it is heads and shoulders above any sort we’ve ever handled.

Our stock is PEDIGREE. Every plant that is grown this year, or years to come, can be traced back through record yielding plants to the single superior plant selected in 1908, when our careful growers began to breed this variety to the exclusion of all others, by means of the stalk-to-row plat and breeding plots, from single-stalk-selection, which enables our seed to give more uniform and satisfactory results than other strains. Every stalk grows, fruits and lints alike; the field is uniform in growth and height, something beautiful to behold and to be proud of.

The breeding methods are thorough and systematic. They assure that our PEDIGREE CLEVELAND is not only kept up to its present standard of productivity, but is improved and bettered from year to year. It is only by persistent and skillful selection and cultivation that a variety can be kept up and improved. There is a constant tendency to revert, or go back, to a former or less excellent type.

It is EARLIER than other strains, with greater productivity and therefore better than any other cotton, either for BOLL WEEVIL or no boll weevil. It is free from disease, because it is selected for immunity. Not a diseased plant is saved, but discarded.

The PER CENT OF LINT, its crowning point, is from three to six per cent. higher than other strains of the same cotton. This not only makes it more productive, but reduces the cost of picking and improves the soil less.

DESCRIPTION OF PLANT. Each pedigreed and true to type throughout; weed growth unlike other strains—medium to small, strong, erect, and as broad as high, three to four primary limbs from low down; fruit spurs numerous, long and closely joined; bolls equidistant and evenly distributed over the entire plant, as thickly set as the bolls of small-bolled cotton, large 30 to 55 average size bolls to the pound, open perfectly, five-locked, easy to pick, with storm resistance, free from boll-rot; lint of fine quality and one inch in length; seed of medium size, grey, fuzzy, foliage medium to light, dark green; very early and sets fruit closely and rapidly from bottom to top crop, which is never caught by frost, and can be picked early in boll weevil territory in order to destroy stalks early.

At the Georgia Experiment Station, since 1916, when it was first tested, Cleveland has averaged first in close competitive tests with the cream of twenty to thirty-four other prominent varieties. At the Mississippi Experiment Station it averaged first with the same competitors during the years 1906, 1907 and 1908. Besides taking the highest rank of the first importance, namely productivity, it also had the advantage of being early; of large bolls, making it easy to pick; and of quality and length of staple, etc. Col. R. A. Redding, former director of the Georgia Station, after seventeen years’ experience testing varieties of cotton, pronounced Cleveland "Best-ever variety I have ever tested."

The Georgia Experiment Station on test had Cleveland Big Boll heading a list of 20 varieties, as producing 2825 lbs. of seed cotton per acre; 57 per cent of lint; 1035 lbs. of lint per acre; 76 bolls per pound of cotton. In other competitive tests Wannamakers’ Cleveland has proved up, for in one year the per cent. of lint showed 39.4 and in another 33.9—note this uniformity of lint turnout.

Besides the advantages of the greatest productivity, highest percentage of lint, big bolls, etc., of our PEDIGREE CLEVELAND it has special advantages over other strains for boll weevil territory. Its advantage as to earliness is equal to that of Kings, Simpkins, and other similar varieties, with much greater productivity, and ease of picking on account of large bolls. It is not only much earlier, but on account of its being a PEDIGREE cotton, each plant matures early and opens over the entire plant at the same time. This unquestioned uniformity is an added advantage in gathering all the cotton early and plowing under the stalks.

Prices: By mail, postpaid: Lb. 35c; 3 lbs. $1.00. Not prepaid, by express or freight, peek ($1.25); 1 bu. (50 lbs., Louisiana Legal Weight), $1.50; 10 bu. (300 lbs.), $12.00; 100 bu., or more, at $14.00 per bu. Ask for special freight rates on cotton seed to your point from New Orleans, the greatest cotton market in the U. S. A.

HAWKINS’ PROLIFIC BIG BOLL COTTON—(Originator’s Pure-bred Seed Only)

An extra early-extra-prolific, BIG BOLL COTTON that has proved to be a mainstay in all cotton states. It sets ahead of the BOLL WEEVIL every time, and has proved to be a money-maker for many cotton planters in the South. Why plant scrub seed when you can take the best cotton in the world, such as HAWKINS’ PROLIFIC BIG BOLL, and at a small cost per acre almost double your yields? This is one of the earliest, most prolific, easiest picked and of most superior lint, and finest staple; tall-growing; long tap root, resisting drought; from two to four limbs near the surface branching two short limbs together all the way up to the top, all literally covered with big, white bolls; light foliage; large bolls, small seed. Light gray or dark green yielding 38 to 40 per cent lint, and sometimes even more. Opens well, growing much taller than other sorts, giving every advantage over variety other varieties.
Extra Early Varieties for Boll Weevil Sections

**Early King**—I believe that this one variety of cotton has done more towards helping the South combat the boll weevil than any other agency that has been employed. There are many varieties of cotton on the market, and a number of them are truly worthy and valuable. But none of these have been equal to Early King in average conditions of fertility, rainfall and climate are considered. However, since the advent of the boll weevil all other conditions have become secondary to this devastating pest. A cotton which is not a quick and prolific boll maker cannot produce a long season, it is evident. Early King is characterized by an ability to produce a good boll as early as possible in the season. It comes true to its name. Earlier, it is the most populous variety of the boll weevil is planted, the sharper and more matured, and rush it through to maturity before many generations of boll weevil have had time to come forth. REUTER’S EARLY KING COTTON is just such a cotton. It has been making a good crop wherever planted, in spite of the boll weevil. It required fifteen years of selecting, proving and testing before one variety was ever succeeded in perfecting this wonderful improved cotton. A small boll, short staple variety, early, very prolific; it beats the weevil to a frazzle. This cotton is today the peer of any cotton, for it blooms in 60 days and is ready for picking in 90 days, and is ready for picking in 120 days. This cotton is almost entirely immune from the cotton boll weevil. It has held the record as the best boll weevil dodger cotton yet produced. And it has stood the test of every variety with every assurance that it will make a bale to the acre, provided the right kind of cultivation, fertilization and care is taken in producing the crop. Prices: By mail prepaid, lb., 25c; 5 lbs., $1.00. Not prepaid, by express or freight, peck (7½ lbs.), $1.25; bu. (30 lbs.), $3.75; 10 bushels, $35.00; 50 bushels or more at $3.40 per bushel. Write for special prices on ton lots.

**Simpkin’s Prolific (Ideal)**—A medium size boll, very prolific, quick maturing variety that is well adapted to boll weevil sections. This variety is the nearest absolute storm-proof cotton grown at the northern edge of the belt. It grows a strong, hardy, weed, limbs out close to the ground, and fruits early and stands well. It has not been planted in the past, but in 18 inches apart in boll weevil sections. This character of planting gives the plant ample room, and with its scant foliage plenty of sunshine gets to all parts of the plant, which retards the spread of the boll weevil. It has been planted from one to three years in some sections, has become well known throughout the South, and extended description is unnecessary. Simpkin’s is acknowledged to be the hardest, most prolific variety, with the possible exception of my Early King. Simpkin’s has produced as much as three bales to the acre, averaging 40 per cent lint, and in tests made at the Arkansas Experiment Station it is rated first out of the twenty-eight varieties. We have not enough seed of any variety to fill all our orders this year, but I urge you to place your order with the as early as possible, as the indications point to a big demand, and it is problematical whether there will be a sufficient quantity of strictly high-grade North Carolina seed to fill all orders. This is the early season, the most pestilential, and it is believed that all cotton should be planted in the Cotton Belt. It has held the record as the best boll weevil dodger cotton yet produced. And it has stood the test of every variety with every assurance that it will make a bale to the acre, provided the right kind of cultivation, fertilization and care is taken in producing the crop. Prices: By mail prepaid, lb., 25c; 5 lbs., $1.00. Not prepaid, by express or freight, peck (7½ lbs.), $1.25; bu. (30 lbs.), $3.75; 10 bushels, $35.00; 50 bushels or more at $3.40 per bushel. Write for special prices on ton lots.

**Bank Account—**This is one of the EARLIEST, EXTRA PROLIFIC, BOLL-WEEVIL RESISTING VARIETIES for you to plant this year. It gets ahead of the boll weevil. It is a prolific, very late, the first of the staple cottons in the boll weevil sections. It opens earlier than other early earlies, and it doesn’t blow out or drop out as quickly. It’s a heavier bearer, and makes better and longer lint. It roots deeply, resisting both drought and storms. It branches well, and has light, open foliage, letting in the dense shade for the boll weevil to hide away in. It fruit from the ground to the top. Contains 40 to 45 per cent lint. This cotton has been tried under all kinds of soils and conditions from one end of the South to the other, in uplands and bottom lands, and it has made good everywhere. We offer the best cotton grown for the cotton grower. Prices, by mail postpaid: lb., 35c; 3 lbs., $1.00. Not prepaid, by express or freight, peck (7½ lbs.), $1.25; bu. (30 lbs.), $3.75; 10 bushels, $35.00; 50 bushels or more at $3.40 per bushel. Write for special prices on ton lots.

**Toole’s Prolific**—Extremely prolific, matures early and holds on the market. King’s; but is taller, more prolific, more limby, lint longer, bollier, bollier than King’s. Recommended and distributed in boll weevil sections by the United States Government. Grows 40 to 45 per cent. Height 6.83 feet. Small seed. We offer the finest North Carolina grown seed. Prices, by mail postpaid: lb., 35c; 3 lbs., $1.00. Not prepaid, by express or freight, peck (7½ lbs.), $1.25; bu. (30 lbs.), $3.75; 10 bushels, $35.00; 50 bushels or more at $3.40 per bushel. Write for special prices on ton lots.

**UPLAND LONG STAPLE COTTON SEED**

No other part of the cotton belt has produced Upland Long Staple Cotton of such high quality as the lower Mississippi. Georgia, Louisiana and Mississippi, and the planters in this section should take full advantage of the favorable natural conditions. The planting of early maturing boll staple cotton was advised to make the best use of the favorable season. The early weevil invasion, as a means of avoiding complete loss of crops. This was because of the late maturing habits of the lower Mississippi districts, and the early boll weevil invasion rendered them susceptible to weevil injury. WEBBER 49 is an earlier long staple variety, and it is believed that this variety offers the producer the best chance of maintaining a permanent cotton crop in the South and the Long Cotton Belt. It can be grown in sections of Texas, particularly in the Red River Valley. WEBBER 49—This is one of the very best long staple cotton, as it is a heavy fruiting variety. It is a very high quality variety, and it does a very good job. One of our customers in Mississippi said he used his entire crop of WEBBER 49 at 90c per pound when he sold it. Cotton prices are very high, and he brought 25c to 30c per pound more. You can produce as much cotton as you can make by planting long staple cotton, and the returns are surely much greater. Prices: By mail, postpaid, lb., 45c; 5 lbs., $1.50. Not prepaid, by express or freight, peck (7½ lbs.), $3.25; bu. (30 lbs.), $9.00; 10 bushels, $35.00; 50 bushels or more at $3.40 per bushel.

**Prices on Cotton Seed Subject to Change Without Notice.**
The value of sugar cane as a hay crop is yearly becoming better known and appreciated by thousands of farmers in the South. The Saccharine Sorghums are superior to others for fodder, and produce the best green food that can be grown for feeding horses, cows, etc. The sorghum plant is a strong, rapid grower and a greedy feeder, so that it succeeds better on a deep-rich, moist soil. Stable manure is an excellent fertilizer. The best time to plant this crop for forage is from about March until the last of July. The seed can be planted in drills from two to three feet apart, and the crop fertilized, or they may be sown broadcast. Use about one-half bushel to the acre where sows in drills, and use 100 to 150 pounds per acre when sown broadcast. Two cuttings can always be made and sometimes three or more. All our cane seed is received by the best machinery. We do not purchase cheap farm stock, full of broken grains and very dirty. Pay a little more and get the best. Prices on cane seed fluctuate. Write for prices, stating quantity desired.

**TENAX SEED RIBBON CANE FOR SYRUP, FORAGE AND SILAGE**

The increasing demand for TEAX SEED RIBBON CANE from all sections of the South for syrup, forage and ensilage purposes is truly wonderful. Every year we anticipate a bigger call for the seed, but never yet have we been able to satisfy the full requirements of our customers. No doubt the superiority of this cane over other sorghums is the principal reason, but we honestly believe that our customers really want to secure thoroughly re-cleaned stock, free from trash and dirt, and absolutely true-to-name and variety. We have hundreds of letters of praise from our customers in the last season and none of our seed, which is far superior to anything on the market. The stalks grow from 12 to 15 feet high, ready to cut out and grind the latter part of August, and is not usually ready to cut before October. Cut with the forkage and run through the mill, it makes the finest kind of ensilage for all kinds of stock. The yield of mashes is from 150 to 200 gallons per acre. It will grow anywhere that sorghum will grow as for sorghum. Plant in rows 3½ feet apart, eight to ten pounds will plant an acre if planted in drills. The Texas Seed Ribbon Cane is sweeter than the Orange, the syrup is lighter colored, which is preferable, and it is as sweet as honey.

**Our Seed—** We have the very best cultivated and selected seed that is procurable.

My stock is grown expressly for seed purposes, and will, on the average, produce bigger crops than the straight, or purchase elsewhere. Most of the seed sold in the South is very much mixed with other sorghums. Our stock is the straight-head shaded Texas Seeded Ribbon Cane Seed. Prices, by mail postpaid: Packet (4 oz.): $1.00; box, (25 lbs.): $5.00; 100 lbs., $25.00.

**Japanese Honey Cane—** Known in many sections as the Japanese Seeded Ribbon Cane. Herefore the raising of sorghum for molasses purposes has been greatly reduced in those sections where Louisiana Cane Ribbon Cane could not be grown with any degree of success, on account of the peculiarities of the Louisiana product. But today some of the leading molasses dealers in the large markets are bidding very high for the molasses produced in the state, and in instances producers have sold their molasses at 75 cents per gallon when ordinary sorghum molasses was selling at 45 to 50 cents per gallon, and Louisiana Ribbon Cane Molasses was bringing more than 55 to 70 cents a gallon. The most striking feature about this splendid cane is the exquisite, delicious flavor of the molasses, though the delicate light color also has something to do with it. Prices: By mail postpaid, packet (4 oz.): $1.00; (1 lb., 3 oz.): $3.00; (10 lbs., 6 oz.): $20.00; (50 lbs.): $60.00; (100 lbs.) $110.00.

**Early Amber—** The leading and most popular saccharine sorghum for early green feed or silage purposes. It is the earliest sort, and makes the finest kind of hay green or curried, which is relished by all stock. No farmer can make a mistake by selecting this variety for green feed or silage purposes. Also makes syrup of excellent quality. Be careful about your sorghum seed this year for lots of folks are offering last year's seed of poor germination. Our seed is absolutely non-crop seed (10lb) and germinates 90% or better.

**Prices:** Postpaid, packet (4 oz.): $1.00; (1 lb., 3 oz.): $3.00; (5 lb., 6 oz.): $25.00; (50 lbs.): $60.00; (100 lbs.) $110.00.

**Red Top Cane (Sumac)—** This has proved to be a very valuable variety in the Southwest, also largely planted throughout Arkansas, Tennessee, and other Southern States. It possesses the same good qualities of the Amber syrup, but is not so desirable for sugar. It produces an immense quantity of feed. Splendid for silage and green feed, and is also excellent for hay. Our re-cleaned seed is absolutely new-crop, of high germination, and true representative of the best Crimson Early Amber.

**Prices:** Postpaid, packet (4 oz.): $1.00; (5 lb., 8 oz.): $3.00; (50 lbs.): $60.00; (100 lbs.) $110.00.

**BROOM CORN—** Evergreen—** There are many farmers who make this a most profitable crop. One acre will produce five hundredweight of brush and nearly 40 bushels of seed. It is a very good crop for dry-land farming, and can be grown almost anywhere where sorghum will mature satisfactorily. The straw sells at $2.00 and more per ton and has very little value for feed, as neither the stalks, binne nor leaves are marketable. The market price is $1.00 per ton for feed. Prices: Postpaid, packet (4 oz.): $1.00; (1 lb., 2 oz.): $3.00; (5 lb., 6 oz.): $25.00; (50 lbs.): $60.00; (100 lbs.) $110.00.

**Early Orange—** With taller and heavier stalks than the Early Amber, although not quite as early nor as popular as the Amber. A splendid producer. It is considered better for syrup purposes. Also desirably adapted for feed. Prices: Postpaid, packet (4 oz.) 10c; (1 lb., 3 oz.): 65c; (5 lb., 6 oz): $1.25; (10 lbs., 8 oz.): $6.50; (100 lbs.): $60.00.

**Market Prices—** When this catalogue goes to press it is impossible for us to give you close prices on sorghum varieties, kaffir corn, etc. We want you to write us for delivered prices when ready to buy in quantity. We can often save you money. We are always glad to show you the lowest cost price delivered at your station, and mail samples when required.

**Early Amber**

Almost to 500 gallons to the acre in reported instances, is a powerful factor in bringing about its remarkable growth in the favor of its producers. Matrices in 120 to 130 days. It sends up from two to four stalks, which reach a height of 11 to 11 feet. Considering the wonderful range of solids which will not produce Louisiana Ribbon Cane with any profit at all, and, in addition to this, a superiority of flavor which is putting the molasses made from this cane on the same list as the Louisiana cane, we cannot help feeling that the problem of a molasses cane has at last been solved for the farmers of the South. Mr. H. L. Ellington, a good customer of ours in Mississippi, wrote us claiming from 50 lbs. of seed to have produced about 1,000 gallons of syrup which he sold from 50c to 65c per gallon. With a full list of testimonials from our customers on Japanese Cane seed alone. In view of the tremendous demand for seed of the early variety, several of our customers have prepared for themselves with a large stock of thoroughly re-cleaned, fresh seed absolutely free from trash and dirt. If you want our best price, write for a sample of the best seed we have to offer you at the following reasonable prices:

**Texas Seed Ribbon Cane**

The Texas Seed Ribbon Cane is sweeter than the Orange, the syrup is lighter colored, which is preferable, and it is as sweet as honey.
Feed and Forage Crops for the South

Egyptian Wheat (Shallu) - It is a variety of sorghum that is wonderfully prolific and should be planted the same way, either for grain or fodder. It grows remarkably well with little moisture. The great value is in the seed which is most abundant for both for the poultry, and in fact all stock on the farm. Fifty to 100 bushels of seed may be grown on an acre. It should be threshed as wheat or other grain. It would prove far more valuable to grind the seed for all stock except poultry. As it is a bonus 80 per cent, of the feeding value of our common corn as a food for stock, it can be made far more valuable as a stock food on many farms than our common corn. Even if the farmer does not want to grow it for the farm stock, he should plant a sufficient acreage for making ample supplies for all poultry on the farm. It is planted once and then the same as sorghum or Milo. If it is used for fodder purposes, it may be cut about three times a year, yielding the three cuttings from seven to eight tons per acre.

Genuine Dwarf Milo Maize - Grows only about four feet high and makes a small stalk as compared with the old type of Milo Maize. The stalks are short, but large, and stand up remarkably well. The heads are large; so are the seed. It is more resistant to the Kaffir Corn and Stand Milo Maize. The yield is from 60 to 100 bushels to the acre, and the stalks are a straight棵ed variety, which is an invaluable feature in gathering, feeding and cutting the heads. It will stand greater drouth than any other sorghum known, and for that reason it is admirably adapted to dry farming. Should be extensively grown; in fact, every farmer should plant a few acres, for if drought comes he will be sure of feed. Should be planted about the 1st of April until August 1st. Every farmer should plant a few acres of the said, from the seed to the horse, will eat and fatten upon the seed.

Prices, postpaid: Pkt., 10c; pound, 25c; 2 lbs., 50c. Not prepaid, by express or freight, peck (12½ lbs.), $1.25; bu. (50 lbs.), $7.50; 100 lbs., $17.50.

Red Kaffir - Jewly and very

Jerusalem Corn (White Durra) - This is very similar in every respect to the Dwarf White Milo Maize. It is considered by some the greatest drouth resister of all the sorghums. The yield of this corn is flat and nearly white, which is a great advantage for dry-land farming. From five to six bushels to the acre. Prices, postpaid: Pkt., (4 ounces), 10c; lb., 50c; 2 lbs., 80c. Not prepaid, by express or freight, peck (12½ lbs.), $1.25; bu. (50 lbs.), $7.50; 100 lbs., $17.50.

Feterita - The Great Drouth Crop - A truly grand forage plant that was brought from Egypt in 1907. Similar to Kaffir Corn in general habit, but grows a little taller and produces larger heads, standing erect. The heads grow long and slender and measure from 12 to 18 inches in length. The seeds are red, smaller than the White Kaffir, but larger and better adapted than the Kaffir Corn. Everything considered, it is regarded as one of the most profitable plants for dry-land farming. From five to six bushels to the acre. Prices, postpaid: Pkt., (4 ounces), 10c; lb., 50c; 2 lbs., 80c. Not prepaid, by express or freight, peck (12½ lbs.), $1.25; bu. (50 lbs.), $7.50; 100 lbs., $17.50.

Plant Plenty - No farm will likely produce this coming year more feed and forage than is needed or easily marketable - too many will probably not produce nearly enough for home needs. I therefore suggest that you make sure that your plans call for sufficient acreage in forage and feed. Check over your order before sending it to me and see if you have remembered every variety of field seeds you should plant.

REUTER'S RECLEANED CLOVER SEED

A Business Proposition—I have become such a “crank” in the trade with clover and farm seeds of quality and cleanliness that many tell me I am becoming a bore. I am a crank to tell you it is merely a plain business proposition. If I contract and purchase a lot of seed from a grower and find the delivered product quality all the way through I have confidence in the grower, who will have to prove it to me. I figure that the practical farmer does business on the same sensible basis. Therefore, I equipped my establishment with the best electrical cleaners that I could find, and every lot of field seed that comes into warehouse is thoroughly cleaned, so that my customers will receive nothing but clean, plump, plantable and productive seed. There’s no waste when you secure your seed in this manner and add to the value of your land, for the seed is a part of your land. It occupies a valuable part in the life of the soil and makes it more fertile. It is a means of conserving the surface of your land and helps to prevent it from erosion. Order Reuter’s Recleaned Clover Seed and give your land a fair chance!

Lespedeza or Japan Clover—This is without a doubt the very best of all clovers for the Pacific Coast. It is prolific, of the best quality, and withstands quick, hot, dry weather, and is sown from 12 to 15 pounds per acre. When sown alone, 2 to 3 pounds per acre; when sown with other clovers, half this amount will be sufficient. ***Prices, by mail, prepaid: Packet (4 ounces), 25¢; 1 lb., $1.00; 10 lbs., $8.00. By express or freight, not prepaid, in quantity lots, about 75¢ lb. Write for special prices when ready to buy.***

White Bokhara or Sweet Clover—Sweet Clover is an important crop that is much used in Argentina and other parts of South America. It makes a good hay and is a valuable pasture crop. It is most suitable for the northern parts of the United States and Canada. ***Prices, by mail postpaid: Packet (4 ounces), 25¢; 1 lb., $0.50; 10 lbs., $5.00. Not prepaid, by express or freight, in quantity lots, about 75¢ lb. Write for special prices when ready to buy.***

Alyssum—Also known as Swedish Clover. Under arid conditions it grows from one to two feet high, and is valuable for pastureage and sowing. It is a good hay and is a valuable pasture crop. It is most suitable for the northern parts of the United States and Canada. ***Prices, by mail postpaid: Packet (4 ounces), 25¢; 1 lb., $0.50; 10 lbs., $5.00. Not prepaid, by express or freight, in quantity lots, about 75¢ lb. Write for special prices when ready to buy.***

ALFALFA—The Money Crop—Sweet Clover and alfalfa are the most important crops for the Pacific Coast. Sweet Clover is a valuable hay and pasture crop, and alfalfa is a valuable hay and pasture crop. ***Prices, by mail, prepaid: Packet (4 ounces), $0.25; 1 lb., $1.00; 10 lbs., $8.00. Not prepaid, by express or freight, in quantity lots, about 75¢ lb. Write for special prices when ready to buy.***

Hair Peruvian (Genuine) Produces three tons more hay than ordinary alfalfa. A long season variety, adapted to the South and Southwest. A vigorous grower, withstands heat and cold wonderfully. Stock all 1 lb. ($1.00), 10 lbs. ($8.00), 50 lbs. ($40.00). Not prepaid, by express or freight, in quantity lots, about 75¢ lb. Write for special prices when ready to buy.

Red Clover—Southern farmers are fast realizing the great value of Red Clover as a high-class hay crop and for fertilizing, but many have yet to learn the importance of quality in clover seeds. I guarantee my Red Clover Seed 98 per cent pure or over. I am selling an increasing quantity each year, and my customers report most satisfactory results. This variety is largely planted in Louisiana, Mississippi, Georgia and other Southern States, being admirably adapted to the hill parts of the South, especially the sugar lands of Georgia, Alabama, Mississippi, and States farther south. It makes three or more cuttings of hay each season, and is fine for pastureage in combination with other clovers and grasses. Seed should be planted in the fall when the weather is cool and moist, to a depth of 1 to 2 lbs. or more, according to the soil and season. ***Prices, by mail, prepaid: Packet (4 ounces), 25¢; 1 lb., $1.00; 10 lbs., $8.00. Not prepaid, by express or freight, in quantity lots, about 75¢ lb. Write for special prices when ready to buy.***

Market changes constantly, and this part of the Catalog goes to press in October. It is impossible to name prices at which Clover Seed will sell in the Winter or Spring. All Clover Seed very scarce.
PEANUTS---Cheapest Pork Producer

The South's Prosperity Pasture Crop

"Pigs and Peanuts" should be the slogan of the Southern farmer during 1960, for in the peanut world is in dire need of one. High in protein fat and the peanut is probably the most economical pasture crop in the South for fattening pork, and for years to come is certain to be high-priced. With a crop of peanuts and a bunch of hogs and just enough corn to feed them, any farmer can add a fat hog to his bank without any fear of a hog buyer who will gather the crop for him. Peanuts produce a highly profitable crop, are economical to raise and do not detract from the farm, and if handled properly add fertility to the land. The Federal Bureau of Agriculture, in discussing the feeding value of peanuts, says: "In the peanut proteins we have found more than in the weight-producing steers. The carbohydrate vegetable or seed substance which has been analyzed up to the present time is the least we know that peanuts will produce weight in hogs faster than anything else, and some rough estimation that pounds of peanuts—that is, just roughage, peanuts, not press cakes—will increase the weight of the hog just 100 pounds for the nearly 400 pounds of shelled corn to do the very same thing." From various experiments at State stations the conclusion is reached that an acre of peanuts will produce an average of 400 pounds of pork. Is it profitable? Being a most efficient legume, this adding valuable store of nitrogen to the soil, the pean-

in Ninety Crop Ton High, Easily

It posits that the new crop, selecting peas exclusively from well-ripened, mature plants that produce the later on. The seed is not properly cured and after the seed reaches me it is kept in dry storage throughout the winter months so that it reaches the farmer in proper condition. You will find sure, given good planting and soil conditions, of a fine, even stand which means increased yield.

Spanish Peanuts—This variety should be planted for

forage and feeding purposes. Under small-podded variety, very productive, shoots upright, foliage abundant and heavy; pods clustered about base of plant, usually two seeds in each pod; color of pod yellow. It is well suited, here well to plant in digging. This variety, properly handled, will plant peas, and a ton of hay to the acre. This variety is also used exclusively for oil mill purposes. In the far South where planting can be done in March and April two crops can be grown in the same year, for the second crop being planted early in May, makes a good hay yield as well as feed crop. Prices: postpaid pk. (7 lbs). $1.10; bu. (25 lbs). $3.00. Prices fluctuate.

Tennessee Red—Small-podded variety; similar to Spanish except that the pod is shorter, some

times containing five to six peas crowded together; peas dull red in color. This variety is well adapted to stock feeders, but does not depend upon the market owing to color and quality of the peas. Prices: Postpaid pk. (1 lb). $1.00. Not prepaid, pk. (7 lbs). $1.50; bu. (25 lbs). $3.60. Prices fluctuate.

UPLAND RICE—Lands having a reasonable auburn field. Any small-podded variety can lose its color. Prepare the land and cultivate as for corn, except the rows are only 8 inches apart. The land is better in the middle of the field sweep, usually sufficient for a working, and the hills just far enough so it can be hoed. Plant as early in April as you can. Drop 10 to 20 seeds in each hill and keep a little closer on hills than in cotton. Keep down grass and weeds until the rice begins to head. It usually ripens last of August or early in September. Requires about 15 bushels of seed to the acre. Prices: postpaid pk. (1 lb). $1.00; bu. (44 lbs). $3.00.

SUNFLOWER—Mammoth Russian—The sunflower, a cultivated crop in Asia and Europe and to some extent in Canada and the United States, principally for its oil and seeds. The Mammoth Rus-

in Giant Beggar Weed, measuring from 12 to 20 inches in diameter. On light,

BUCKWHEAT—A very desirable and profitable crop for

Buckwheat. A very desirable and profitable crop for

Plant CHUFAS
COMMONLY KNOWN AS
Earth Almonds
A Wonderful Hog Feed

The chufa is a species of ground nut, sometimes called the "earth almond." Chufas are very prolific and when properly planted and cultivated, the ground is thoroughly permeated with the nutritious nuts. The seed make excellent feed for hogs. This feed remains in the ground without rotting throughout the winter. This is a great advantage, as then the hog can gather its own food. Thus, from September to April you have a GRANARY for your hogs in the ground.

The testimony of chufa raisers gives almost incredible results as to the quantity that can be produced per acre. Among these are accounts of yields ranging from two hundred to a thousand bushels per acre.

A stand of chufas should be narrow enough so that new cultivation should be determined by the nature and condition of the soil. For average land, two hundred pounds to the acre is sufficient. A bushel of chufa seed will easily plant two and a half acres. Chufas do not require much cultivation and are easily cultivated, as the above-ground part of the plant stands upright.

CHUFAS ARE EXTREMELY SCARCE AND HIGH. OUR LIMITED STOCK IS EXCLUSIVELY FINE.
Prices, postpaid: Lb., 45c; 3 lbs., $1.25. Not prepaid, by express or freight, peck (11 lbs.), $3.00.

Jerusalem or Ground Artichokes—Any farmer who grows hogs and does not have some Jerusalem Artichokes to feed, is neglecting one of the most important hog-food items. The artichoke quickly fattens hogs, and it is said by many hog raisers that hogs fed on Jerusalem Artichokes have never been known to have cholera. Only a small quantity of seed is required to plant a bushel of artichokes. Three to five bushels per acre are sufficient. The tubers should be cut into small pieces, and not more than two of these should be put in a hill. The hills may be six to eight inches apart.

Five hundred bushels have been yielded off an acre, and sometimes considerably more. Milk cows do well when fed on the roots and stalks. The tops are cut off and used as hay. A large acreage is grown during March and April during the spring of 1929 and your stock will improve in health.

Prices, postpaid: Lb., 3c; 3 lbs., 75c. By freight or express, not prepaid, peck (12-1/2 lbs.), $1.00; bushel (50 lbs.), $2.50; bbl. (150 lbs.), $7.50.

PLANT MILLETS for QUICK "CATCH" CROP

Tennessee Golden Millet—(Illustrated)—Before the big war this variety was known as German Millet. We like the present name much better. It is an important large yielding and most nutritious hay crop, quick-growing and easily cured. It ought to be seeded thickly—not less than one bushel to the acre—and the crop should be cut while in bloom before the seed hardens in the head. If the seed is allowed to form, the stalks get hard and do not make nearly as good quality hay, and at the same time it is more exhaustive to the soil. It can be sown anytime from the middle of May until the end of July, although some farmers sow earlier, while others continue planting during August. Its a quick crop, matures in 4 weeks after seeding. Don't sow too early; as it does not grow well off until the soil and weather get warm.

Most of our farmers are sowing Golden Millet with Cowpeas for a hay crop. When planted in this way, it should be some quick-maturing variety of cowpeas, such as the Whippoorwill or New Era, and should be sown at the rate of three-quarters of a bushel of millet and one bushel of cowpeas to the acre. It is necessary when these crops are sown together, to cut the crop at the time that the millet is ready to cut for hay, regardless of the maturity of the cowpeas. Sown together in this way, they make a much larger yield than either crop alone, and cure up and make splendid nutritious hay.

Our TENNESSEE GROWN RECLAIMED GOLDEN MILLET SEED is worth fully 50c per bushel more than the ordinary Western stock offered by seedsmen in the South. It will stand more drought and produce bigger crops. Very little of the millet seed sold in the South today is true-to-name stock. It is not to be safe than sorry—order from Reuter this year without fail.

Prices, postpaid: Lb., 25c; 2 lbs., 40c; 5 lbs., 90c. Not prepaid, by express or freight, peck (15 lbs.), $1.25; bushel (50 lbs.), $4.00; 100 lbs., $7.50. Write for special prices when ready to buy.

Remember—The farm home that produces its own food and feed along with cash crops, is economically independent and prosperous.
GOD GRASSES FOR SOUTHERN FARMS

Sudan Grass—A sweet, heavy-yielding grass; absolutely drought-proof; grows successfully everywhere in the South; stock of all kind eat it greedily; yields more tonnage than any other forage crop per acre. Sudan Grass can be best described by saying that it has all the good qualities of Johnson Grass, with a lot more of its own added, and while it looks like an extra tall-growing strain of Johnson Grass, it has NOT a single bad quality or characteristic of Johnson Grass. Sudan Grass has a rich brown color, with its deep yellowish-green underground root stocks, and its dark green top growth of grass, with its rich, aromatic root system which makes Johnson Grass so difficult to eradicate. Sudan Grass is an annual that requires reseeding each year. It is no more difficult to get rid of than sorghum or cowpeas. It may be grown, either drilled, in cultivated rows, or broadcast. If planted in rows, the rows should be as close as possible and yet permit of easy cultivating. In 30-inch rows, 2 to 3 pounds of seed per acre are necessary. For broadcasting, 5 to 7 pounds of seed per acre are necessary. The seed should be sown when the ground is warm in the spring. Three cuttings can be obtained in our section. Five tons of hay per acre is a reasonable estimate of its yield. The crop should be cut for hay soon after it starts to flower, but for hay cutting is fully headed, and can be cut for hay when roots are much injured. The grass should be cut for hay when roots are much injured. It is a species that does not spread by underground root-stocks, but produces running branches which root at the joints or nodes, thereby producing new plants. The runners are not so abundant when the grass is growing thickly, and they are not easily intermedo; nor does it have wide-reaching, hard-to-eradicate root stock. To invade a hay crop, its inability to stand cold weather will limit its acreage to the Southern States.

WARMING—There are thousands of pounds of impure Sudan Grass Seed sold in the South everywhere by unscrupulous dealers. Be sure to get the true-name seed that is not weevill en and is guaranteed to be free from Johnson Grass. Samples gladly furnished, showing you the purity and genuineness of our Sudan Grass Seed.

Prices, by mail, postpaid (4 oz.), 5¢; lb., 50¢; 5 lbs., $2.25; 10 lbs., $4.00. Not prepaid, by express or freight, 25 lbs., at 30¢ per lb.; 50 lbs., at 25¢ per lb.; 100 lbs., at 20¢ per pound. Write also for Free Pamphlet.

Rhodes Grass—Rhodes Grass is a native of Central and South Africa where it is regarded as a very valuable forage crop. It is grown for pastures on dry soil. Its great success on both Florida coasts demonstrates its equal ability in sections of plentiful rainfall. It is a perennial, growing from three to four feet high, with large numbers of very long, narrow and tender leaves, and is one of the best braun grasses, or grasses that grow in the hays of the hay crop. It is a species that does not spread by underground root-stocks, but produces running branches which root at the joints or nodes, thereby producing new plants. The runners are not so abundant when the grass is growing thickly, and they are not easily intermedo; nor does it have wide-reaching, hard-to-eradicate root stock. To invade a hay crop, its inability to stand cold weather will limit its acreage to the Southern States.

The runners are not so abundant when the grass is growing thickly, and they are not easily intermedo; nor does it have wide-reaching, hard-to-eradicate root stock. To invade a hay crop, its inability to stand cold weather will limit its acreage to the Southern States.

Rhodes Grass is a native of Central and South Africa where it is regarded as a very valuable forage crop. It is grown for pastures on dry soil. Its great success on both Florida coasts demonstrates its equal ability in sections of plentiful rainfall. It is a perennial, growing from three to four feet high, with large numbers of very long, narrow and tender leaves, and is one of the best braun grasses, or grasses that grow in the hays of the hay crop. It is a species that does not spread by underground root-stocks, but produces running branches which root at the joints or nodes, thereby producing new plants. The runners are not so abundant when the grass is growing thickly, and they are not easily intermedo; nor does it have wide-reaching, hard-to-eradicate root stock. To invade a hay crop, its inability to stand cold weather will limit its acreage to the Southern States.
VELVET BEANS--Wonder Crop of the South

Undoubtedly Greatest Soil Improver and Feed Crop for Southern Farms

Extra Early Speckle Velvet Bean--An extra early Velvet Bean that is largely planted throughout the South, and extremely popular. It is one of the quickest-growing and earliest maturing of the Velvet Beans, and is extensively used for growing in districts further North than Velvet Beans ordinarily have been grown. You can plant these beans during March and, in time for fall planting, a quick September growth, or for turning under to take advantage of its wonderful soil-improving features. It is one of the most prolific of all sorts, and makes an excellent vine. The seed of this variety, being absolutely new-crop (not carried-over, poor germinating seed), seed of high germination.

Prices, per postpaid box: 1 lb., 25c; 2 lbs., 40c. Not prepaid, by express or freight, peck (15 lbs.), $1.50; bu. (60 lbs.), $4.75; 5 bushels or more at $4.50 per bushel. Write for market prices when ready to buy.

Osceola Velvet Beans--A wonderful new variety of Velvet Beans out the Southern States, and we predict that it will become the most largely planted of all varieties. It has been pronounced as the greatest of all velvet beans by most practical farmers. A breeder of the Speckle Velvet Bean and the Yokohama. It is larger than the Early Speckle, more productive and earlier. Produces as much foliage, but is free of the itching fuzz that makes other Velvet beans so disagreeable to pick. Cooking is much more easy. Commences to give rippe about September 1st, and largely ripens before the fifteenth. The leaves are about October 1st, and often gathering easy. Blooms mostly purple. The beans are shaped like the 100-day, but twice the size, producing a pod as large as the "Chinese." Pods are five to six long, carrying eleven or twelve big beans. The beans are many as 25 pods, and are often double-jointed, in many cases having two bunches to the joint. It is the best variety for fertilizer, crushing, or grinding. It is the best yielder of seed of any variety.

Prices, by mail postpaid: Lb., 50c; 2 lbs., 80c. Not prepaid, by express or freight, peck (15 lbs.), $1.25; bu. (60 lbs.), $4.00; 5 bushels or more at $3.75 per bushel. Write for market prices when ready to buy.

SOY OR SOJA BEANS

Culture--The soil should be prepared as for cowpeas, and the seed planted in drills at a sufficient distance to permit one or two cultivations. One bushel of seeds will plant about 1800 ft. on the rise, to a hilly character in the Rows planting the rows should be shallow, never more than two inches, and many of them will decay. There is an important point to remem-ror, and that is the cultivation with soil from an old soy bean field is not usually necessary in the South. Rabbits are exceedingly fond of the young plants and sometimes the whole lot will be eaten. If wanted for hay the crop should be cut when the lower leaves begin to turn yellow, but if wanted for seed the gathering should be delayed until nearly all the leaves have fallen. The hay is equally as good as that from Cowpea. The yield is usually large, often exceeding forty bushels per acre. It is also a good feed for cattle, the seed at the rate of one bushel to a cow. The beans are yellowish when ready for cutting, and when harvested are almost ready to make a crop for rye or barley. Sowing thickly will prevent the stalks from growing too coarse, and will enable them to be cut and turned to better advantage.

Mammoth Yellow--Beans, and is the one kind that you should plant. The seed should be planted five to six feet high. Being a long-seasoned variety (3-4 months from sowing to harvest), all danger of frost is past and the wea, is warm and dry. Maturing in 120 days. Owing to the high prices being paid by all mills for Soy Bean seed it looks as though prices will advance before planting season. I urge you to send me your order at these reasonable prices without delay.

Prices, by mail postpaid: Lb., 50c; 2 lbs., 80c. Not prepaid, by express or freight, peck (15 lbs.), $1.25; bu. (60 lbs.), $4.00; 5 bushels or more at $3.75 per bushel. Write for market prices when ready to buy.

Reuter's Recleaned Selected Cowpeas

Lady Peas--These are small, round, and pure white, and are generally planted between corn. A delicate vegetable.

Prices, postpaid: Pkt., 10c; oz., 25c; lb., 60c, 90c. Not prepaid, by express or freight, peck (15 lbs.), $1.50. Bushel prices on application.

Mixed--Large quantities of peas are mixed through handling, and the same general directions as for Lady Peas apply.

RAPE--A valuable forage plant eaten by all kinds of stock, but best pre-si-ted to cattle, sheep, and pigs. When grown for cattle, rape grows stronger and healthier than if fed on corn alone. The hog is nature's natural source of raper, and if given in the proper amount of its won-derful hog forage crop should occupy a part of your farm's land, if you have hogs. One acre of Rape can pasture 25 hogs for four weeks. Any other crop cannot be compared with this. It grows and produces something, but this is not worth mentioning anything as compared with the value of the crop.

Dwarf Essex--No other. Sow broadcast, at the rate of 10 to 15 pounds to the acre, early in the spring, and will furnish rich and nutri-tious vegetables. It has a stragglng habit, and if proper forage is planted as late as April 1 with the expectation of producing a splendid crop. You'll delightfully surprised how well it will be done right through under your stock, and which, by the way, you'll see here, has cost you practically nothing. Prices, postpaid: Pkt., 10c; oz., 25c; lb., 60c, 90c. Not prepaid, by express or freight, peck (15 lbs.), $1.25; bu. (50 lbs.), $8.50; 100 lbs., $15.00.

Cowpeas, Soy Beans and Velvet Beans Very Scarce.

Persons or dealers selling farm run Cowpeas, Soy Beans and Velvet Beans of the quality of the crop and not re-cleaned or graded care of the manufacturers at a profit. We urge all our friends to receive the best Beans or Peas procurable, germinating 90 to 95%, and stock that is clean and free from trash, cotton stalks, hulls, etc. Our big electric seed cleaners do their part well.
REUTER'S FLOWER SEEDS

We are convinced that many of the failures with flower seeds are due to improper sowing and treatment. We want everybody buying our flower seeds to have the success with them and we urge upon them to carefully read the cultural directions on each package and the following rules:

Prepare your soil carefully; have it smooth, mellow and well enriched. It is well to choose the sunny side; make the surface of your seed bed as fine and smooth as possible. Do not sow on wet, cold soil, have it warm and mellow. Cover each sort of seed to a depth of its own thickness; seed like Petunias, Prettias, etc., should be merely sprinkled on the surface of the ground, and barely covered with thinly sifted light soil. Press the soil down firmly over the seed with a board. For larger seed the depth should be regulated according to what is usually about twice the thickness of the seed deep. When plants are large enough, remove same and plant in permanent beds. Do not disturb the roots more than is necessary. The soil shows a tendency to crust or crumb, scratch it lightly to break the crust.

Ageratum—A favorite garden flower for bedding and borders in the South. Can be sown early spring and will give a wealth of light, feathery blooms all summer.

BLUE PERFECTION—Per pkt., 5c; IMPERIAL DWARF—Per pkt., 5c; PRINCESS VICTORIA LOUISE—Per pkt., 5c; MIXED—Per pkt., 5c.

Alyssum Sweet—Pretty plants of trailing habits. Very fine for beds, vases, baskets and for bedding purposes. Flourishing profusely all summer, sweetly scented. Per pkt., 10c; ½ oz., 30c; oz., 50c.

LITTLE GEM—(Gay White Carpet Plant.) One of the prettiest flowers you can plant for edging purposes. Resembles a carpet of snow when sown in mass—it becomes so thickly covered with white blooms. Per pkt., 3c; ½ oz., 5c; oz., 10c.

SAUCY COMPACT—(Gold Dust.) This variety is a perennial, but will flower the first year if sown early. The flowers are bright yellow. Per pkt., 10c.

Antigonon—Per pkt., 10c; 100 seeds, 50c. A lovely climber from central Mexico, with beautiful, rose-colored flowers in racemes, 2 feet long. The fission of bloom is such as to give the appearance of roses at a distance, hence its Mexican name—Fuchsia. The vines are killed to the ground by frost, but grow and bloom the next spring. Packet, 10c; 3 pkts., 25c.

Antirrhinum—Per pkt., 10c; 100 seeds, 50c. Old-fashioned Snap Dragon, largely improved by cultivation and selection. One of the most gorgeously colored family of flowers and grown. Should be sown early in the spring and protected from late frosts.

FINEST REAL RED—Per pkt., 10c; QUEEN VICTORIA—White with lemon-colored lip. Per pkt., 10c. FINEST MIXED DWARFS—Pkts., 10c; 1 oz.—large white flowers. Per pkt., 10c; RA—Chabana scarlet with white throat. Per pkt., 10c; FIREBALL—Bright, dazzling scarlet. Per pkt., 10c.

Amaranth—Brilliantly furred annuals, bearing curious racemes of flowers. They are tall-growing and do well planted amongst shrubs or in the center of beds. Do not plant close together.

ATROPURPUREA—Beautiful dark purple flowers. Per pkt., 5c.

CAUDATUS—Per pkt., 5c.

COLUMBINE—(Campanula) A most desirable border plant, blooming early, long and abundantly. Very charming and brilliantly colored flowers. Per pkt., 10c. (Emerald Feather) One of the best plants for growing in suspended baskets, window boxes, vases, etc.

Asparagus sprengeri—Per pkt., 10c.

Aster—QUEEN OF THE MARKET—The best early aster in cultivation. Flowers two weeks earlier than other varieties. White, Pink, Scarlet, Blue. Each, per pkt., 10c; Mixed Colors, per pkt., 10c.

GIANT OSTRICH FEATHER—One of the largest and best types of asters. Makes cut flowers for excellence. White, Yellow and Blue. Per pkt., 10c each. Mixed Colors, per pkt. 10c.

Balloon Vine—(Love in a puff.) A rapid-growing annual climber, preferring a light soil and warm situation. Seed vessels look like miniature balloons. Per pkt., 10c.

Balsam Apple—Very handsome and curious climbing vine with ornamental foliage and golden yellow, round apple-shaped fruit. Very fine for covering trellis, rock work, stumps, etc., and as brightly objects. Price per pkt., 10c. (Lady's Slipper.) Two feet. An old and favorite garden flower, very easily grown and thriving in the hot sun, in good rich soil, with plenty of water. Per pkt., 10c. This two or three times you can dwarf the plants considerably, and make them much more shapely. Mixed colors. Pkt., 10c.

Balsam Double—Very valuable and decorative garden flowers of easy culture. Transplanted here in good, rich soil, about the time the bulbs begin to form the same manner larger. They flower from midsummer till frost. Per pkt., 10c.

GLOXINIA—The best; dark foliage and crimson combs. Pkt., 10c.

PHEASANT'S COCKSWOON—Beautiful annual, blooming in late summer and autumn. Producing large, showy plumes resembling ostrich feathers. Per pkt., 10c.

THOMSONI MAGNIFICA—Mixed. Pkt., 10c.

Calendula—Harsh annuals, flowering freely all summer and fall. Their brilliant colors orange. Per pkt., 10c. Mixed Colors—Per pkt., 10c.

Calliopsis or Coreopsis—Bright yellow showy plants, growing with great profusion in any good garden soil. Plants 1 to 2 ft. high, covered with bright yellow flowers, both double and single. Sown early in the spring.

Tall varieties, mixed. 1½ to 2 ft. in height. Pkt., 5c. Double varieties mixed. The finest double blooms. Pkt., 5c.

Candystuff—Very attractive climbers with bright yellow flowers. Per pkt., 5c.

Canary Birdflower—One of our best annuals for general work. Very profuse bloomers, doing best in rich soils with plenty of water. Per pkt., 5c.

Candytuft—Mixed. Pkt., 5c.

Canna—One of the most attractive. MAMMOTH—Pot Marigold. Cream, edged with orange. Per pkt., 10c. Mixed Colors—Per pkt., 10c.

Canna—(Indian Shot.) Beautiful ornamental foliage and large, brilliant flowers, tall, branching seed to pkt., 10c.

Canterbury Bells—(Campanula) Sown early in the South these bloom the first season. Sown in rather shaded position, as soon as ground can be worked, and they will give an abundance of bloom through the fall. Sow just thinly in beds and cover not more than ½-inch. Per pkt., 10c.

Carnation—(Marguerite.) Very free bloomers, specially adapted for outdoor culture. Pkt., 10c.

Carnation—Undoubtedly the amateur's Carnation, and deservedly so, on account of its hardiness, early blooming and good coloring. The highly scented and beautiful flowers are borne on long strong stems. Per pkt., 25c.

Chrysanthemum—Florists. These varieties are summer-flowering sorts and are greatly prized for their brilliant colors and profuse blooming qualities. Per pkt., 25c.

DOUBLE WHIRLE—Yellow and Mixed. Each per pkt., 25c.

CENTAUREA—Bachelor's Button—(Cornflower.) Attractive and graceful flower of easiest culture, blooming through the entire summer. Finest mixed, pkt., 5c.
FLOWER SEED

**Centaurea Imperialis**—(Sweet Sultan) 
This superb new strain of the “Sweet Sultan” is splendid. Produces long stemmed blossoms 3-4 inches across and exceptionally fragrant. Colors from white through shades of red, blue, royal purple, etc. Easy to grow. Pkt., 10c.

**Clarkia**—Very pretty and attractive annuals, flowering freely and of bright colors. Very useful for hanging baskets and vases. Per Pkt., 10c.

**Cobea**—(Cathedral Bells.) Very rapid climbers with purple, bell-shaped flowers. Price per pkt. 10c.

**Colesus**—Large, purple flowers. Pkt., 35c.

**Cosmos**—Strong growers, with bold flowers of exquisitely daintiness, very effective in their setting of feathery green foliage. They do well almost anywhere. Lady Lennox—Large, shell-pink flowers. Per pkt., 10c.

**Cucumber (Wild)**—A very rapid climber, thickly dotted with pretty white, fragrant flowers. Per pkt., 5c.

**Cypress Vine**—A most popular vine; its delicate, fern-like foliage and profusion of red and white star-shaped flowers make it a general favorite. Scarlet, White and Mixed. Each, per pkt., 5c.

**Dahlias**—Grown from seed. Sow in shallow boxes and transplant as soon as danger from frost is over.

**Daisy Shasta**—One of our finest white flowers. The pure white blooms, with brilliant yellow centers measure three to four inches in diameter. Some have long narrow and twisted petals, while others are broad and flat. They bloom the entire season, and last a long time when cut. Per pkt., 10c.

**Daisy** (Double English) — Fine for edging. Per pkt., 10c. Paris—White flowers with yellow center. Per pkt., 5c.

**Datura Cornucopia**—Plenty. Beautiful, large violet-colored, trumpet-shaped flowers, Pkt., 5c.

**Dianthus**—Pot. This family contains some of our most beautiful and best-loved flowers, unsurpassed for color and fragrance. Easily grown and ought to have a place in every home.

**Gourds**—Rapid-growing climbers with dense foliage and peculiar shaped fruits. CHINESE BOTTLE: CALABASH (The Pipe Gourd); DISH CLOTH, SUGAR TROUGH, AND HERCULES CLUB. Each, per pkt., 5c. Mixed Gourds, per pkt., 1c; per oz., 5c.

**Gypsophila**—(Baby’s Breath) Very graceful, delicate flowers and foliage; grows well anywhere.

**Helichrysum**—Eternal Flowers. Probably the best of everlasting flowers; keep well all winter in vases when cut early and properly dried. BRACTEATUM—Mixed colors. MONSTROSUM—Double mixed colors. Per pkt., 5c, 5c.

**Heliotrope**—(Double) One of the best hardy subtropical flowers; makes a charming background. Should be sown early.

**Hibiscus**—A noble shrub-like plant bearing large, bright flowers; very hardy. Mixed colors. Per pkt., 10c.

**Hollyhock**—(Double) One of the best hardy flowers; makes a charming background. Should be sown early.

**Humphrey**—Purple flowers with silvery seed vessels. Prized winter decorations. Per pkt., 10c.

**Humulus Japonicus**—(Vinegared) A variegated variety of the Japanese Hop. The leaves are beautifully marked with silvery white, yellowish white, light and dark green. Very effective for for 25c.

**Hunnemannia**—(Mexican Poppy.) Very attractive and hardy with large yellow flowers and feathery foliage. Per pkt., 5c.
REUTER’S PEERLESS MIXED PANSIES

In this magnificent mixture of giant flowering pansies the colorings are wonderfully rich and varied; every shade and tint of rose, canary yellow, black, white, lavender, sky blue and orange are in abundance. The enormous flowers are of thick, velvety texture and borne on long stems. Can be planted throughout the South during October; in the Central South should be protected during the severe weather of January and February. This mixture bears gigantic flowers profusely and continuously.

MIXED ENGLISH PANSY—Our mixture consists of the best English varieties. Pkt., 15c; 2 pks., 30c.

MIXED BLOCHED AND STRIPED—A high-grade mixture producing endless variations and striking combinations. Pkt., 15c; 2 pks., 30c.

PETUNIA—Very popular throughout the South. Easily grown and make a most beautiful flower bed. No garden complete without them. They are hardy annuals, and heat, rain or drought does not affect them.

Prices: Pkt., 15c; 2 pks., 30c; 1 lb., $1.50, postpaid.

REUTER’S SPENCER SWEET PEAS

ASTA OHN—Soft pinkish lavender, tinted mauve. Flowers are very large and wavy, usually four blooms to a stem.

DOBBIE’S CREAM—The large, fine, deep cream colored blooms are beautifully waved.

ENCHANTESS—A lovely shade of silvery pink, shading to a deeper color at the edge of petals.

FLORENCE NIGHTINGALE—A charming soft, clear, rich lavender, enriched by a slight trace of rose-pink. The blooms are very large and beautifully waved.

HELEN LEWIS—The immense blooms of a rich crimson-orange are decidedly flushed and waved.

HELEN PIERCE—Bright blue, flaked and marbled white, a most attractive combination of showy coloring.

KING WHITE—The finest of white sweet peas. The immense blooms of snow white, and perfect form are always borne on long stems. Usually four blooms to a stem.

OTHELLO—One of the darkest colored sweet peas, the beautifully waved flowers are of a very rich deep maroon.

ROYAL PURPLE—A most profuse bloomer. The flowers of immense size are usually borne in four on long strong stems. The color is a rich warm purple. A most attractive variety.

VERMILION BRILLIANT— Bears flowers of a very bright scarlet, and perfect shape, on strong stems. It is one of the largest and most handsome of the sweet peas and is absolutely sunproof.

ZEPHIR—A very bright silver blue color. The well made and shapely blooms are most exquisitely waved and curled.

Prices: Pkt., 10c; oz., 25c; ½ lb., 90c; lb., $3.25, postpaid.

Sweet Peas—Peerless Spencer Mixed—A proportionately balanced mixture of the finest of Spencer Varieties. Pkt., 10c; oz., 25c; ½ lb., 90c; lb., $3.25, postpaid.

Reuter’s Peerless Mixed Sweet Peas—All the finest selected colors in the right proportion for the most beautiful show, and without question it cannot be surpassed for gorgeousness of colors and brilliancy of effect, embracing every known good sort. Sow the seed in a trench about 6 to 8 inches deep and cover with two inches of soil. As the plants keep growing, the trench ought to be filled until level with surface. Price: Pkt., 5c; oz., 15c; ½ lb., 40c; 1 lb., $1.50, postpaid.

Reuter’s Choice Grandiflora Sweet Peas (Separate Colors)

Amerita—Bright red, striped and flaked on white.

Blanche Burpee—Pure snowy white; blooms in about 45 days.

Blanche Ferry—Rose red; wings bluish white. Early sort.

Black Knight—Very rich dark maroon, veined black; darkest of all.

Dorothy Eckford—The grandest pure white ever introduced. Beautiful shell shaped, of extra large size.

HeLEN FERRIER—Bright blue, mottled on pure white.

Hon. Mrs. E. Kenyon—A grand primrose yellow.

King Edward—One of the very best pure red shades.

Lovel—a very fine, rich clear blue.

Lovel—Beautiful soft, shell pink, lightly shaded rose toward edges.

Miss Wilmore—Orange rose; extra large and fine; enormous flowers.

Navy Blue—The darkest blue sweet pea.

Othello—Grand full colored, dark maroon.

Primrose—Exquisite rose pink; large and profuse, beautiful bright shade.

Salopian—Bright scarlet, does not fade in sunshine.

Prices of any of the above-named varieties: Pkt., 5c; oz., 25c; ½ lb., 75c; lb., $2.25, postpaid.

FINEST MIXED GRANDIFLORA SWEET PEAS—Pkt., 5c; oz., 20c; ½ lb., 50c; lb., $1.75, postpaid.
Hyacinth Bean.—(Jack Bean)—An old-fashioned favorite annual climber, growing about 10 feet high. They bloom freely in clusters.

PURPLE AND WHITE.—Each, pkt., 10c; oz., 25c. MIXED COLORS.—Pkt., 10c; oz., 25c.

Larkspur.—A well-known garden flower; a very free bloomer and bright colors. Per pkt., 5c. DWARF—Mixed colors. Per pkt., 5c. TALL—Mixed colors. Per pkt., 5c.

Linum.—Pretty free-flowering garden plant of easy growth, bright red flowers. Per pkt., 5c.

Kenilworth Ivy.—A splendid hanging basket plant. Sow seed in a cool moist place early in spring. Easily transplanted to baskets, pots or porch boxes when well up. Pkt., 10c.

Kochia of Mexican Burning Bush.—A splendid and novel plant. It grows closely clipped ornamental evergreen. The globe-shaped or pyramidal bushes are close and compact, and of a pleasing light green color. With the approach of cool weather the whole plant becomes a deep red. New thinly in spring when the ground is warm. Pkt., 10c; 3 pks., 25c.

Morning Glory.—(Convolvulus)—The flowers are of gigantic size and the colorings and markings beyond description, ranging from snow-white to black-purplish, with all the possible intermediate shades. A packet of them will surprise you with the rich return of beauty and flowers covering your porches, trellises and fences. Pkt., 10c; 3 pks., 25c.

Marigold.—These are old favorites, free-flowering plants of easy culture. In autumn they make a rapid growth and a dense shade protecting porches from the hot rays of the sun.

Moon Flower.—Popular throughout the U. S. and Mexico. They grow from one-inch deep. No garden is complete without a patch of this very unassuming, yet sweet-smelling plant. Machee—Deep red. Pkt., 5c. Golden Queen—Bright yellow. Pkt., 5c. Parson's (Luminaria)—A splendid hanging basket plant. They make a rapid growth and a dense shade.

Mignonette.—12-in. No garden is complete without a patch of this very unassuming, yet sweet-smelling plant. Machee—Deep red. Pkt., 5c. Golden Queen—Bright yellow. Pkt., 5c. Parson's (Luminaria)—A splendid hanging basket plant. They make a rapid growth and a dense shade.

Nasturtium.—These flowers are too well-known to require any description here. They do best on rather thin soil with plenty of sunshine. If grown on rich soil they are induced to run to leaf, to the detriment of the blooms.

Dwarf Crystal Palace Gem—0 to 12 in. Yellow and carmine. Pkt., 5c.

Grandiflora—The true white variety produces immense white blooms four to five inches in diameter. Pkt., 10c.

Dwarf King of Tom Thumb—Scarlet. Pkt., 5c. Dwarf Mixed—Lb., 25c; 1/2 lb., 75c; oz., 25c; pkt., 5c. Tall—12 ft. Mixed Colors—1 lb., 75c; oz., 25c; pkt., 5c.

Nigella.—(Love in a Mist, or Devil in a Bush). The bright, blue flowers, nesting among the finely cut, feathery leaves, make a very attractive show. Per pkt., 5c.

Phlox Drummondii.—The easiest and most popular perennial annual flowers in the South. Sow seed as soon as ground can be worked in the spring broadcast and work in lightly. Our varieties are carefully selected and comprise the finest strains ever offered in the South.

Peerless Mixed—All colors. Pkt., 5c; oz., 75c. Grandiflora Alba—Snow white. Pkt., 10c.

Grandiflora Blue—Blue flowers. Pkt., 10c.

Grandiflora Carmine—Carmine. Pkt., 10c.

Grandiflora Kermesina—Crimson. Pkt., 10c.

Single Mixed—Lb., 25c; oz., 25c; pkt., 5c.

Poppies.—Poppies should be sown as early as possible after all danger of frost is over.

Portulaca.—(Sun Plant)—One of the most showy and beautiful annuals. Easily grown and cared for, yet blooms freely all through the summer. For baskets, beds, masses, or edgings, it is invaluable.

Rhodanthe.—Beautiful everlasting flowers, much prized for winter decorations. White and pink.

Salvia Splendens.—(Scarlet Sage)—Well-known flowers, carrying many long spikes of scarlet flowers, and making a very handsome appearance in beds and borders. Easily grown and produce profusely all summer until late in the fall or early winter. It thrives in the warmest and sunniest situations. Sow seed in open ground as soon as ground is warm, but may be started earlier in boxes in sunny windows and transplanted to open ground as soon as soil is warm. Pkt., 10c; 3 pks., 25c.

Silene.—(Catch-fly)—Bright-colored and free-flowering plants.

Smilax.—A fine climber, greatly used in floral decorations. Per pkt., 5c.

Sunflower.—Japanese—Often called the Chrysanthemum Flowered Sunflower. The flower head grows 4 to 6 inches in diameter and the stalk 4 to 6 feet high. The entire flower is a rich golden yellow color and a solid mass of petals is finely cut and fringed like any of the famous varieties of Chrysanthemums. Pkt., 10c; oz., 50c.

Stocks.—Have beautiful and fragrant flowers and a long season of bloom. Mixed colors. Per pkt., 10c.

Thunbergia.—(Black-Eyed Susan)—A very free blooming climber, bright yellow flowers with a black center. Per pkt., 5c.

Torenia.—A very fine annual. Splendid for borders, hanging baskets, borders, etc. Per pkt., 10c.

Verbena.—One of the most popular garden and pot plants. Pkt.—For beds, borders, window boxes or vases. Flowers freely all summer. Peerless Mixed—The finest mixture of the largest flowering Verbena known. Pkt., 10c; 3 pks., 25c.

Mammoth Verbena.—The separate colors: White, Pink, Striped, Blue and Red. Per pkt., each, 10c; 3 pks., 25c; 1 pkt. each of five colors, 40c.

Vinca.—(Periwinkle). One of the most free-flowering plants we have. It does well in bright sunshine; the drier and hotter the summer, the more this plant flowers. White, Pink and Mixed. Each, per pkt., 10c.

Wallflower.—Well-known flowers of de-licious fragrance. Flowering early in the spring, seed should be sown in early fall, and the young plants protected from frost during the winter. Finest Mixed—Pkt., 10c.

Summer Flowering Bulbs

Many of the most showy, attractive, and inexpensive, as well as easiest grown flowers come from bulbs and roots. Throughout the middle and lower South, these bulbs and roots furnish an abundance of beautiful flowers and that require little protection.

Reuter's Magnificent Dahlias—The Dahlia is enjoying a popularity that is well deserved. The cultivation is as simple as the potato. It will grow and flower under any and all circumstances. They bloom profusely the first season and with very little protection by being covered up with leaves or stable manure, and will last many years in any part of the South. Cover enough to keep them from freezing.

6 Extra Fine Show Dahlias—Show Dahlias are large and round in shape. The outer petals in most cases refer to the flower head. The following sorts on inside back cover of this catalog.

- A. L. IVONI—Delicate pink. Well-formed flowers with long stems; desirable for cutting. Prices: 3 each; 3 for 8c, postpaid.
- BLACK BEAUTY—Color, deep purple, almost black. A large fine Dahlia of exceptional merit. Prices: Large stock, 50c each; 3 for 8c, postpaid.
- KING HUMBERT—A better variety grown-a magnificent flower. Prices: 1 stock; 50c each, 3 for 8c, postpaid.
- QUEEN VICTORIA—Lemon yellow. Flowers unusually full and round. Strong stems and fine for cutting.

Reuter's Large Flowering Cannas—They lead all flowers for showy beds. They have tropical appearing foliage, in rich soil, with a liberal portion of well-rotted stable manure. If after frost kills the tops all that is needed to preserve the roots for another season's growth is a good amount of rough manure or leaves well-aged down with a little dirt to prevent blowing away during the winter.

6 Magnificent Giant Cannas (See inside cover page for photographic reproductions.)

We are proud of our wonderful stock of Giant Cannas, which are unequalled in the entire South.

Reuter's Finest Mixed Gladiolus—Plant a few Gladiolus. They are the most attractive summer flowering bulbs grown; are also very useful for cut-flower work. We have never known anyone to fail with them.

Reuter's Peerless Mixed—This is a splendid mixture of many good bulbs that will give you every satisfaction. The collection includes all shades of colors. Prices: 6 for 25c; 12 for 50c; 100 for $2.00, postpaid.

Reuter's Superlative Mixed (Extra Fine)—Extra large heavy bulbs that are not usually offered by mail-order seed houses. This mixture contains practically all of these seven or eight high-priced varieties introduced in recent years. Prices: 6 for 35c; 12 for $1.00; 100 for $5.00, postpaid.

Madeira Vine—A popular vine, grown principally for its thick mass of small dark green foliage. Prices: 2 each; 3 for 50c, postpaid.

French and Dutch Flowering Bulbs

We have a large supply of these bulbs, choice named varieties and wonderful mixtures, for shipment during the fall and early winter. Our stock includes:

If you are interested in any of the above bulbs for early spring planting, we will be glad to send you our SPECIAL BULB PRICE LIST which describes prices and prices all kinds of Bulbs suitable for late fall and early spring planting.

Should you send us an open order, we will be glad to ship these bulbs to you.

C. O. D., charging you very reasonable prices for them. If you prefer, we will quote prices promptly.
Roses For The South

OPEN GROUND GROWN ROSES
2-Year Old Stock, 75c Each; $6.50 for Ten Postpaid
3-Year Old Stock, 90c Each; $8.00 for Ten Postpaid

On account of the lack of much skilled labor, the prevalence of poor weather conditions, and other contingencies, we have not enough plants to supply many varieties. It is therefore necessary to place your order early. If you will place it now, we will try to place your order early, but are, we believe, the finest plants that we have ever had and well worth the price asked. We will ship nothing but strictly high-grade plants on every order. They will be thoroughly dormant before shipping, so that they will carry in the very best of condition and be sure to live when properly planted in your rose garden.

IMPORTANT—If you want the best Roses, don't buy budded or grafted roses. This type seems so much larger and stronger that one is apt to be deceived into buying them, and you are sure to be disappointed. Budded or grafted roses are produced by taking a bud from the original plant and inserting it under the bark of the wild Manetta and blading it on. We supply nothing but open-ground stock. They will give you an astonishing surprise of blooms soon after being set out.

TEN TEA-SCENTED VARIETIES

LOUIS PHILIPPE—This Bengal variety is of rich, velvety crimson color; white not so valuable for bouquets, splendid for bedding purposes. It makes a large, vigorous bush, and there is scarcely a time during the entire year when it is not covered with bright red flowers.

BRIDESMAID—A pink rose of superior merit. Greatly used as a cut-flower on account of its long-standing qualities. An all-round, first-class variety.

DUCHESS DE BRABANT—A very hardy, prolific growing rose, and free bloomer. Color: light rose, shading to salmon.

ETOILE DE LION—A rose of great merit. The flowers are a beautiful chrome yellow, shading to a golden yellow in the center. One of the very best varieties for our climate.

HELEN GOOD—The immense size and lovely shape of the flowers, combined with its beautiful coloring, make this one of our best and most appreciated roses. Color is a delicate yellow shaded pink.

MADEMOISELLE LOMBARD—A very reliable, free-blooming rose, of good form of growth. The color is a bright rose, the blooms are large and a good shape.

MAMON COCHET, PINK—A world-renowned rose as one of the leading pink varieties. The color is a light pink, shaded salmon-yellow. The blooms are very large and full.

MAMON COCHET, WHITE—A grand second to the world-famous Pink Cochet, which it resembles in every detail except color. In this variety the color is creamy white, faintly tinged with blush.

Mlle. FRANZISCA KRUGER—A rose with a decided habit of varying the color of its blooms. The color: range from deep coppery yellow to a pale yellow flushed with rose. Very unique and distinct.

PERLE DES JARDINS—One of the finest roses in cultivation. The flowers of a bright golden yellow are beautiful in both bud and bloom.

FOURTEEN HYBRID-TEA VARIETIES

ETOILE DE FRANCE—One of the best roses of recent introduction. Beautiful green bronzy foliage. The flowers, which are a velvety red-crimson, are borne in great profusion.

HELEN GOULD—A very strong grower and most prolific bloomer. The flowers are a bright red. An all-round, first-class rose.

KILLARNEY PINK—Undoubtedly one of the finest pink roses in cultivation. The color is a delicate shell pink of satiny texture, and the blooms are deliciously fragrant. They last an exceptionally long time.

KILLARNEY WHITE—A very vigorous growing rose, with bright and attractive growing foliage. It is one of the finest all-round, useful as well as showy roses in cultivation. The color is pure white, the shape of both bud and bloom is all one could desire. A very free-blooming rose.

KAISERIN AUGUSTA VICTORIA—Here we have a very powerful competitor of Frau Karl Druschki for the supremacy in white roses. This is one of the best whites, beautiful in both bud and flower, very fragrant and a strong grower.

LA FRANCE, PINK—A profuse bearer of magnificent large, highly-scented, silvery pink blooms. Called by some the Queen of Roses.

LA FRANCE, WHITE—The only difference between this rose and the Pink La France is the color of the blooms. In this plant they are pearly white, slightly tinged with fawn.

Our Roses Are Sure to Grow—Sure to Bloom
TWENTY-FOUR TEA ROSES
HYBRID-TEA VARIETIES (Cont'd.)

METEOR—One of our best known red roses. A very compact grower and free bloomer, bearing a great profusion of rich crimson red flowers.

MRS. AARON WARD—A rose of unusual merit and coloring. A vigorous grower, with dark foliage. Color is a deep golden orange, shading to creamy yellow at the edge of the petals.

PINK RADIANCE—A most prolific bloomer, and deliciously fragrant. The extra large and shapely blooms are of a bright carmine pink.

RHEA REID—A rose of vigorous growth, producing an abundance of large decidedly double and deliciously fragrant flowers. The buds are long and pointed. The color is a beautiful rich crimson. 50c each, $3.00 per doz., postpaid.

RICHMOND—A prolific bloomer bearing continuously long-shaped buds, of a rich, dark crimson color, that makes a fine contrast against their bright green foliage. It has a fragrance rivaling that of the American Beauty. Each, 50c; per doz., $5.00, postpaid.

SUNBURST—Undoubtedly the leading rose in its class. It has all the points of merit one could wish for. It is a strong, healthy grower, bearing an abundance of long-pointed buds on long stems. The color is an orange-copper, golden-orange, or golden-yellow.

Prices: 2-year-old stock, 75c each; $6.50 for ten, postpaid.

SIX HYBRID-PERPETUAL VARIETIES

AMERICAN BEAUTY—A rose that cannot be surpassed for richness of color and odor, and magnificence of size. The massive blooms are of a dark, rich crimson, and most exquisitely perfumed. Each, 50c; per doz., $3.00.

WHITE AMERICAN BEAUTY—FRAU KARL DRUSCHKI—This grand white Rose has become renowned as the very highest type of its class and the best snow-white Rose ever introduced. It is an extraordinarily strong grower, and has the vigor and hardiness of an oak. Its magnificent flowers are nothing less than glorious—immense in size and produced with great freedom. The color is mussel-white, without a tinge of yellow or any other shade. A true paper-white, the standard by which all White Roses are judged.

BLACK PRINCE—Every garden should contain at least one Black Prince. It is one of the sweetest perfumed roses in cultivation. The full, massive blooms of a blackish-crimson are borne in great profusion on long strong stems.

GENERAL JACQUEMINOT—A rose of world renown as one of the best crimsons. A strong, robust grower, and most profuse bloomer. Beautiful in both bud and bloom. In color it is a most brilliant dazzling crimson.

PAUL NEYRON—A strong growing rose, bearing an abundance of extra large massive blooms of a deep rose color. It is claimed by many growers to be the largest rose in cultivation.

VICK'S CAPRICE—A rose of very unusual coloring, the ground color is a bright satiny-pink striped and dashed with white and carmine. A strong grower and profuse bloomer, and also valuable as a cut flower.

Special Offer—The hybrid perpetuals are considered the most valuable of roses, because they bear the largest and most brilliantly colored flowers and are so extremely hardy and vigorous.

One strong 2-year old plant each of the Six Harly Hybrid Perpetual Roses for only $8.50, postpaid; one 3-year old plant each of the six for only $3.50, postpaid.

BABY RAMBLER ROSES

Dainty, dwarf-growing Roses, forming compact bushes about 2 feet in height, and producing from early in the season until severe frost, immense trusses of small flowers, which completely hide the plants. They are very hardy. They are useful for bedding, to make a low attractive hedge, to border a walk, for planting in cemeteries, or growing in pots in the house.

BABA DOLL—The color of this rose is bright golden yellow tipped with cerise. It is perfect in both bud and bloom.

CATHERINE ZEIEME—Also known as the WHITE BABY RAMBLER, grows to a height of about 20 inches and produces double pure white flowers in abundance.

CLOTELLE SOUPERT—Known as the world over as the very best of the bedding roses. The color effect is beautiful ivory-white, shading towards the center to bright silvery-pink.

BABY RAMBLER—This is the original Baby Ramblor, "daddy of them all." It is in bloom all the time, flowers in large clusters of brightest crimson.

OKLEANS—Showiest and prettiest of all Baby Ramblers. This charming and dainty rose is of beautiful rounded habit, and is a huge bouquet of deep cerise or cerise-pink with distinct showy center of pure white. The color is irresistible.

CRIMSON RAMBLER—A rose well known to everybody. Its bright red flowers borne in large clusters make a very attractive show.

Prices of any of the above plants: 2-year-old stock, 75c each; $6.50 for ten, postpaid.

Ovide-Fashioned Moss Roses

They have always been favorites, for what can be more elegant than the bud of the Moss Rose and more delicious than its fragrance?

HENRI MARTIN—This is an old favorite, with its large deep pink buds well massed. A beauty.

OLIVE KELING—Pure white flowers, buds heavily and beautifully massed.

Prices: 2-year-old stock, 75c each; $6.50 for ten, postpaid; 3-year-old stock, 90c each; $8.00 for ten, postpaid.

TEN EVERBLOOMING ROSES—$3.00 Postpaid

The plants offered in this Bargala Collection are out of three-inch pots, averaging about 18 months old. They are bushy and well branched and the majority of them in bud and bloom. They are not to be compared with any Northern grown greenhouse roses.

AMERICAN BEAUTY

NURSE CHICK—Buds double and dainty, pure white.

HENRI MARTIN—White, large, double; 40c, 3-year-old stock.

OLIVE KELING—Buds double and dainty, pure white.

BARGALA OSEY—Double, close, clear, red, 40c, 3-year-old stock.

BARGALA KELING—Buds double and dainty, pure white.

SPRING BLOOMER—20c, 3-year-old stock.

12 Grand Climbing and Rambler Roses

**Prices:**
- 2-year-old plants, 75c each; $8.50 for ten, postpaid.
- 3-year-old plants, 90c each; $8.80 for ten, postpaid.

**CLIMBING AMERICAN BEAUTY.**—One of the finest climbing roses, same dark rosy-crimson color and exquisite fragrance as American Beauty; blooms as profusely not only in the spring, but throughout the entire year. Hardly as an oak. **RED DOROTHY PERRINS.**—The finest of all Crimson Ramblers. Very distinct in habit. The flowers are very double, produced in large clusters of 30 to 40, and of an intense crimson-maroon, with the tips of the petals tinged with scarlet. **WHITE DOROTHY PERRINS.**—A pure white sport of the well-known Dorothy Perkins. The vines are a sheet of white during the blooming season. This rose has no rival as a white climber.

**PINK DOROTHY PERRINS.**—It's beautiful pink blooms borne in large clusters are very sweetly scented.

**YELLOW RAMBLER.**—A beautiful rose, bearing in immense clusters, flowers of a bright yellow, changing to canary yellow.

**HELEN GOULD.**—A grand second to the famous bush rose of that name. A first-class climber bearing in great profusion large blooms of a rich warm red color.

**KAISER AUGUSTA VICTORIA.**—An absolutely hardy climber with wonderful flowers of a pure white and delicious fragrance.

**MARESCHAL NIEL.**—A variety peculiarly adapted to the South. One of the best yellow roses in cultivation.

**PILLAR OF GOLD.**—The double, large blooms of a ruby-red color. They are three to five inches across and are borne in immense clusters, and in such profusion as almost to hide the dark green, insect-proof foliage.

**RICHMOND MARIE HENRIETTE.**—Flowers are a bright cherry red, well-formed and borne in clusters in great profusion.

**TAUSENSCHON, or 1000 BEAUTIES.**—An entirely distinct and wonderful rose, rapid-growing and almost thornless. Its innumerable flowers are very large, fully three inches across, and show every imaginable shade, from pure white to deep pink.

---

**SPECIAL OFFER**

One 2-year old plant each of the above 12 splendid hardy climbing Roses for only $7.50 postpaid; one 3-year old plant each of the 12 for only $9.00, prepaid.

**EXPRESSION SHIPMENTS:** We suggest express shipments on large orders for Roses, as the plants come to you more safely packed and in much livelier condition than if sent by mail. We pay the express charges on all orders for Roses at prices quoted in this catalog.

---

**THE BLUE ROSE**

**VEILCHENBLAU, OR VIOLET-BLUE, NEWEST CLIMBING ROSE.**

The sensation of a century. After many years of experimenting, efforts have been rewarded by the production of a Blue Rose, which will be welcomed with the greatest interest by all lovers of the garden. This new climbing rose surpasses all others of recent introduction in having a pure blue color. The flowers appear in large clusters, after the manner of the Crimson Rambler; are semi-double and of medium size. Upon first opening, the color is partly bright red and partly bright rose, turning soon to a steel blue. The color is best described by saying that it resembles that of the violet. We urge you to place your order early as possible, as it is very evident the demand will far exceed the supply.

Prices: 2-year-old plants, 50c each; 3-year-old plants, $1.00 each; $9.00 for ten, postpaid.

---

**SPECIAL OFFER**

**10 HARDY CLIMBING ROSES**

2-year-old plants, 50c each. $5.00 for the collection of ten, prepaid.

**PRAIRIE QUEEN.**—The old standby red climber. An extremely hardy variety that never fails to give satisfaction.

**AVIATEUR BLERIOT.**—Saffron-yellow, center gold and yellow; full and double, flowering in clusters.

**DR. VAN FLEET.**—One of the best climbing roses. The immense, shapely and fully double blooms are of a delicate flesh pink color, deepening to rose-color in the center.

**SILVER MOON.**—Extra large single flowers, 4½ inches and more across, of a brilliant silvery white color, with a mass of golden yellow stamens in the center.

**EXCELSIA.**—The color is intense crimson-maroon, the tips of the petals tinged with scarlet. A wonderful climber.

**TRIER.**—Large clusters of creamy-white blooms, with dark yellow anthers, flowering freely.

**LADY GAY.**—Flowers of a deep cherry pink, shading on the edge of the petals to a very delicate soft tone of pink.

**TENNESSEE BELLE.**—Beautiful pink; free bloomer; an old standby.

**Baltimore Belle.**—Blush white, in large clusters. A splendid, hardy climber.

**SHOWER OF GOLD.**—The color is a deep golden yellow, with orange shadings in the center.

Note.—We have an extra large stock of the above ten beautiful climbing roses. Desirable for trellises, walls and porches. You must take in ordering a few or the entire collection. Satisfaction guaranteed.

---

**BABY RAMBLER**
HARDY, NURSERY GROWN FRUIT TREES---For Spring Planting

OUR LIABILITY—We exercise all possible care to have stock well rooted, well grown, healthy, true-to-name, properly packed and shipped according to instructions. It is, however, mutually agreed between the purchaser and ourselves that our liability under the foregoing is limited to the amount of original price received. Neither party expressed or implied that trees will live or grow.

SHIPPING—Unless otherwise instructed, orders received during the shipping season will be forwarded as soon after receipt as possible, depending upon weather conditions. Orders without shipping instructions will be shipped as we believe is safest, cheapest and best for our customers' interest. Should shipment be delayed by express, and we find that express rates for the size package is nearly or quite as cheap, we will forward by express. When trees or plants are ordered by Parcel Post, unless sufficient money is enclosed to pay charges in addition to that required for the order, I will ship either smaller plants than those ordered, or withhold enough to meet the postal charges.

SHIPSMENTS AT PURCHASER'S RISK—Our responsibility ceases when we deliver trees to forwarding company. Claims for loss or damage must be made to them. We will, however, trace, if requested, and use every means at our command to secure prompt delivery, and recovery in case of damage or loss.

Certificate of inspection, showing freedom of my stock from San Jose Scale and other injurious insects and diseases, attached to all shipments.

To Florida Customers: Because of State Regulations I am not permitted to ship plants into the State of Florida or from any plants orders for Florida delivery. I hope to be favored with your orders for Seeds, Insecticides, Tools, etc. On account of the present regulations of the Department of Agriculture in Louisiana, in its effort to control Citrus Canker. I am unable to ship Citrus Stocks, including Oranges, Lemons and Grapefruit, outside of the State of Louisiana.

**ORANGES**

SATSUMA—Unquestionably the best of the China variety and, in combination with its early ripening makes it an indispensable variety. The skin is of medium size, deep orange color, fine grained, tender, juicy, sweet and delicious. The tree is thornless. Ripens during October and November.

LOUISIANA SWEET OR CREOLE SWEET—This is the Orange for Louisiana. It was introduced into this country practically a native. It is the variety that has been most popular grown in Louisiana. We strongly recommend a liberal planting of this variety.

WASHINGTON NAVEL—The fruit of this variety is large and somewhat oval. The flesh is quite juicy, sweet and highly flavored.

MANDARIN—One of the most profitable Louisiana varieties. Fruit is of medium size, and deep yellow; orange flesh and almost free of the blemish varieties.

TANGELO—The fruit of this variety is somewhat smaller than the other varieties, but it lacks in size it makes up in quality. The flesh is very juicy, aromatic, and of a deep rich orange color.

Prices on Trifoliata Stock: 2 to 3 feet, each $1.50, 12 for $15.00; 3 to 4 feet, each $1.80, 12 for $21.60.

**GRAPE FRUIT**

**KUM-QUAT**—A dwarf-growing, shrubby tree, bearing a mass of hundreds of small, bright fruits about the size of a pigeon's egg. Price: Bearing size trees, ready to fruit, $1.25 and $2.50 depending on size and age.

**Grapefruit**—MARBEL SEEDLESS—The most popular variety of Grapefruit. The fruit is extremely resistant to cold, and bears very young. The fruit is almost seedless and of exceptional quality and size. Price: Medium size, $1.75 and $3.50; extra large size, $2.25 and $4.50.

**PEACANS**—The best investment a farmer can make. It takes a number of years for a pecan orchard to give paying returns on the money invested. The trees should be planted not less than 50 apart each way and 60 feet is better.

**DELMA.—**A very large nut of excellent quality. It is one of the best commercial varieties. One tree is healthy and strong, and it is the earliest bearing of all Pecans.

**CRAWFORD**—One of the finest pecans grown. The nuts are of large size and thin shell, separating easily from the kernel.

**FORTSCHER**—Large oblong nuts, very thin-shelled, full, plump kernel. A rapid grower and an abundant bearer. A first-class, all-round sort.

**PACER**—A variety exceptionally well adapted to the coast and temperature. A very strong grower, producing extra large nuts.

**SUGAR**—This is the leading variety in Southern Mississippi and Alabama. The nuts are large and the shells are thin. The kernel is plump and of a rich flavor.

**STUART**—One of the most popular pecans. The nuts are somewhat shorter than some of the other varieties. The kernel is plump and of good quality.

**VAN DEMAN**—A paper shell variety of great merit. The nuts are long and pointed at both ends. It ranks with the best selected from over 100 named varieties.

**Cheerries**—Black Tartarian—Very large, black, glossy rich. Trees are fair hardy in the South. Avoid low or wet ground.

Prices: 4 to 5 ft., each $1.50; 5 to 6 ft., each $2.00; 6 to 7 ft., each $2.50.

**Apricot**—Russian—The best variety for the South. Never disbuds. One or two of these valuable and ornamental trees. They bear one of the most profitable and pleasant fruits we know of for eating raw, and other fruits adapted itself better for preserving purposes. The trees begin to bear very young, and with a little care will bear a heavy crop every year. Fig-canning is becoming more popular every year.

**Brunswick**—This is one of the most desirable varieties we know of. The fruit is of medium size, the flesh is of a light pink color, of excellent quality.

**Celeste**—Sometimes called the SUGAR FIG on account of its sweetness. Everyone canning and preserving figs should include this variety in their section. Fruit is of medium size and flesh is solid, sweet and juicy.

**Magnolia**—This is the most popular variety for canning purposes. The trees are very vigorous and yield well and bear profusely. The fruit is large and of a light greenish color.

Prices: 2 to 3 ft., 50c each; 3 to 4 ft., 75c each; 4 to 5 ft., $1.00 each, and $1.50 per doz. for 10 or more. We have some larger 5 to 6 ft. trees, $1.25 each, and $1.75 each, and $2.00 per doz. for 10 or more.
FRUIT TREES FOR SPRING PLANTING (Cont’d.)

APPLES

EARLY HARVEST—The tree of this variety is a very vigorous and robust grower. The fruit is large and yellow-skinned. It is good either for the table or for cooking.

ELYSE—This is one of the most valuable varieties for commercial purposes. It is a great favorite with the planters of the South Texas section. The fruit is of medium size and right crimson color. The flesh is very tender and of fine flavor. It is one of the earliest ripening varieties.

JONATHAN—Like the Red June, this variety is one of the standbys in the South. It is a robust grower and a prolific bearer. The fruit is large and red. It is a grand marketing and a splendid eating variety.

BEN DAVIS—An exceedingly robust and vigorous grower, and an abundant bearer. The fruit is large and handsome. It is a very popular variety.

WINESAP—One of the best varieties for general winter use. The fruit, which is marbled red on a white ground, is fine for cooking. The flesh is firm and highly flavored.

PEARS

BARLETT—This is undoubtedly the best known and most popular pear grown, but when grown on its own stock is subject to blight. The trees we offer are LE CONTE stock. This gives the trees a much more robust character, and therefore able to fight blight.

LE CONTE—This promises to become one of the most popular pears of the South. It is a very prolific bearer, and the fruit is large, of a pale yellow color, very juicy and melting. It is a shipper without a rival.

KIEFFER—This is a very vigorous grower, and bears prolifically. The fruit is large and of bright yellow color. The flesh is tender and juicy, with a flavor all its own. It is a fine variety for preserving purposes.

Prices on Pears (Barlett, Le Conte and Keiffer): 2-5 ft., $1.25 doz.; 3-5 ft., $1.50 doz.; 4-5 ft., $1.75, $2.00 doz.

CHINESE SAND—In this variety we have a pear that is practically free from blight. The fruit is large and of a yellow color. We strongly recommend this variety for cooking and preserving purposes.

Prices: 4-5 ft., $1.50 each, $15.00 doz. 5-6 ft., $1.75, $17.50 per doz. 6-8 ft., $2.25 each, $29.00 doz.

PEACHES

ELBERTA—This I believe is the most popular of all peaches. It is a freestone, and an early ripener. The fruit is large, of a deep red color, with red checks, very juicy and of fine quality. It is good for shipping, canning or the table.

MAMIE ROSS—This is a rich yellow, with red cheeks, very juicy and of fine quality. It is adapted to the largest of Gulf Coast plantings, and no orchard or home yard should be without a few trees of this popular variety. It is a freestone, and a favorite for the table.

CHINESE CLING—This is an excellent variety for general purposes. The fruit is very large, skin of a yellowish-white, mottled red. The flesh is juicy and of unsurpassed quality.

ANGEL—One of the most delicious canning peaches. A prolific bearer very young. Fruit is large and yellow. Flesh is white and very sweet.

BELLE OF GEORGIA—Large, showy, clear creamy white, tinted red. Flesh white and firm, excellent quality. Freestone.

Prices on Peaches: 2-3 ft., $5.00 doz.; 4-5 ft., $1.25 each, $12.50 doz.; 5-7 ft., $1.75 each, $17.50 doz.

GOOD PLUM TREES

ABUNDANCE—One of the most profitable and early plums; very hardy and prolific. The fruit is large, of a greenish-yellow color, with a heavy bloom. They are sweet, with a slight A-cleft flavor, rich and good.

KELSEY—The largest plum grown. Color, greenish-yellow, covered with a thick, bluish bloom, flesh light-yellow, flavor rich, pleasant. Very prolific and bears when quite young.

BURBANK—This is one of the most popular varieties amongst shippers. It ripens almost as soon as the Abundance. The fruit is very large, of a deep red color, with yellow blush. It is very juicy and sweet; a cling of the best quality.

RED JUNE—This variety is one of the earliest to ripen. The fruit is large, of a purplish-red color, covered with a delicate bloom. The flesh is light-yellow, sweet, with a pleasant flavor.

EXCELSIOR—The fruit of this variety is a very vigorous grower and produces an abundance of medium-sized fruits of a purplish-red color, covered with a heavy bluish bloom. The flesh is of a yellowish color and excellent flavor. This is one of the best shipping plums.

WICKSON—Large, deep maroon red. Flesh firm; deep amber yellow, small pit. Ripen in July.

Prices: 2-3 ft., $0.00 each, $0.90 doz.; 4-5 ft., $1.50 each, $15.00 doz.; 5-7 ft., $1.75 each, $17.50 doz.

JAPAN OR MESPLIS—The Japanese Mesplis is an old-time favorite in our climate. It is too well known to require any description here. I can offer very fine trees at: 4-5 ft., $1.50; 5-7 ft., $2.00 each.

GRAPES

MUSCADINE—The grapes of this variety are smaller than the Concord. They are light-red in color and exceedingly sweet.

MOORE’S EARLY—A variety very similar to the Concord, but very much earlier. The berries are large, round, black and covered with a heavy bloom.

NIAGARA—This is the easiest of the light-colored grapes. The berries are greenish-yellow in color and very sweet.

Scuppernong—The best of the MUSCADINE grapes. Large bronze-colored berries, flesh sweet and pulpy. Scuppernong wine is considered one of the best amber wines.

WHITE SCUPPENONG—A popular grape on all Southern markets. Makes very fine wines and grape juice. Well adapted to the South.

CHAMPION—Very early, bunch and berry medium in size.

Prices: 45c each, $4.50 doz.; prepaed; extra heavy 3-year-old plants, 80c each; $8.00 doz., prepaid.
MISCELLANEOUS FRUIT TREES---SHADE TREES

MISCELLANEOUS FRUITS

Japanese Persimmons—Hakumak—Very good growers and prolific bearers. Flesh is dark brown, sweet and meaty.

Tree--Nashi—Perhaps the best of the Persimmons; vigorous growers and prolific bearers. Skin seedless, quality very fine.

Yedo-ichi—An excellent Persimmon, bearing an abundance of large red-colored fruits. Flesh is very dark brown, sweet, rich, and crisp.

Tampan—New Chinese Persimmon. Introduced from China by Department of Agriculture. It has been thoroughly tested for the Gulf Coast section. Fruit is large, somewhat flattened and with a marked neck, and as though a string had been tied around the fruit while growing. Color beautiful golden red; skin quite thick and tough. Price: 2-3 ft. $1.00 each, 3-4 ft. $1.25 each.

Quince—Champion—A vigorous grower; fruit large and oblong. Makes excellent jelly. Fruits are large, with a strong, almost musky, flavor. Price: 15-20 ft. $1.50 each.

Pomegranate—Is a beautiful crimson, highly aromatic and very sweet. Purple seeded—Large, thin-fleshed. Flesh next the seeds is a dark ruby color. Quality is of the finest. Price: 2-3 ft. $1.25 each.

Banana—A rapidly growing plant, of great value, both as a fruit and decorative plant. Price: Each 1.00 and 1.50.

Mulberry—Sticks—Fruit sweet, grows rapidly and bears young, is very prolific. Price: 2-3 ft. $1.00 each.

Chinese Walnuts—Better adapted to and more productive than any other variety. An ornament to any grounds. Prices: 2 to 3 ft 90c each; 3 to 4 ft $1.25 each.

Blackberries—(Haupt Berry)—A valuable berry coming in before any of the wild shrubs, and with the fruits being the earliest known variety. Said to be a cross of a Dewberry and a Blackberry. Very prolific and of finest quality. Prices: By mail postpaid, 3 1/2c each, 3-4 ft. $2.50 per dozen.

Raspberries—(Cuthbert) The most extensively planted Red Raspberry. Fruits bright red, very large, three inches around; splendid shipper, sweet and juicy. Price: Each 1.00 and 1.50.

ORNAMENTAL AND SHADE TREES FOR THE SOUTH

There is no method by which you can add to the value of your home so rapidly and with such small outlay as by planting shade trees, and the amount of increased value will depend not so much on the sum you spend as the taste you display in selection. Feel free to write us for our Ornamental and Shade Trees Catalogue. We have an extensive line of Ornamental Trees, and all are grafted. The following list of Shade and Ornamental Trees are thoroughly acclimated to the South. All these Trees have been grown in our Nursery, are well pruned and have good bodies and tops. All have been transplanted once, and have therefore good roots. Our prices are low, considering their quality and scarcity.

Camphor Tree

Prices on all Trees in this catalog are f.o.b. New Orleans, customer paying transportation charges. We recommend express shipments on all orders for Trees, unless shipments are for local points.

Ligustrum japonicum—(Japon Prune)—A shade tree that should be much more extensively planted than it is. It is an evergreen tree with beautiful dark green foliage. It can be trimmed into pretty symmetrical shape like the umbrella china.

Prices: 4-5 ft. $1.10; 5-6 ft. $1.40; 6-8 ft. $2.25.

Oak—Live Oak—One of our best and most popular shade trees. None but nursery grown trees should be planted as they give much better growth.

Umbrella China—A rapidly growing tree, umbrella-shaped and of beautiful proportions. Gives a most gratifying effect even when quite young. Not suited for planting for shade purposes on account of their early age, but this can be largely overcome with some of our other and more shade-tolerant members.

Prices: 4-5 ft. $1.25; 5-6 ft. $1.50; 6-8 ft. $2.50 each.

Mulberry—Tena Weeping—A very attractive tree and makes a very pleasing effect on a lawn, with its long pendent branches.

Sycamore—American. One of our best permanent shade trees, withstands drouth and heat very well and is a most remarkable performer. It also grows very strongly on our Texas plains.

Prices: 5-6 ft. $1.00 each, $9.00 per dozen; 6-8 ft. $1.25 each, $12.50 per dozen.

Elms—American. One of the finest shade trees for the Southern states, very hardy and growing. Will grow in any location or soil. The older it gets the more prettier it grows.

Prices: 6-8 ft. $1.75 each; 6-8 ft. $2.00 each.

Willow—Weeping—Past-growing trees, bearing long graceful branches, covered with slender foliage.

Prices: 5-6 ft. $1.50 each, 6-8 ft. $2.00 each.

Grevillea Robusta—(Australian Silk Oak)—A most desirable evergreen tree with feathery foliage. Withstood the severe cold we had this past winter without blushing. Pot grown plants, 1.00, 25c and 1.50 each.

Camphor—Undoubtedly one of the finest and most useful of trees for the South. It makes a handsome shade tree for planting on the lawn or street. No plant makes a finer windbreak than the Camphor; they are also useful as screens for hiding out buildings, etc., while as a large plant they rank with the best in the country. The Camphor Tree grows more slowly along the Gulf Coast, however, than in the West, and there is no reason why it can't be grown on a scale sufficient to make the production of Camphor Gum a lucrative business. It is often used for ornamental purposes, and as its branches grow on opposite sides of the rows and about fifteen feet apart between the rows, Camphors planted for shade purposes will in time grow very tall, sometimes even reaching the enormous height of 80 feet, with a magnificent spread in proportion. By trimming the growing tops from time to time they can be kept at any desired height, and will, when that is done, form a very dense husky tree. Should they be desired for a windbreak or screen, they should be planted from two to six feet apart, depending on the size of the trees planted. When grown for hedging purposes, they should be planted from 12 to 18 inches apart. By planting a still larger size about 24 to 30 inches apart a beautiful hedge can be had the first year. They will stand as much trimming as the rest of any of our other hedges, and nothing one can imagine makes a prettier or more effective show than when the young leaves with their bright yellowish colors put out and show up against the old foliage which is a dark green color.

Prices: 2-3 ft. 75c each, $1.50 per dozen; 4-5 ft. $1.75 each, $2.50 per dozen, by express or freight collect.

Magnolia Grandiflora—The queen of the flowering broad-leaved evergreen trees; well known throughout the entire South. Their superior staleness of form and splendor of growth, the size and richness of their foliage and the lavish yield of fragrant flowers, place them in the foremost rank among ornamental trees grown for this purpose. They require for their growth a natural advantage in contrast to the garden. Planted in groups they yield to no rival, and their effect in early spring is grand beyond description, illuminating the whole landscape and filling the atmosphere with a rich perfume.

Prices: 3-4 ft. $1.25 each, $1.50 per dozen; 4-5 ft. $3.25 each, $2.25 per dozen, by express or freight collect.

Abelia Grandiflora—A hardy, free-blooming, evergreen shrub of willowy growth; foliage turning a pretty metallic bronze in winter; flowers about one inch long, tubular-shaped, white inside, borne in a profusion of clusters, very fragrant.

Prices: 25c and $1.10 each, postpaid.
Climatis Henri

AMPELOSIS VEITCHII—(Boston Ivy)—One of the best climbers known for quickly covering unsightly walls of other objects. Prices, good young plants, 45c each; extra strong plants, 75c each; postpaid.

QUINQUEFOLIA—(Virginia Creeper)—Very similar to the foregoing and is also a very strong and rapid growing climber, with rich colored foliage, like the other variety changing in autumn to a bright red. Not quite so thoroughly self-clinging as the foregoing and heavy vines are better to have the main stems tied to the wall in case their own weight pulls them down. Prices: good young plants, 45c each; extra strong plants, 75c each; postpaid.

ANTIGONON—(Mountain Rose or Queen's Wreath)—A lovely flowering vine, bearing most profusely immense racemes of beautiful rose colored flowers. Hardy also the coast, but inland it is liable to be killed down by frost but will come away from the ground again in the next spring and quickly attain considerable height. Prices: Good young plants, 45c each; extra strong plants, 75c each, postpaid.

BIGNONIA LAURIFOLIA—(Trumpet Vine)—A beautiful vine for growing on porches, trellises, etc. It has pretty glossy foliage and flowers of a nice lavender color. Prices: 50c, 75c, $1.25 each, postpaid.

BIGNONIA TWEEDIANA—A very hardy climber, producing early in the season an abundance of bright yellow flowers. Prices: good young plants, 60c each; extra strong plants, 75c each; postpaid.

BOUGAINVILLA—(Japanese Paper Vine)—Gorgeous multicolored paper like flowers which last well. A very strong grower and quickly reaches a great height. With care in pruning this plant can also be grown as a bush. Prices: Good young plants, 45c each; extra strong plants, 75c each; postpaid.

TREMAeus PANICULATUS—(Virginia Creeper)—A most desirable climber which is becoming more popular every year. In the late summer and fall it has one mass of lovely small white star shaped flowers with a delicious fragrance. A vine everyone ought to have in their garden. Each 45c, 75c, $1.00, postpaid.

JACKMANII—One of the most popular varieties of elema- tis, bears immense flowers of a day flowering growth. Each $1.00 and $1.25, postpaid.

HENRI—A variety very similar to the foregoing except in color of flower. This variety has bright coppery red flowers which last well. Each $1.00 and $1.25, postpaid.

COBNEA—Another large flowering variety of clematis, bearing profusely, flowers of a bright scarlet. Each, 60c and 85c, postpaid.

ENGLISH IVY—An invaluable plant for covering brick and stone walls and houses, self-clinging, requires no attention and rarely ever dies out. Does best in a slightly shaded situation. Each, 45c each; very strong plants, each, 60c each; postpaid.

MAGNOLIA FUSCATA—(Banana Shrub)—The flowers of a brownish-yellow are highly fragrant with a strong banana color, it carries its broad leaved foliage all the year round. Each $1.00, $1.25, $2.00, postpaid.

BRUGMANSIA—(Angels' Trumpet)—Grows easily and blooms freely. The flower is something to be proud of. The plant has large tropical leaves, which gives a fine tropical effect to the garden. Good strong plants, $1.00 and $1.25 each, postpaid.

FICUS REPENS—A gem for covering walls stone pillars or other masonry. Clings very closely and requires no training. Evergreen and hardy. It is used very largely for covering walls, etc., around city terraces. 25c each, $2.50 per doz.; extra strong plants 50c each, $3.00 per doz., postpaid.

HONEYSUCKLE, HALL'S JAPAN—No vine will make dense a covering for trellis, porch or for hiding unsightly buildings, as the honeysuckle. This variety has dark green glossy foliage, the flowers are white and buff and are highly scented. Each 45c, postpaid.

CORAL HED—A very rapid growing variety, with bright red trumpet shaped flowers. Each 45c, postpaid.

NOCTIFLORA—(White moon-vine)—This is one of the most popular climbers in existence. The large snow-white blossoms sometimes measure six inches across. It usually opens up at night on dull days, Each 35c and 50c, postpaid.

WASHINGTON FLOWER—This well known and hardy climber is familiar to all. They are of rapid growth and very attractive when covered with their handsome flowers. Each 50c and 75c, postpaid.

WISTERIA—Magnificent strong growing vines, perfectly hardy, the flowers are borne in large, pointed clusters in the early spring. I have both the white and purple varieties. $1.00, $1.25 and $1.50 each, postpaid.

FLOWERING and ORNAMENTAL SHRUBS

Crepe Myrtle—A real southerner that ought to find a place in every garden. They are very vigorous growers and often attain a height of 15 to 20 feet. Their bloom profusely, bearing large panicles of flowers in different shades of crimson, pink, purple and white. They are very hardy and easily grown, doing well on almost any kind of soil. One of our most desirable shrubs. Each 50c, $1.50, $2.00, postpaid.

Magnolia Fusca—The flowers of a brownish-yellow are highly fragrant with a strong banana color, it carries its broad leaved foliage all the year round. Each $1.25, $1.75, $2.25, postpaid.

Brugmansia—Grows easily and blooms freely. The flower is something to be proud of. The plant has large tropical leaves, which gives a fine tropical effect to the garden. Good strong plants, $1.00 and $1.25 each, postpaid.
Flowering and Ornamental Shrubs—(Cont’d.)

Althea—(Rose of Sharon)—Splendid flowering shrubs bearing a profusion of single and double flowers. They are very pretty and desirable HEDGE PLANTS. They bear their flowers through a long period. I carry in stock DOUBLE white, pink and purple, and SINGLE white, pink and purple. Good strong plants, 75c and $1.00, each, postpaid.

Jasmines—The Jasmines are amongst the prettiest and most fragrant of our southern shrubs and ought to find a place in every garden. I have the following varieties:

- **CONFEDERATE OR MAYALAN**—A strong climbing variety, flowers very fragrant.
- **CAPE JASMINE**—The double white flowers are delightfully fragrant. This variety is known to a great many as the GARDENIA.
- **GRAND DUKE OF TUSCANY**—A magnificent plant with large, double creamy white flowers, with a delicious fragrance.
- **MAID OF ORLEANS**—This variety certainly ought to be grown by everyone. The flowers are large double waxy-white and delightfully scented.
- **NIGHT-BLOOMING**—Very free flowering and fragrant at night.
- **YELLOW**—Also known as the Carolina Jasmine. This is a graceful, slender and rapid growing climber. An evergreen with dark green leaves and yellow flowers which are deliciously fragrant.

Prices of above Jasmines, good plants 50c each; strong plants 75c each; extra strong plants, $1.00, each postpaid; 3 extra strong plants, your selection, $2.50, prepaid.

**SPECIAL**—The choice of the above six varieties of Jasmines, all strong flowering plants, for $2.25.

Note: Extra large, heavy plants, $2.50 each, express prepaid.

Buddleia—(Butterfly Bush)—Flowers continuously all the season. The flower racemes are composed of many little blossoms in the shape and color of lilacs. They have created a sensation wherever grown. This plant is called the Butterfly bush on account of the apparent preference these insects have for it. A Buddleia with many colored butterflies flitting around it is a pleasing sight. They also make fine cut-flowers lasting well in water.

Deutzia—(Pride of Rochester)—A very showy shrub, particularly valuable on account of its compact growth, luxuriant foliage and free flowering qualities. Large double white flowers with a slight tinge of pink on the underside of the petals.

**New French Hydrangeas—MOUSSELINE**—The famous BLUE Flowered Hydrangea. Every year hydrangeas become more popular in the South, and this is the best of the blue varieties.

**SOME E. MOUILLERE**—This has been the favorite white variety; very free flowering, of good size and form.

**RADIANT**—Very earmine in color, quite distinct.

**HYDRANGEA MILLEFLORE**—One of the most valuable hardy shrub ever introduced. We place it foremost of all shrubs. It makes a perfectly round symmetrical bush that is covered all summer with handsome, large, pure white flowers.

**OTAKA**—A strong, vigorous growing variety, producing large masses of deep blue flowers.

I offer the above HYDRANGEAS, pot grown plants, blooming sizes: strong plants, 50c each; extra strong plants, 75c each; large heavy plants of extra size, $1.50 each, postpaid or prepaid.

**Philadelphus Syringa—** (Mock Orange)—A fine old fashioned sweet-scented shrub early in spring.

**Strong plants**—60c each; extra strong plants, $1.00 each, postpaid or prepaid.

**VAN HOUTTE**—One of the best Spiraea, producing its pretty white flowers in clusters along its graceful arching branches. Very showy and hardy. **Strong plants**—50c each, postpaid; large plants, $1.00 each, postpaid.

**Weigelia**—Amongst the showiest of all the shrubs. A dwarf compact grower with very light green foliage. Bears its white flowers in great profusion. **Strong plants**—60c each; extra strong plants, $1.00 each, postpaid.

**Oleanders**—A flowering shrub that does exceptionally well along the gulf coast. The foliage is long and narrow and the bright showy flowers are produced in great profusion. They are also evergreen. I have them in white, pink and red at 60c, 90c and $1.25 each, postpaid, depending on size.

**Oleo Fragrans**—(Sweet Olive)—A very desirable flowering shrub with bright, glossy foliage and small white sweetly scented flowers. Very attractive and showy. **Strong plants**—$1.00 each; extra strong plants, $1.50 each, postpaid or prepaid. Extra big bushy stock, $2.00, prepaid.

**Rhus Cotinus**—(Smoke Tree)—So called from the very startling resemblance it has to a cloud of smoke when looked at from a distance. This remarkable effect is produced by its masses of very delicate flowers of a purplish color. Something very showy and attractive. **Strong plants**—$1.00 each; extra strong plants, $1.50 each, postpaid or prepaid.
PLANTS FOR SOUTHERN HOMES AND GARDENS (Continued)

Lemon Verbena—Noted for its delicate fragrant foliage. Prices: 25c and 40c each, postpaid.

Flowering Begonias

30 Cents Each, Postpaid

Rubra—Flowers scarlet rose, borne in massive clusters.

Gracillii Luminosa—Very bright scarlet flowers, almost luminous.

Sandersoni—(The coral Begonia) Flowers are of a scarlet shade of crimson.

Gloire De Chattelaine—Bright pink flowers, always in bloom.

Euphorbia—(Crown of Thorns)—A very curious and remarkable plant. It is a strong grower and can be trained to any desired form. Its bright scarlet flowers are of rare and startling beauty. It is said that it was from this plant the Crown of Thorns worn by our Savior was made, hence the name. Prices, each 50c and 65c, postpaid.

Cyperus Alternifolius—(Umbrella Plant)—Requires a great deal of water. Can be grown as an aquatic plant in ponds, fountains, etc. Prices: 45c, 65c and 50c each, postpaid.

Sanseveria—(Tiger Plant)—Also known as the Zebra Plant. Leaves are beautifully striped crosswise with white variegations. They can grow either in sunlight or in dark parts of the room and stand dry and drying out without damage. Prices: 35c, 60c and 80c each, postpaid.

Pandanus—Attractive decorative plants that stand house culture well. Prices: 50c, 75c and $1.25 each, postpaid.

Crotons—Excellent decorative plants, gorgeously colored with different combinations of red, white, green and yellow. Prices: 65c and 60c each, postpaid.

Five Best Palms for Outdoor Planting

One of Each Sort, $1.35, postpaid.

Arega Lutescens—One of the most graceful and beautiful palms.

Pleuroma—Tall-growing palm. Usually ordered for the Gulf Coast, but requires winter protection further inland.

Kentia Belmoreana—Best for the house. They stand the dust well.

Poisonous—Same as the outdoor palms. Can supply in same sizes as the outdoor palms.

Liquid Weed Killer

Destroys weed in paths, roads and gutters. Kills roots as well as tops of all weed and grass growth. Easier and less expensive than hoeing or digging by hand. Very effective in walks and cobbled gutters without injury to road bed. Does not darken cement. Dilute 1 part Weed Killer to 40 parts water. Has not discolored concrete. Apply with sprinkling can. Priced by expression or freight, not prepaid: 1 qt., 75c; 1 gal., $2.00.

Six Charming Rex Begonias

Among the rarest and choicest plants that grow are found the Rex Begonias. Indeed, no plant order is complete without these exquisite beauties. These Painted Leaf Begonias are strong, bushy growers and their grand ornamental leaves are exceedingly beautiful and always greatly admired. Wonderful plants for vases, boxes, etc., if kept well watered and not exposed to the direct rays of the sun.

Prices: Fine young plants, 35c each; extra large plants, 55c and 65c each, postpaid. SPECIAL OFFER: One plant each of our splendid SIX DISTINCT VARIETIES of Rex Begonias for only $1.75, postpaid.

Rudbeckia (Con Flower)—One of the most effective flowering plants in cultivation. Grows about 8 feet high and has a graceful, graceful form. Hundreds of beautiful double flowers of a bright golden yellow. Prices: 85c and 65c each, postpaid.
CHRYSLANTHEMUMS
12 WONDERFUL EXHIBITION VARIETIES
Postpaid $1.75

PLANTS 25c EACH IF ORDERED SEPARATE FROM COLLECTION
Easiest Culture and Lasts for Years in the South

The Chrysanthemums are now universally popular for outdoor planting, and considering their many good qualities, there is no cause for surprise to see them cultivated so extensively. They are very hardy, standing much neglect and bad treatment without serious injury. They flower at their best during October and November. The following list contains the best varieties in color, size and vigor of growth for the South. Hardy plants ready for shipment from March 1st. Place your orders early. Supply limited.

CARRINGTON—Light red. Every collection should have one or more of these splendid plants of red color. Flowers are extra large in size.
LA AFRICAN—Very dark red. The finest dark red sort we know of. A very popular variety, and does well everywhere.

CARDINAL—Deep golden yellow. This is one variety that can be absolutely depended on for size and color. Properly grown flowers are immense.
PINK HOLTZ—Light delicate pink. For a strong, vigorous grower, free bloomer with flowers grown on long stiff stems, there is no superior.

CAMPBELL—White. It has established itself firmly with lovers of beautiful chrysanthemums.

LAVENDER QUEEN—Pale lavender. Produces blooms in great attractive masses.

MRS. HENRY ROBINSON—A grand white sort. Nothing finer among the whites.

GOLDEN GLOW—Bright golden yellow. A distinct shade of bright yellow. Stout, large flower and foliage especially good.

CLEMENTINE TOLSET—The most beautiful of all white chrysanthemums. Pure snow-white, flushed with pink and immense size.

HENRY—Large blooming, long-sought, large-flowering pink "mum" of splendid color.

CHRYSOLOKA—Rich yellow. A standard sort of a well-known commercial yellow that sells on sight and will greatly beautify any garden.

GERANIUMS—PEERLESS COLLECTION
12 Strong Plants $2.00 Postpaid

12 BEST GERANIUMS, all different, $2.00 postpaid. If ordered separate from collection 25c each, postpaid. Shipments from March 1st.

ALPHONSE RICARDE—Orange-red. A most beautiful shade of bright vermilion; large flowers and enormous trusses; a grand variety.

MME. RECAMIER—Double White. We believe this is the finest double white geranium in cultivation. (Scarlet—Daisy—Pink.) A most beautiful peach-pink color shading to hydrangea-pink. Superb. MME. LANDRY—Salmon-pink. Bright scarlet shaded. Borae on long stems. BEAUTE POITEVINE—Shrines pink. Gradually shading to white; a universal favorite.

S. A. NUTT—Dark crimson. The finest of the dark crimson varieties. One that must find its way into every collection. MRS. F. H. SWANLEY—Delicate salmon. One of the finest sorts we sell.

PINK LADY—Red and white. Exquisite. The color is an artistic shade of bright red and white. JOHN DOYCE—Double rich scarlet. Exceptionally bright and effective.

GARDEN BEDDING PLANTS

PETUNIA—have fine assortment of both the DOUBLE and SINGLE VARIETIES in all shades of red, maroon, rose, white and mixed. Each 25c; 2.25 per doz., postpaid.

Prices of the above plants: By mail, 12c each; 1.25 per doz.; $7.00 per 100, postpaid.

HARDY OR PERENNIAL PHLOX—Splendid bedding or border plant with a magnificent range of colors.

Prices: By mail, postpaid, 12c each; per dozen, 1.25; $8.00 per 100.

SPECIAL POT-GROWN PLANTS FOR QUIK RESULTS

SHASTA DAISY—One of the most marvelous productions in the flower line. Extremely hardy perennial with large, free-blooming flowers which last two weeks after being cut. Grows in any soil.

SALVIA—(Scarlet Sage)—No plant is more popular in the South. In the late summer and fall up to late frost comes it is a mass of blooms and in the stock we grow, there is nothing finer.

VERBENA—One of the freest flowering of the summer annuals. A bed of Vermibus of any color makes a sight worth seeing.

HOLLYHOCKS—White, Pink, Yellow, Red. These have established they grow and bloom freely for years.

Prices of the above plants: By mail, 15c each; 1.25 per doz.; $8.00 per 100, postpaid.

VIOLETS—The perfume of the violet is one of the most delightful and pleasant odors. SWANLEY WHITE—P. of white variety. LADY HUTCHINSON—Large double blooms of a rich deep purple color. Prices: By mail, 3c each; $0.50 per 100, postpaid.

VIOLETS—(June); A very early and free flowering variety. Prices, by mail, 1c each; 12c per doz.; $1.00 per 100, postpaid.

Sweet-Scented Geraniums—Rose, Apple, Balm, Oak, Nutmeg. Prices: each, 35c, postpaid; 5 plants, one each of above variety, $1.50 postpaid.
Corona Dry Arsenate of Lead— A well known and very effective sprayng compound. Kills trees and plants of leaf-eating insects such as Codling Moth, Potato Beetle, Cabbage Worms, etc. It mixes easily with water and will not choke the finest nozzle; less freight to pay; more economical and is always the same. One pound of Corona Dry will go as far as three pounds of Arsenate of Lead Paste and do better work. Can be used with safety on any type of shrub. Will not injure the most tender growth.
Prices: lb., 50c; 3 lbs., $1.25; 10 lbs., $5.00; 25 lbs., $10.00; 100 lbs., $50.00. CANNOT BE MAILED.

Corona Dry Calcium Arsenate—This is the proper and most effective powder for dusting on cotton for eradicating the boll weevil. It is the poison used by the U. S. Department of Agriculture in experiments which proved that the weevil could be killed out at a profitable cost. Be sure to get a Bulletin No. 71, U. S. Dept. of Agriculture, which gives all information. Prices: 1 lb., 35c; 5 lbs., $1.25; 10 lbs., $4.00; 25 lbs., $9.25; 50 lbs., $17.00; 100 lbs., $35.00; 200 lbs., $61.00.

Dry Bordeaux—A very effective cure and preventive for many fungous growths. Prices: 1 lb., 50c; 5 lbs., $2.50; 10 lbs., $5.00. CANNOT BE MAILED.

Kerosene Emulsion—A valuable remedy for such insects as Plant Lice, Leaf Aphis, Nipolly Aphis, Chestnut Scale Bug, Leaf Hopper, Mealy Bug and Cabbage Worm. Prices: 1 qt., 55c; 1 gal., $1.50; 5 gal., $6.00. CANNOT BE MAILED.

Paris Green—An excellent aid in combating the ravages of the Potato Beetle, Cabbage Worm, Turnip Beetle and many other leaf-eating insects. It is very powerful and must be greatly diluted, generally 1 pound to 100 gallons of water. Prices: 1 lb., 35c; 5 lbs., $1.00; 25 lbs., $4.50; 50 lbs., $9.00; 100 lbs., $17.50. CANNOT BE MAILED.

Cutworm Killer
Should be ordered when you buy your seeds. It is a dry powder and has it on hand ready for use at the right time. One pound is sufficient for 175 plants with 100 linear feet in rows. It is a coarse, fibrous preparation for strewing near the plants to be protected. It has an enticing odor and these worms prefer it to the plants. Prices: 1 lb., 50c; 5 lbs., $2.50, postpaid. Can be sent by Parcel Post.

THRASHER'S 
D-D

POISON

Pyrox—For Potatoes, Tomatoes, Egg Plants, Cucumbers, Pecans, Cauliflower, Beans, etc., there is no better spray material on the market than Pyrox. It is free from the detrimental elements that are easily mixed with cold water, and sticks like paint to the foliage. It won't run off, and won't close the finest nozzles. A tankful of Pyrox spray will cover more than a tank of other sprays, and you save material. Pyrox sticks to the foliage through heavy rains, which gives you a great advantage. Pyrox kills leaf-eating insects, bugs and worms. It prevents blight, rot and mildew.
Prices: 1 oz., 75c; 5 oz., $1.00; 10 lbs., $2.50; 25 lbs., $6.50; 50 lbs., $11.50; 100 lbs., $22.00. CANNOT BE MAILED.

Target Scale Destroyer—Dormant spray for San Jose, and Oyster Shell Scale. Destroys the White Fly, removes the Sooty Mould from leaves and fruit. A soluble oil that mixes easily. Prices: 1 qt., 75c; 1 gal., $1.75; 5 gals., $6.00. CANNOT BE MAILED.

Tuber-Tonic—This material is a powder, strong to kill leaf-eating insects on potatoes, yet prepared in such a manner as to make it safe to use on vegetables. It has the quick-killing action of Paris Green, the adhesiveness of Arsenate of Lead and the fungous power of Bordeaux. It can be mixed with most vegetable sprays.
Prices: 1 lb., 50c; 5 lbs., $2.25; 10 lbs., $4.25; 25 lbs., $10.00; 50 lbs., $19.50. CANNOT BE MAILED.

Insecto—A Combination Dry Insecticide and Fungicide. A dry-powdered form of Arsenate of Lead and Bordeaux a combination that is needed on every farm, in every orchard and by every gardener. Full descriprion in use free for the asking. Prices: 1 lb., 50c; 5 lbs., $5.00; 10 lbs., $10.50; 25 lbs., $20.00. 50 lbs., $71.00. CANNOT BE MAILED.

Dry Lime Sulphur—For dormant spraying of fruit and shade trees and bushes against San Jose and Oyster Shell Scale. Also for peach leaf curl and brown rot of peaches. Has all the effectiveness of Liquid Lime Sulphur, and is much easier to handle. One pound makes from 2 to 5 gallons. Can be used for both dormant and summer spraying. Ask me to send you Special Booklet. Prices: Put up in sift-proof, air-tight, impecruous packages, not prepaied; 5 lbs., $1.50; 10 lbs., $2.50; 25 lbs., $4.25; 50 lbs., $8.50; 100 lbs., $16.00. CANNOT BE MAILED.

A SPRAY PUMP FOR EVERY NEED

Brown’s Auto Spray No. 1—A compressed air pump warranted against mechanical defect and guaranteed to give satisfaction or money refunded. The tank is made of heavy galvanized iron, as ordered, and has a capacity of about three gallons. The pump head is made of heavy brass, two inches in diameter, and two, possibly three, pumps will discharge the contents of the 25-pound tank in five minutes. It is guaranteed to operate. With each machine is furnished a Tree Attachment, consisting of 5-inch Rubber Tubing with brass spraying nozzle for small trees, and an Auto-Spray Crook nozzle 5 inches long for potato spraying. Funnel with brass wire strainer cloth for filling; and adjustable shoulder strap for carrying. Prices: Galvanized Steel, $8.00; Brass, Polished and Lacquered, $11.00. Weight, crated, 20 lbs.

Perfection Sprayer—For spraying, disinfecting or white-washing of outside fences, buildings, etc. Made of heavy metal, with fewer parts, strong in construction, more powerful in action than many other sprayers on the market. The pump is 5-inch stainless steel with a brass valve, and brass tubing is sealed into the top of the tank with heavy threads. The pump head is 3.5 inches in diameter and weighs 14 pounds. The manufacturer also makes the sprayer to order, for use on small trees and crops. Price: Galvanized Steel, each $8.00; All Brass, each $10.00.

Special Sprayer—A single-spray pump with its own sprayer so arranged as to break up the solution into a fine, mist-like spray, thus making it very effective for spraying dyes and disinfectants, as well as any ordinary sprayer. Capacity, one quart. Price, 40c. Parcel Post, 2 pounds.

Myers Improved Brass Barrel Spray Pump—A pump that can be attached to a barrel is necessary for the efficient spraying of the larger plants. Cylinders, valves, valve seats and discharge are all made of brass. The pump head is made of brass tubing, and the barrel is made of galvanized iron. Price, $1.50. Price, $12.00. No. 205B, with a lead of 5 feet of five-ply discharge hose, and the barrel, each $10.00. The barrel is made of galvanized iron, and the prices include the bushing and liner, with a lead of five-ply, galvanized iron, each $1.00. Bordeaux instead of Veromul, or Veromul, with the above extra charge when specified.

Bucket Spray Pumps—Made entirely of brass, except the footrest, bucket, handle and grip. The prices below do not include bucket, but it is shipped with three feet of hose. The pump head is made of brass tubing, and the barrel is made of heavy brass tubing. Price, $2.00. Price, $1.50. Price, $1.00. Price, $0.50. The hand pump is made of brass tubing, and the barrel is made of galvanized iron. Price, $1.50. Price, $1.00. Price, $0.50. The hand pump is made of brass tubing, and the barrel is made of galvanized iron. Price, $1.50. Price, $1.00. Price, $0.50.

The Corona Dry Duster—Mechanically perfect, emits no dust and is driven by hand with a lighter weight than any other apparatus on the market. It will work on any position and in any direction, downward, upward, or horizontally. No leaf insects are affected, and the insecticide is destroyed by the mechanism, no screens or adjustment, no moving parts or breaking of parts. Shipping weight, 3 pounds. Price, not prepaid $2.50.

Dickey Bug Death Duster—A splendid little duster to apply Dickey Bug Death in dry form. Can also be used for applying Shot, Tobacco Dust, Powdered Arsenic, etc. Price, each, $.50. Weight, 1/2 pounds.

Cahoon Seeder—This is undoubtedly the finest seeder on the market. It will sow any seed, from 6 to 12 acres per day. It will scatter the following distances: 1/2 inch, 20 feet; 1 inch, 40 feet; 1/2 inch, 25 feet; 5 inches, 10 feet. The bag and hopper hold about 22 pounds of seed. Price, each, $5.00. Mailing weight, 8 lbs.
GARDEN TOOLS AND IMPLEMENTS

The Arcade—The Home Flour Mill. This convenient and inexpensive mill produces perfect flour from corn, wheat, barley, rye, rice, and all other small grains. Home-ground flour costs about one-half of what patent flour costs. Grinds all grades, from very coarse to very fine. It can be clamped on to a convenient table. It is 11 inches high and weighs 11 pounds, net. Price, $1.25, prepaid, $1.50.

ARCADE MILL. No. 2 is equipped to drive with power, and where power is available it will probably be preferred to the hand mill. Price, $2.00, prepaid, $2.25.

Black Hawk Corn Sheller—The finest and most economical corn sheller on the market; is instantly clamped to any barrel, box, bin or tub. No tools required, no holes to and can be instantly adjusted to take any size of ear. It shells easily, shells clean, does not break the corn. Capacity, 8 to 14 bushels per hour. Price, each, $5.00, prepaid, $6.00.

Fork—Long—Handled—Extra quality, spring-tempered steel, 4½ feet long, bent hardwood handles. Each, $1.00, by express.

Hay—Three 12-inch tempered steel tines, bent hardwood handles. Each, $1.25, by express.

Rakes—Steel Garden—Forged in one piece, teeth spring-tempered; bowed well braced. Hardwood handles. Price, each, 50c.

Hoes—Heavy Solid—Used in the Cotton, Corn and Cane Fields. Each, complete, $1.00.

SOLID STEEL GARDEN—For general garden work. Price, each (without handle), 50c.

John Reilly—Extra strong, deep blade, made with patent shoulder scoop, for setting back dirt. Price, each (complete), 75c.

Schoener's Handy Hoe Garden Hand Plow—A very useful and handy tool. Each, complete, $1.10, by express.

Pony Corn Sheller—A thoroughly reliable sheller in every way. Made of the finest materials throughout. Will do rapid and thorough work. Does not break or scatter the corn. Price, each, $2.50, by express.

Apache Grist Mill—This is easily the best hand-grinding mill on the market. Equipped with a large fly wheel and ball bearings, it is easy to turn and grinds rapidly. The heavy fly wheel gives momentum to the machine and makes grinding a pleasure instead of a labor. Regardless of all dry grinds, a quart of table meal in two minutes. In time and toils saved in grinding, you save its cost every six months. One of these machines should be in every farm household.

Price, complete, $10.00, by express. Extra grinding plates, 75c, by express.

Dirt Bands—For good gardeners who desire early crops of Egg plants, Cucumbers, Melons, etc. They are really individual and can be thrust even before bending to avoid breaking. Size 4x14.

Price—Not prepaid, per 100, 60c; per 1,000, $3.50.

Masters Rapid Plant Setter—Makes transplanting a pleasure, instead of a labor. Will set, water and cover in one operation, such plants as Cabbage, Cauliflower, Celery, Pepper, Tomatoes, etc. Strongly built. The man can set 10,000 plants daily. Work in an upright position all the time; no stooping and no large labor. Price, each, $6.00.

Dibbles—For setting potato or other plants, this convenient tool will save you much time, do the job right and the work will not be so tiresome. Each 60c, not prepaid. Postage weight, 1 pound.

NOTE.—THE PRICES ON THIS PAGE ARE SUBJECT TO SCRAVING, AND ARE NOT PREPAID UNLESS SPECIFIED. IF SHIPMENT IS DESIRED BY EXPRESS POSTAGE WILL BE CHARGED.

Feed Your Fields with Fertilizer
Our Fields Can Feed You

The Ohio Agricultural Experiment Station has found from long series of tests that food and feed crops on land with soil that has been fertilized with fertilizer gave far better results than on acres without fertilizer were raised on 40 acres by the use of fertilizer, with far less labor and at about two-thirds the cost.

The South must use far greater quantities of commercial fertilizer than farmers in various other sections of the country. Thousands of our farms are operated on an intensive basis; others are worked in a more limited way, specializing in one, or at best a few crops. In the Middle West crop rotations take care of rebuilding soil fertility and lands are not utilized for as long a period of the year as in many Southern States. You can't remove plant foods from the soil and expect good yields indefinitely without restoring those elements. You must put back as much, or more, as you remove, or you will soon have a "rundown" farm. If you don't rotate you must use commercial fertilizers to replace the essential food elements from the plant food from the latter source give as a rule excellent results; still it is the opinion of many practical farmers that the blood and bone and tankage mixtures are more reliable and lasting in their effect, and that they give much more and better results under any conditions.

**Rawbone Superphosphate With Potash**

**ANALYSIS:** Available Phosphoric Acid 9% Per Cent.-Nitrogen .5% Per Cent.-Potash 15% Per Cent. This fertilizer is especially prepared and highly recommended for all vegetable crops. It gives most excellent results on Peas, Beans, Radishes, Cabbage, Melons, Tomatoes, and other commercial truck crops. It is a splendid bone and tankage mixture that is superior for immediate as well as prolonged results, and is of exceptional value for garden crops, root crops, corn, grain, grasses, fruits, tomatoes, small fruits, grape vines and in all vegetation not requiring a great amount of potash. When broadcasted and hrowed in use 1/4 to 1 ton per acre. For garden crops drill in 500-800 lbs. per acre. This fertilizer contains all the elements necessary for promoting healthy luxuriant growth of plants, vegetables, and plants begin to feed from it immediately.

**Prices:** 5-lb. package, 40c; (malling weight 6 lbs.); 10-lb. package, $1.25; (malling weight 12 lbs.); 50-lb. bag, $5.75; 100-lb. bag, $8.75; per ton $60.00.

**Reuter's High Grade Raw Bone Meal (Fine Ground)**

**ANALYSIS:** Total Phosphoric Acid 22 Per Cent.-Nitrogen 3.79 Per Cent (Equivalent to 4% Per Cent Ammonia.) This is the finest, purest and surest fertilizer. Slow in decomposing, therefore forming an excellent permanent improvement, less likely than any other fertilizer to waste. Absolutely no danger of burning systems of production, in trucking and commerical gardening and fruit raising, commercial fertilizer will always be the practical and economical method of soil rebuilding. One or more of the following plant foods should be placed under the following species:

**Blood Bone and Tankage Mixtures**

The following two preparations are made purely from an Animal Basis, and they cannot, of course, be sold as low as fertilizers in which the plant food is derived from chemicals, and while fertilizers deriving their plant food from the latter source give as a rule excellent results; still it is the opinion of many practical farmers that the blood and bone and tankage mixtures are more reliable and lasting in their effect, and that they give much more and better results under any conditions.

**Nitrate of Soda**—A fertilizer for all crops. It is very quick in action and hastens the maturity of crops. This is the most available form in which nitrogen can possibly be applied. Especially recommended for spring use for strawberries and vegetable crops, and also in fall. It is applied by broadcasting the spring or fall just at the beginning of the active growing season. It should not be applied more than 150-250 lbs. to the acre, and it is best applied just before and during the fall. It is more even distribution. It is applied in liquid form, mix 2 ounces to one gallon of water, and do not apply more than once.

**Lime (Hydrated)**—This is a very fine article for distributing renovating land that has become sour, whether garden or field, this preparation has absolutely no equal. It promotes growth, gives the grass a rich color, and has a tendency to prevent weeds. Apply one ton per acre on field, and one half to on lawns.

**Cotton Seed Meal**—Apply 500 to 1,000 lbs. to the acre to a deep well with the stable pudding upon the character of your land and the crop to be fertilized. Exceedingly rich in potash and ammonia (ammonia), making it excellent for use as a grass and grain fertilizer, and largely used by truckers and market gardeners on practically all vegetable and truck crops. Our stock is the best procurable, for some trials for use with any low grade meal, this meal is guaranteed in every respect.

**Prices:** 10-lb. package, 40c; (malling weight 6 lbs.); 10-lb. package, $1.25; 50-lb. bag, $5.75; 100-lb. bag, $8.75; per ton $60.00.

SPRING 1920

IMPORTANT.—I always recommend having plants sent by express at purchaser's expense, when there is an express office near, as I can usually send somewhat larger plants and do not have to wash the soil off the roots, as is the case with mail shipments.

DELAY NOTICE.—Plants are sent direct from our nurseries subject, in the case of seasonal items, to about five days' delay. On items that are not seasonal at time order is received I will book those items to be shipped at the proper transplanting time unless purchaser insists upon prompt shipment and is willing to assume all risks.

NON-WARRANTY.—Chris. Reuter gives no warranty, express or implied, as to description, quality, productiveness, or any other matter of seeds, bulbs, plants or trees he sends out, and will not be responsible in any way for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

GUARANTEE.—I guarantee safe arrival of all plants sent by express in the United States. Should anything be injured in transit I urge the customer to notify me at once on receipt of the goods, and in every case send me a list of what has been damaged, so that I can replace them without delay. My responsibility ceases upon the arrival of the goods in good condition and I do not guarantee stock to live, nor will I replace that which dies or fails to grow. I do guarantee, however, that all nursery stock will be in good, live and healthy condition upon departure from nursery. Plants or other nursery stock sent other than by express are entirely at risk of purchaser.

SUBSTITUTION.—Where particular varieties are ordered, and particular ages and sizes of trees, kinds of stock, etc., it should be stated whether and to what extent substitution may be allowed in case the order cannot be filled to the letter. Where no instructions in this respect accompany the order, I shall feel at liberty to substitute other varieties as nearly similar as possible. If selection of varieties is left entirely to me I shall endeavor to send only such sorts as are acknowledged to give general satisfaction.

NOTE.—If plants are not wanted at once, please state what date you wish them shipped
